Proceedings

OF THE

Government of his Highness the Maharaja of Mysore

MAY 1916

BANGALORE:
PRINTED AT THE GOVERNMENT PRESS
1916

CONTENTS FOR MAY 1916.

PART I, IN EXTENSO.

I. REVENUE.

SECTION 1—LAND REVENUE.

PAGES

No. R. 10081-89—L. R. 15-15-158, dated 1st—

Directing that information regarding cart-tracks newly opened should be furnished in the quarterly return of progress of Village Improvement Work ... 1

No. R. 10171-80—L. R. 42-15-27, dated 3rd—

Directing that all estimates for the restoration of minor tanks requiring the sanction of Government in the Revenue Department be submitted through the Chief Engineer, so that they may be subjected to professional scrutiny by the said officer before transmission to Government ... 2

No. R. 10289-98—L. R. 42-15-29, dated 8th—

Reviewing the half-yearly report on the progress in the restoration of minor tanks for the half-year ended 31st December 1915 and directs that quarterly reports should be submitted in future ... 3

No. R. 10476-523—L. R. 188-15-2, dated 15th—

Reviewing the Report on the Administration of the Revenue Department for 1914-15 ... 4—8

No. R. 10744-54—L. R. 15-15-182, dated 19th—

Recording the report of the Hobli Conference held at Hireguntanur in the Chitaldrug Taluk in April 1916 ... 9—10

No. R. 10629-38—L. R. 16-15-32, dated 17th—

Stating that, except to the extent of pointing out any objectionable expenditure at the time of auditing the accounts, it is not desirable to interfere with the administration of the Funds of Tank Panchayets formed under Section 10 of the Tank Panchayet Regulation ... 11

No. R. 10713-22—L. R. 42-15-30, dated 18th—

Reviewing the special annual report for the year 1914-15 on the working of the rules *re* minor tanks restoration scheme, with certain observations ... 12—14

No. R. 10733-43—L. R. 15-15-181, dated 19th—

Recording the reports on the Taluk Conferences held at Hosdurga and Hiriyur in February 1916 ... 15—20

No. R. 10897-905—L. R. 16-15-33, dated 24th—

Reviewing the half-yearly report on the progress in the constitution of Tank Panchayets for the half-year ended 31st December 1915 ... 21—23

No. R. 11004-11052—L. R. 475-15-3, dated 27th—

Directing that the debenture bonds of the Chitaldrug Town Water-supply Loan whose interest is guaranteed by Government be accepted as security required to be taken from Government Officers and contractors under the existing rules ... 24

No. R. 11118-27—L. R. 569-15-1, dated 25th—

Directing that Probationary Assistant Commissioner not trained in Treasury work should not be placed in independent charge of Treasuries ... 25

No. R. 11161-11172—L. R. 608-14-25, dated 31st—

Enlarging the Inam Committee constituted in Government Order No. R. 10103-111—L. R. 608-14-2, dated 24th May 1915, and the scope of its investigation ... 26—27

PAGES

SECTION 2—LAND SURVEY.

No. R. 10398-407—L. S. 41-15-3, dated 11th—
Reviewing the Report on the Progress of Survey and Settlement Operations in Mysore during the Survey year ending 31st October 1915 .. 1

SECTION 3—AGRICULTURE.

No. R. 10995-11003—Agri. 9-15-11, dated 27th—
Recording the statement of cattle mortality for the quarter ending 31st December 1915 ... ... 1—3

SECTION 4—FORESTS.

No. R. 10414-25—Ft. 139-14-6, dated 11th—
Ordering the temporary splitting up of certain District and Range charges of the Forest Department for the better working of the forests and sanctioning an additional temporary establishment costing Rs. 10,128 for the year 1916-17 ... ... 1—6

No. R. 10444-55—Ft. 32-15-2, dated 12th—
Approving of the list of items for investigation in connection with development of the resources of Ghaut Forests ... ... 7—9

II. FINANCIAL.

SECTION 1—GENERAL FINANCE AND BANKING.

No. Fl. 5923-72—G. F. 10-15-90, dated 24th—
Laying down that all cases of purchase of articles should be submitted to Government, when their value exceeds Rs. 10,000 1

No. Fl. 5731-40—G. F. 179-15-2, dated 8th—
Recording with certain observations the Comptroller's report on the resource operations in the State during the year 1914-15... ... ... 2—12

No. Fl. 6070-119—G. F. 213-15-1, dated 30th—
Laying down rules regarding the discussion of the State budget in the Representative Assembly ... ... 13—14

SECTION 2—SEPARATE REVENUE.

No. Fl. 5687-96—S. R. 111-15-9, dated 2nd—
Accepting the tender of Mr. V. Chinnaswami Mudaliar, for carrying arrack, etc., during the three years commencing from 1st July 1916 ... 1

No. Fl. 6040-9—S. R. 168-15-4, dated 27th—
Raising the duty on country beer to 4½ annas a gallon with effect from 1st July 1916 2

SECTION 3—SALARIES AND ALLOWANCES.—*Nil.*

SECTION 4—CIVIL ACCOUNTS.—*Nil.*

SECTION 5—CENSUS.—*Nil.*

III. JUDICIAL AND LEGISLATIVE.

SECTION 1—LEGISLATION.

No. J. 4253-300—Legis. 6-12-57, dated 2nd—
Supplying of copies of Government publications to subordinate offices ... 1

Prohibiting the killing or capturing of male bison in the Malekuppe and Ainur-Marigudi State Forests of the Mysore District for a period of four years 2

SECTION 2—COURTS.

No. J. 4556—Cts. 22-13-5, dated 17th—
Introducing of trial by jury in Sessions Cases in Bangalore and Mysore as a tentative measure for two years 1

PAGES

SECTION 3—PRISONS AND JAILS.—*Nil.*

SECTION 4—REGISTRATION.—*Nil*

SECTION 5—POLICE.

No. J. 4480-88—Police 166-15-2, dated 15th—

Recording the Report on the working of the Mysore Game and Fish Preservation Regulation and the rules framed thereunder for the calendar year 1915 ... ... 1—2

IV. LOCAL FUND AND SANITARY.

SECTION 1—LOCAL BOARDS.

No. 8501-15—L. B. 31-15-36, dated 19th—

Reviewing the District Fund Administration Report and Accounts for the year 1914-15 .. .. 1—7

SECTION 2—MUNICIPAL.

No. 8401-20—Ml. 239-15-2, dated 15th—

Directing that Municipal Councils and Municipal and District Boards, including the Kolar Gold Fields Sanitary Board, may adopt the Government Order of the 28th February 1916 for regulating the grant of grain compensation allowance to their servants 1

No. 8482-98—Ml. 73-15-37, dated 19th—

Reviewing the Municipal Administration Reports and accounts for the year 1914-15 ... ... 2—7

No. 8614-22—Ml. 250-15-1, dated 25th—

Directing the discontinuance of the submission of the quarterly returns of District Fund, Municipal and Local Funds General works to Government 8

SECTION 3—MEDICAL.

No. 8724-5—Med. 130-15-6, dated 30th—

Reviewing the Report on Chemical, Bacteriological and Toxicological work for the calendar year 1915 1

SECTION 4—SANITARY

No. 8201-7—San. 99-15-5, dated 8th—

Passing orders in the matter of granting concessions to settlers in Malnad ... 1—2

V. GENERAL.

SECTION 1—PRESS.—*Nil.*

SECTION 2—MILITARY.

No. G. 15422-478—Mily. 134-14-20, dated 12th—

Sanctioning the continuance of the system of supply of transport carts on hire to the departments of the State 1

No. G. 15588-89—Mily. 227-14-6, dated 6th—

Sanctioning the entertainment of a non-pensionable establishment of eight dhobies for each Infantry Regiment on a pay of Rs. 5 each per mensem... 2

No. G. 15786-833—Mily. 215-15-2, dated 20th—

Relaxing the rules regarding the sale of Kunigal stud bred horses in favour of Government officers so as to permit of the purchase money being paid by them in six instalments 3

SECTION 3—MINES AND GEOLOGY.

No. G. 15405—Geol. 15-15-4, dated 12th—

Reviewing the Report on the working of the Department of Mines and Geology for the year 1914-15 ... ... 1—2

PAGES

No. G. 15409—Geol. 5-15-7, dated 12th—

Approving of certain changes in the rules relating to the grant of mineral licenses and leases proposed by the Director, Department of Mines and Geology 3

No. G. 16129—Geol. 26-15-8, dated 27th—

Fixing revised rates of royalty on manganese, chorme and magnesite ores for two years ... ... 4—5

SECTION 4—MISCELLANEOUS

No. G. 15094-140—G. M. 277-15-74, dated 4th—

Reviewing the dismissal returns received for the quarter ending 30th September 1915 ... ... 1—2

No. G. 15883-922—G. M. 523-15-1, dated 22nd—

Requiring Heads of Departments to open a register in the case of Government officers who have executed agreements of service or who have entered service on special conditions 3

VI. EDUCATION AND AGRICULTURE.

SECTION 1—EDUCATION.—*Nil.*

SECTION 2—AGRICULTURE AND EXHIBITIONS.

No. 6320-68—A. & I. 184-15-5, dated 2nd—

Issuing supplementary rules for the benefit of small sericulturists ... 1—2

No. 6436-50—A. & I. 195-15-2, dated 6th—

Sanctioning the establishment of an Agricultural School at Chikkanahalli, Sira Taluk, tempory for two years from 1st July 1916 ... ... 3—5

No. 6492-8—A. & I. 202-15-2, dated 10th—

Directing the transfer of the Tile Factory at Mysore to the Mysore Tile Syndicate on certain terms ... ... 6—7

No. 6560-71—A. & I. 19-15-15, dated 13th—

Passing orders for bringing about the division of business between the Provincial and the Central Co-operative Banks, Bangalore ... ... 8—9

No. 6600-51—A. & I. 137-15-2, dated 15th—

PART I.

Quarterly Return of Progress of Village Improvement Work.

No. R. 10081-89—L. R. 15-15-158, dated 1st May 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Order No. R. 10081-89—L. R. 15-15-158, dated 1st May 1916.

The Deputy Commissioners of Districts are requested to show in future in a separate column in the quarterly statements of progress of village improvement work submitted by them, the length of cart-tracks newly opened or improved in their respective districts.

V. R. THYAGARAJA IYER,
Secy. to Govt., Rev. Dept.

To—The Revenue Commissioner in Mysore.
The Deputy Commissioners of Districts.

Estimates for the Restoration of Minor Tanks

No. R. 10171-80—L. R. 42-15-27, DATED 3RD MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Order No. R. 10171-80—L. R. 42-15-27, dated 3rd May 1916.

Government direct that all estimates requiring sanction of Government under para 7 of the Rules governing the restoration and construction of minor tanks appended to Government Order No. R. 5042-89—L. R. 408-14-1, dated 11th December 1914, be submitted to Government in the Revenue Department for sanction through the Chief Engineer of Mysore so that they may be subjected to professional scrutiny. After such scrutiny the Chief Engineer will forward the estimate to Government.

V. R. THYAGARAJA IYER,
Secy. to Govt., Rev. Dept.

To—The Revenue Commissioner in Mysore.
The Chief Engineer of Mysore.
The Deputy Commissioners of Districts.

Progress in the Restoration of Minor Tanks.

No. R. 10289-98—L. R. 42-15-29, DATED 8TH MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. 13324, dated the 5th April 1916, from the Revenue Commissioner in Mysore, submitting a consolidated statement showing the progress made in the several districts during the half-year ended the 31st December 1915 in the restoration of minor tanks together with a copy of his review thereon.

Order No. R. 10289-98—L. R. 42-15-29, dated 8th May 1916.

In his letter dated the 13th October 1915, the Revenue Commissioner submitted a statement relating to the progress made in the restoration of minor tanks for the half-year ending 30th June 1915. In this statement, complete information was not furnished in accordance with the Government Order No. R. 9756-66, dated the 7th May 1915; but it was observed that only 53 tanks were actually restored during the half-year out of a total of 586 tanks taken up for restoration. The statement submitted was full of discrepancies and after some correspondence, the correct figures for each district were ascertained. In the meantime, the report for the second half-year ending the 31st December 1915 became overdue and his report has been received with the Revenue Commissioner's letter read above.

2. In his review, the Revenue Commissioner has remarked that the work turned out during the half-year was unsatisfactory. Government regret that in this important branch of work the Deputy Commissioners have not been exercising adequate supervision. A sum of Rs. 1,60,000 was allotted for the year 1915 and the total amount spent out of this allotment comes to only Rs. 18,921. In the remark column of the consolidated statement, it is stated that particulars have not been furnished for most of the taluks and that in some instances incomplete works of the previous year have not been included. Government observe that these defects in the statement and returns clearly show that the matter is regarded as one of pure routine by the Deputy Commissioners and Amildars and no attempt is made to scrutinize the progress made from time to time.

3. Government have laid down rules, given the necessary funds and entrusted the responsibility for working the scheme to the Revenue Commissioner who is expected to take notice of all instances of slack execution and bring them also to the notice of Government, if necessary.

4. Government consider that it is necessary to watch the progress of such works in greater detail more frequently than has hitherto been done and accordingly request the Revenue Commissioner to review the progress every quarter in future, obtaining punctual reports from the Deputy Commissioners of Districts and to submit a copy of his review to Government for their information. In the review, particulars of incomplete works of previous years should be specifically referred to and the progress thereunder shown for each district.

V. R. THYAGARAJA IYER,
Secy. to Govt., Rev. Dept.

To—The Revenue Commissioner in Mysore.
The Deputy Commissioners of Districts.
The Chief Engineer of Mysore for information.

Esd.—C. R.

Report on the Administration of the Revenue Department for 1914-15.

No. R. 10476-523—L. R. 188-15-2, DATED 15TH MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

The Report on the Administration of Revenue Department for the year 1914-15, received with the Revenue Commissioner's letter No. 4308, dated the 30th September 1915.

Order No. R. 10476-523—L. R. 188-15-2, dated 15th May 1916.

Mr. K. S. Doraswami Iyer continued to be the Revenue Commissioner throughout the year under report.

2. *Season and Agriculture.*—The Revenue Commissioner has furnished figures showing the average rainfall for the calendar year 1914. As a separate report on rainfall for each calendar year is submitted by the Meteorological Reporter and reviewed by Government, figures for the official year may be furnished in future Revenue Administration Reports.

3. The average rainfall during the official year 1914-15 was 47·02 inches, *i.e.*, 16·56 inches above the previous year's average and 94 cents above that of 1912-13. Though slightly better than in the previous year, the year under review was far from being a prosperous one for the agriculturist. The mungar rains of 1914 were scanty and ill-distributed. The south-west monsoon was also unsatisfactory especially at the outset. There was insufficient supply of drinking water and fodder in consequence and although the difficulties arising therefrom were relieved by temporary wells, takavi loans and the opening of State Forests for free grazing, the Government regret to note that there was considerable cattle mortality in the first quarter of the year in the Bangalore, Tumkur, Hassan and Chitaldrug Districts.

4. The unsatisfactory seasonal conditions at the beginning of the year affected the extent of lands newly taken up for cultivation. The net increase in the area under occupancy was 42,794 acres as against 43,130 in the previous year (also an unsatisfactory one) and 66,927 in 1912-13. Owing to the improvement of the situation later in the year the net area cropped increased from 6,059,942 in 1913-14 to 6,257,360 acres. The outturn of crops was generally poor, though slightly better than in 1913-14. The prices of rice and ragi showed a tendency to rise in the first half of the year but went down after the harvests. The average price of rice, 2nd sort, was 6·86 seers per rupee as against 6·62 seers in 1913-14, and that of ragi 15·30 seers per rupee as against 14·85 seers.

5. *Economic Condition of the People.*—Owing to the unfavourableness of the season prospects, the condition of the agricultural classes was far from satisfactory, though there was no actual distress in any part of the State. The industrial and commercial classes suffered somewhat on account of the outbreak of the war in Europe. The principal articles the trade in which was affected were cotton, copra, and sandalwood The labouring classes fared better. There was a growing demand for labour on account of the increasing industrial activities in some parts of the State, and also in connection with Department of Public Works and Railway Works which are being undertaken on an extensive scale.

6. *Darkhasts.*—The number of darkhasts received during the year was 10,735 or 631 more than that in the previous year, and including those pending from previous years, 21,439 had to be dealt with. The Government regret that the disposals continued to be unsatisfactory there being a total of 11,207 still in arrears.

The arrears are particularly heavy in the Mysore District, where as many as 3,100 darkhasts were pending at the close of the year, of which 978 are more than two years old, and 410 more than three years old.

The state of affairs disclosed in the report cannot be considered satisfactory specially in view of the orders issued in the last year's review. The Revenue Commissioner is requested to submit a special report on the steps that he considers necessary to bring about an improvement in this branch of work not later than the 1st July 1916.

7. *Eksal Tenure.*—There was a large increase in the extent of land on eksal tenure during the year, the total being 1,243 acres as against 681 in the previous year. Besides the above over 3,000 acres of land forming the beds of tanks were granted for cultivation as a relief measure owing to the unfavourable seasonal conditions.

There was, however, only one application under the rules for the grant of lands overgrown with lantana and prickly pear since their promulgation and it is not reported whether this has been sanctioned. The rules are apparently not as widely known as they should be. The Revenue Commissioner is requested to take needful action in the matter.

8. *Large Landed Estates.*—A scheme for the grant of lands for the creation of large landed estates was sanctioned during the year. One hundred and fifteen applications under this scheme are reported to be under investigation in the Bangalore, Tumkur, Mysore and Kadur Districts. They should be disposed of at an early date.

9. *Settlement of Kunbis and Kumri Cultivation.*—Steady progress has been made in the settlement of Mahratta Kunbis as agriculturists in the sparsely populated ghat regions of the Shimoga District. Two hundred and ten families consisting of 642 adults and 302 children are reported to have been settled till now and 699 acres 33 guntas granted to them at concession rates, and 39 acres 5 guntas on ordinary tenure. The cost of the scheme up-to-date comes to Rs. 18,771 or an average of Rs. 89 per family.

Government are glad to note the efforts the District Economic Committee of Shimoga have been making in furtherance of the scheme by opening schools for the training of the settlers in subsidiary occupations and in other directions.

10. *Jamabandi.*—Jamabandi was commenced fairly early in all the districts but was not completed before the *Kistbandi* in any district, except Bangalore. Government hope that the Revenue Commissioner will impress on the District Officers the importance and necessity of completing the Jamabandi in each taluk before the collection season begins and adopt the necessary measures to ensure this in future years.

11. *Demand, Collection and Balance.*—The total net recoverable demand under Land Revenue for the year, inclusive of the previous years' arrears deducting remissions granted, amounted to Rs. 1,19,20,077 or Rs. 58,071 more than in 1913-14. The collections amounted to only Rs. 1,01,63,969 and fell short of the previous year's collection by Rs. 3,60,147. The balance outstanding at the end of the year was consequently much higher than at the end of 1913-14, *viz.*, Rs. 17,56,108 as against Rs. 13,37,890. Of this a sum of Rs. 6,31,213 represents old arrears. The net mohatarfa demand including the previous year's balance but excluding remissions granted was Rs. 3,34,864, of which a sum of Rs. 2,60,776 was collected, leaving a balance of Rs. 74,088. The percentage of the collection to the demand was 85·2 in land revenue and 77·9 in mohatarfa as against 88·7 and 80·7, respectively, in the previous year.

Collection work was good in the Chitaldrug District, where 92·5 and 96·7 per cent of the demand under Land Revenue and Mohatarfa, respectively, were collected and bad in Hassan and Mysore with a percentage of 77·6 and 80·5 per cent under Land Revenue and 79·6 and 58·1 per cent under Mohatarfa, respectively. It was fair in other districts.

Although the number of cases in which demand notice was issued for the recovery of arrears was 70,160 or 9,271 more than in the previous year, the amount collected was less than that of the previous year by Rs. 93,031. The total number

of coercive processes issued during the year was 85,029 or 11,050 more than in the previous year, but the amount collected, *viz.*, Rs. 6,62,221 fell short of the amount collected in the previous year by Rs. 71,679. The percentage of recoveries by coercive processes to total collections was 6·35 as against 6·97.

These figures are not creditable to the Land Revenue Department. The Government are constrained to observe that the importance of the collection of the current demand within the year is not sufficiently impressed on the officers concerned. The Revenue Commissioner is requested to issue such circular orders as he deems fit to ensure better results in the future. The old arrears should receive special attention.

12. *Revenue Money Order System.*—Revenue money order system is evidently gaining in popularity as there was a large increase in the number of persons who availed themselves of it. The Government have since sanctioned the continuance of this system for a further period of three years.

13. *Land Improvement and Takavi Loans.*—Owing to the partial failure of the rains in the earlier part of the year, Government sanctioned a total allotment of Rs. 2,50,000 for making liberal advances to the raiyats for tiding over the situation. The amount utilized in the several districts was Rs. 1,92,998, or more than double the amount advanced in 1913-14. Of this amount about 64 per cent was disbursed as takavi advances and 22 and 14 per cent for the improvement of lands and for sinking or improving irrigation wells, respectively.

Out of Rs. 1,46,334 that fell due for collection under this head, only a sum of Rs. 77,929 was recovered or about 53 per cent.

The work has shown considerable deterioration as compared with that of the previous year which the Government last year remarked as unsatisfactory. The Revenue Commissioner is requested to take necessary steps to reduce the arrears and to report the action taken by him to Government.

14. *Agricultural Banks.*—It is reported that no amounts are outstanding against any of the Agricultural Banks in the Tumkur, Shimoga and Chitaldrug Districts. The outstandings in the other five districts, however, are very heavy particularly in Hassan, and the recoveries made are not satisfactory, a total sum of only Rs. 29,282-13-1 having been collected against Rs. 5,49,552-13-6 due.

The Revenue Commissioner is requested to state what steps he proposes to take to reduce these arrears.

15. *Agricultural Experiments.*—Government are glad to note that the use of improved agricultural appliances is gradually gaining favour with the raiyats, and that wherever the results of the experiments have been successful, they are not slow in adopting the new methods.

16. *Cattle Mortality, Civil Veterinary Department.*—There was a noticeable increase in cattle mortality as compared with the previous year, the total figures having risen from 84,931 to 101,401. This is attributed everywhere chiefly to the scarcity of fodder. All the eight Veterinary Hospitals and Dispensaries continued to do good work. Government note that there is a growing demand for an increase in the number of these useful institutions. A special mobile establishment consisting of four Assistant Veterinary Inspectors, and four Salustries has been sanctioned during the year under review for carrying out a systematic campaign against rinderpest in the frontier taluks, with the co-operation of the Civil Veterinary Department, Madras, for a period of three years.

17. *Tanks.*—The number of major tanks restored or repaired during the year was 395 as against 459, while the amount spent on them was Rs. 1,89,249 as against Rs. 2,29,615 during the previous year. The number of minor tanks dealt with was 553 at a cost of Rs. 92,158 as against 562 at a cost of Rs. 99,130 in the previous year. The total value of earthwork done by raiyats to major and minor tanks amounted Rs. 29,200 and Rs. 51,797, respectively, as against Rs. 43,065 and Rs. 66,364 in previous year.

There is considerable room for improvement in the work of repairing these tanks.

A new scheme for the restoration of minor tanks having for its object the greater co-operation of the people in regard to raising funds and carrying out the

works, was sanctioned in December 1914. The settlement of preliminaries necessary to give effect to the new scheme and the difficulty in fully manning the new Maramat Establishment sanctioned in April 1914, account for the comparatively smaller progress in the restoration of minor tanks during the year.

18. *Tank Panchayets.*—The number of tanks in respect of which Panchayets were sanctioned during the year was 32. The total number of Panchayets working during the year was 48 as against 30 in the previous year. In the Kadur District, the Panchayets seem to have been working satisfactorily. No information has been furnished for the other districts. The Revenue Commissioner is requested to obtain and submit in his future reports, more detailed information as to the nature of work done by Panchayets.

19. *The Village Improvement Scheme.*—Very good results were achieved under the Village Improvement Scheme during the year. At the end of the year 7,745 Village Committees were working and attended to the improvement of 13,360 villages or about 79 per cent of the total number of populated villages in the State.

Two thousand nine hundred and sixty-six Village Committees held weekly gatherings regularly for improving the sanitation of villages, forming village roads and executing other communal works by the joint labour of the inhabitants. Besides the above, under the system of grants-in-aid provided by the scheme, works costing nearly Rs. 1,78,000 were undertaken by the Village Committees. The contribution of the villagers both in cash and labour towards these works amounted to Rs. 94,000. Several private gentlemen particularly in the Kadur District are reported to have come forward to provide at their own cost communal convenience in the shape of school buildings, musafirkhanas, wells and schools for children and adults.

Bangalore District shewed the best work, both as regards the number of Village Committees working as well as the total value of works executed. The holding of Conferences to discuss the progress of the work under the scheme, formed a special feature in the Tumkur and Mysore Districts.

Government note with lively satisfaction the success with which the scheme has worked during the year and trust that its utility and scope will be still further enhanced under the fostering care of the Revenue Officers.

20. *Rural Drinking Water-supply Scheme.*—With a view to provide every village with a good drinking water well, which is at present the greatest desideratum in rural tracts, Government have in their Proceedings No. 5248-59—San. 38-12-38, dated 6th January 1915, decided to make a special annual grant of one lakh of rupees for three years commencing with the year under review to supplement the funds and labour contribution now made available by District Boards, the Malnad Improvement Committees and the Village Improvement Committees from their resources. The total number of wells constructed or improved under the scheme during the year under review was 788, and the cost incurred Rs. 1,13,970.

21. *Village Forests.*—A scheme for the formation of Village Forests was promulgated by Government in their Order No. R. 5790-803—Ft. 53-13-8, dated 5th January 1915. Proposals for the constitution of 20 blocks are reported to have been received before the end of the year. The work should be pushed on vigorously.

22. *Inspection and Itineration.*—The Revenue Commissioner has not reported the number of days the Deputy Commissioners and Sub-Divisional Officers camped out as distinguished from the number of days spent on tour. Though there has been some improvement in this respect, the itineration of some of the Deputy Commissioners and many of the Assistant Commissioners still falls short of the minimum prescribed. The minimum in the case of the latter has been recently reduced from seven months to six months and Government hope that more attention will be paid to adequate touring and inspection.

23. *Treasuries.*—Except the District Treasury at Mysore, none of the other District Treasuries was inspected twice during the year as required by the Standing Orders. This omission should not recur.

No. R 10176-523 -L. R. 188 15-2, dated 15th May 1916.

24. *Taluk and Sub-Taluk Offices inspection.* -Some Taluk and Sub-Taluk Offices escaped inspection by both the Deputy Commissioner as well as the Sub-Division Officer. The Revenue Commissioner is requested to issue suitable instructions to ensure that these offices are inspected systematically and thoroughly at least once a year by the District Officers.

Government note that there is need for the strengthening of establishments in some offices, and await the proposals of the Revenue Commissioner in the matter. In some districts, the Deputy Commissioners have urged the appointment of additional Assistant Commissioners to relieve them of the taluks in their direct charge. Some re-adjustment of the existing charges is, perhaps, necessary and the Revenue Commissioner is requested to send up at an early date in consultation with the Deputy Commissioner, suitable proposals with the necessary statistics for the consideration of Government.

25. *Record-sorting.*—There are still 4,128 dafters to be sorted, and 4,253 dafters to be indexed in the several offices of the State, nearly half of which belong to the Mysore District. Government regret to note the poor results achieved in this district in spite of a special establishment sanctioned for the purpose.

26. *Boundary Marks.*—A fair number of boundary marks both field and frontier are reported to have been inspected by the District Officers, and found to be in good order. Some encroachments on the Mysore frontier were detected and the matter is under correspondence with the British Government. The question of modifying the present system of the inspection of field boundary marks as laid down in Rule 85 of the Land Revenue Rules and appointing a Mojinidar or Karkoon for each taluk is engaging the consideration of Government.

27. The administration of the Revenue Department continued to be fairly efficient but greater attention should be paid to the collection of old arrears, prompt disposal of darkhasts and reduction of arrear dues of agricultural banks and loans.

The Government note with satisfaction the co-operation of the Revenue officers with other departments in the activities of the Economic Conference and the Village Improvement Scheme.

ACCOMPANIMENT.

Report of the Hobli Conference held at Hireguntanur, Chitaldrug Taluk, on the 20th April 1916.

The idea of holding conferences for the benefit of the people in the moffusil by holding conferences at the Taluk Headquarters was given a further extension and a conference was convened at Hireguntanur the Headquarters of a hobli of that name in the Chitaldrug Taluk on the 20th April 1916, on which day the car festival at the place also came off.

2. The meetings of the Taluk Board and the Taluk Progress Committee were also convened the same day at the place.

3. The Village Committee at Hireguntanur took the leading part in organising the Conference.

4. About 600 people from the several villages of the hobli and villages of adjacent hoblis were present on the occasion. The Amildar Mr. M. Kesaviah, B.A., presided and conducted the proceedings.

5. The Shekdar read a report of progress of the hobli. Then followed the reading of 27 papers prepared by local people on several topics such as Village Improvement, Sanitation, Reading Rooms, Education, Agriculture, Trade, Industries and Co-operation.

6. It is pleasing to note that in the course of this conference, Mr. Mallappa, Patel of Bhimasamudra village of the Chitaldrug Taluk announced that he wood award a gold medal to the Village Committee in the taluk with the best record of work.

7. The Inspector of Co-operative Societies was present and advantage was taken of this gathering to start a Co-operative Society at the place and 250 shares of Rs. 5 each were taken up on the spot.

8. The Amildar in his report on this conference observes that the zeal displayed by the Village Committees on the occasion and the lively interests they took in attending to the meeting and in listening to the papers read distinctly indicated that the holding of such conferences in the midst of rural areas and near the home of the raiyat would prove substantially useful and instructive. An attempt will be made to hold similar conferences whenever facilities offer themselves.

9. It may be mentioned that a similar conference was held a couple of months ago at Kalledevarapura, a village of the Jagalur Taluk.

Funds of Tank Panchayets.

READ—

Letter No. 10403, dated 10th February 1916, from the Revenue Commissioner in Mysore, forwarding copies of correspondence between himself and the Deputy Commissioner, Mysore District, on the question of grant of a sum of Rs. 25 to the Panchayet constituted in respect of the Vijapur amani tank in Gundlupet Taluk for the purchase of locks, etc., to the sluice; stating that the Panchayet has got the amount required; and soliciting instructions as to who should sanction the expenditure, the Tank Panchayet Regulation and the Rules thereunder being silent on the point.

Order No. R. 10629-38—L. R. 16-15-32, dated 17th May 1916.

The correspondence discloses that a fund has been formed by the Panchayet under clause (*b*) of Section 10 of the Tank Panchayet Regulation by the sale of the right of fishing for Rs. 58-7-0. Under Section 10 of the Regulation the Panchayet has control over this fund subject to the control of Government under Sections 18 and 21. All that the Panchayets are required to maintain in respect of the fund, are correct accounts and any objectionable expenditure may be pointed out at the time of auditing the accounts. Except to this extent Government do not consider it desirable to interfere with the Panchayet administration of its funds. Government are therefore of opinion that no sanction is necessary in this case.

READ—

Letter No. 11022, dated 2nd February 1916, from the Revenue Commissioner in Mysore, submitting, with reference to para 12 of Government Order No. R. 5042-89—L. R. 408-14-1, dated 11th December 1914, passing orders regarding the restoration of minor tanks, the special annual reports on the working of the rules for the year 1914-15, received from the Deputy Commissioners, together with a copy of his review thereon.

(Printed as an annexure.)

Order No. R, 10713-22—L. R. 42-15-30, dated 18th May 1916.

1. Recorded.

2. The statement accompanying the Revenue Commissioner's review shows the results of the operations carried on during the year not only under the rules recently framed for the restoration of minor tanks, but also under the old rules, as well as miscellaneous civil works executed by the Revenue Department. The report should have been confined only to the working of the new rules.

3. Government regret to note the disproportion between establishment charges and the outlay on works. The explanations of the Deputy Commissioners concerned called for by the Revenue Commissioner should be submitted to Government with his remarks.

4. Some of the reasons adduced for allowing lapses are not satisfactory. Government trust that better results will be shown during the current year, now that a regular progress of works is fixed, there should be no difficulty. Late preparation of bills should be checked with a firm hand.

No. R. 10713-22—L. R. 42-15-30, dated 18th May 1916.

ANNEXURE.

The Revenue Commissioner's Review on the reports on the working of the rules governing the restoration and construction of minor tanks during the year 1914-15, received from the Deputy Commissioners of Districts.

Official Memorandum No. 11014-21, dated 21st February 1916.

The accompanying statement shows the results of the operations carried on during the year including the earthwork executed by or at the cost of the raiyats.

2. Out of an allotment of Rs. 1,84,460, a sum of Rs. 88,967 only was spent during the year. The amount spent in the Kadur District was Rs. 3,188, while the cost of establishment under the scheme was Rs. 4,928. In the Mysore District the amount spent was a little more than the establishment charges incurred during the period. Even if the outlay on civil works and the cost of the maintenance works executed by Government agency are taken into consideration the establishment charges worked out at 84 and 57 per cent of the total expenditure in the Kadur and Mysore Districts respectively. In the Districts of Chitaldrug, Hassan, Shimoga and Tumkur also, the percentage of the charges of establishment to the total outlay on works is very high being 56, 49, 45 and 38 respectively.

3. In the Chamrajnagar, Nanjangud, T.-Narsipur and Nagamangala and Arsikere Taluks no work was done though the cost of the establishment amounted to Rs. 228, 276, 325, 240 and 187, respectively. In the Seringapatam Taluk no work was turned out and no establishment charges were incurred. No earthwork was executed in five taluks in each of the Kolar, Tumkur and Shimoga Districts, in five Taluks in the Mysore District and in two each in the Hassan and Kadur Districts. The Deputy Commissioners concerned are requested to explain why no work was turned out in the taluks referred to above.

4. Some of the reasons adduced for the large lapses in the allotments are the following:—

(*a*) The year in question being the first year in which the new scheme sanctioned in Government Order No. R. 8464-74—L. R. 193-13-2, dated 28th April 1914, came into force, it took some months for arranging the preliminaries and getting up regular programmes of works;

(*b*) the full staff allotted to the districts did not enter upon their duties till late in the year;

(*c*) water did not recede in some of the tanks proposed to be dealt with;

(*d*) labourers could not be procured in parts of the Kolar, Mysore and Hassan Districts and suitable contractors could not be found in portions of the Shimoga and Chitaldrug Districts;

(*e*) in some cases payments could not be made before the close of the year as the bills were received late;

(*f*) the raiyats did not pay the contribution though they were very lavish in their promises before the sanction of the estimates.

It is hoped that the Deputy Commissioners will be able to achieve better results this year.

K. DORASWAMI IYER,
Revenue Commissioner.

To—The Deputy Commissioners of Districts.

No. R. 10733-43—L. R. 15-15-181, dated 19th May 1916.

ACCOMPANIMENTS.

(1) REPORT OF THE HOSDURGA TALUK CONFERENCE.

The fourth of the Taluk Conferences arranged in the district was held at Hosdurga on the 25th and 26th February 1916. A spacious pandal was erected for the occasion in front of the Taluk Cutcherry, where more than 600 persons were assembled. Almost all the District Officers, the Amildars of Taluks, some of the members of the bar, the members of the District Committee, Economic Conference, many leading and influential raiyats of the taluk, and of other taluks also, were present. Some gentlemen from the adjoining Districts of Kadur and Shimoga and also a few from the Dharwar District also attended it.

The special feature of this Conference was the awarding of four gold medals to patels of a village in each hobli which had done best work under the Village Improvement Scheme and a silver medal to the best co-operative society in the taluk. The Deputy Commissioner Mr. C. S. Balasundaram Iyer, who was proposed to the chair in his opening speech impressed on the assembly the usefulness of having such Conferences in that they tended to open out the minds of the people by listening to the papers read out and joining the discussions invited thereon and to stimulate co-operation and sense of confidence and responsibility among them. Then the Sub-Division Officer rose and spoke at some length on the beneficial acts of Government and the duties and responsibilities of the citizens in helping Government in their movement to further the common weal. He showed by instances how much yet remains to be done for the improvement of the Educational, Agricultural and Industrial condition of the people of this State and exhorted the public to strive to their utmost for securing even if it be little by little the desired end. Even in India he added not to speak of countries outside this State suffers in comparison with Baroda and Travancore in the literacy of the people and percentage of school-going population. More schools ought to be established, improved implements and methods of agriculture resorted to and a healthy spirit of emulation arrived at in matters Industrial and Commercial. The Amildar Mr. Thomson then read his report on the working of the Village and Taluk Progress Committees which was a record of fair progress. The taluk had had a chequered history in that it was a sub-taluk at first and then constituted a taluk, some villages of other taluks of this district and other districts being added on to it. This fluctuation in its career and the combination of heterogenous villages has in a way tended to its tardy progress. A community of interest is however fast coming into existence and it is hoped that the taluk will soon hold its own and show good progress under the guidance of the present Amildar. Several papers were then read on Education, Agriculture, Industries, Co-operation, etc., as per list appended. Discussions were freely invited on them. Both these were much appreciated by the audience. All the papers were carefully thought out and based on practical experience. Those read by Messrs. Subbayya Naidu of Ballalasamudra, Shama Char and the Head Master, A. V. School, deserve special mention as they contained not only a useful record of their practical experience but forecasted the future requirements. The Chairman then rose amidst cheers and said that his thanks were due to the several gentlemen who had read interesting papers and who took part in the discussions that followed. He also thanked Mr. Thomson, the Amildar and his co-workers in bringing about and very successfully too the Hosdurga Taluk Conference. Though the taluk had been constituted and re-constituted more than once still he said that it was good that a community of interest is being fast created and that works to the extent of Rs. 22,000 had been carried out. He hoped for better results next year. Some of the papers he observed were well thought out and gave ample evidence of pains bestowed on them. Almost all of them were good, being short and clear. Such lectures from local men about their own experience and wants stimulated thought and were indications of future development. As regards the enforcement of contribution of half a day labor every week for the improvement of villages a suggestion made by some of the speakers on Village Improvement Scheme he remarked that it was not difficult for Government to introduce an element of compulsion and authority, but it would be much better and would be a sign of healthy development if the required results could be brought about through persuasion and the force of public opinion. After all the villagers are asked to do what is for their own good and by co-operating with Government they would be only helping themselves. He cited in this connection the example of the naughty school boy who, if left to himself for a time, would surely come round by seeing his fellow pupils unconcerned by going on with their work. The awarding of medals as was done on this occasion to patels for good work in their villages and to the Hosdurga Co-operative Society was a very happy idea and would serve an incentive to further improvement and it is hoped that this good example would serve to show when the Conference meets next year a substantial increase of activity in these directions. The opening of grain banks and stocking grain for the help of the poor in their hour of need which is reported by Mr. Subbayya Naidu at Ballalasamudra was a good idea and this ought to develop into an institution which would store and sell all the grain produced in the village on a co-operative basis. Regarding Education he said that more schools are needed in villages. A new building for the girls' school was a desideratum and the boys' school building should be extended. The construction of chattrams to lodge travellers is good in its own way but where there is accommodation for travellers already the construction of Dispensaries and schools should be given preference and should be regarded as acts of higher charity. With regard to the Education of children he said that as the District Inspector of Education remarked some elementary principles of the rights and responsibilities of citizens would be useful and that they may be taught in every village school. People ought no longer to be conservative and stick to their time honored old practices when progress is the watchword of the day and the old order was changing yielding place to new. A spirit of scientific enquiry ought to be cultivated. As there are many tanks in the taluk sugar-cane should be more largely cultivated as also paddy. There is a general complaint that gomal is insufficient. But are there not untries where there are no gomal lands and where in spite of it the cattle are more healthy and

good. He laid stress on the indifference of the raiyats towards the gomal which they had culpably neglected. There was not even a single instance in which the raiyats had taken advantage to plough up and otherwise improve the gomal to admit of better growth of grass. He then touched upon the improvement of cocoanut cultivation for which there is much scope in the taluk. It ought to be possible to increase the area of gardens by about 1,000 acres in the next few years and such an extent of land could perhaps be made available out of the large extent of Excise reserves in the taluk. Its fibre would find a large sale after the war. This and the plantain fibre industry ought to be taken up. The machine to extract plantain fibre costs very little and the District Committee may be requested to send for it. More improved ploughs should be used. Though there is no facility for railway communication yet goods may be stored in a godown near the Railway station and sent out for sale. He brought to the notice of the audience the advantages of having an oil expellor in the taluk which has been sending out a large quantity of til and other oil-seeds. New machines from America for extracting oil should be indented for. This would have good work for local oil-seeds like gingelly, castor and honge and yield good return besides the cakes being used for manure. Weaving by fly-shuttle looms ought to be encouraged. Referring to the Co-operative Societies he paid a deserved praise on their work which though few in number had done good work. He said that more societies should be started and work well. A habit of thrift should be cultivated by the people. Prompt repayment punctuality and other business habits ought to be improved by these societies on their clientele. He hoped in conclusion that these lectures would not share the fate of many others of their kind but would be pondered over, digested and acted upon. He exhorted them to do all that lies in their power to improve the economic condition of the taluk so that when the next Conference is held they may lay before him a far better account of the taluk. With the usual vote of thanks to the chair and cheers to the Throne the Conference was brought to a happy close. Opportunity was taken of this Conference to form a District Economic Association out of the dying embers of the District Agricultural Association started seven or eight years ago. This last will be wound up and the funds at its credit will be refunded to the subscribers with a request that donations will be thankfully accepted for promoting the objects of the District Economic Association in matters Educational, Agricultural, Industrial and Co-operative. The appointment of office bearers, of the Managing Committee was provisionally accepted and rules and bye-laws will be framed for the working up of the newly formed District Economic Association.

In the evening of the 25th the Deputy Commissioner opened an Educational Exhibition in the Anglo-Vernacular School, where a choice collection of Educational and Industrial exhibits were on view. The school children sang the welcome song. The local weavers who had some of their goods exposed there, explained the process of manufacture. They were advised to go to Bangalore and to get a training in the Government Weaving Factory.

The Conference was a great success and much credit is due to the Amildar Mr. Thomson and to his helpers both official and non-official who spared no pains to contribute to its success.

The undermentioned gentlemen read papers or delivered lectures on the subject noted against them in Hosdruga Taluk Conference.

(2) REPORT OF THE HIRIYUR TALUK CONFERENCE.

This Conference, the 2nd of the taluk and the 5th of the Conference held in the district in this year came off on the 28th February and continued its sitting on the 29th. It was held in a pandal put up in the Tyaramallesvara temple, the jatra of which had just closed. A large gathering numbering between 6 and 7 hundred persons including the District Officers, the Amildars of the several Taluks, some of the leading pleaders from Chitaldrug, District Economic Committee members and other prominent persons from the taluk and other parts of the district were present. About twenty persons from the neighbouring taluk of Sira, Tumkur District, also attended it. Mr. S. A. Ramaswami Iyer, Irrigation Executive Engineer, kindly attended and took part in the proceedings.

The Conference commenced its deliberations at 2 P.M. on the 28th under the presidency of the Deputy Commissioner Mr. C. S. Balasundaram Iyer. He opened the proceeding with an introductory speech in which he referred to inevitability of the facts having to be repeated. He hoped that it would be no disgusting repetition but would be considered as calculated to be of some benefit to the local men just as the lessons at a school though old to the teacher are new to each successive batch of boys and would tend to their improvement. It was in that light that they should take the reiteration incidental to such Conferences. The main object of such Conferences was to set people thinking and thus to find out a way to satisfy their wants and requirement so as to make them better equipped. This is best done at meetings where people not only from all parts of the taluk but from other places meet and discuss their needs. If the lessons learnt from the papers read and discussions thereon be carefully laid to heart and followed, there is no doubt that much benefit by way of improving our economic condition will result.

The Deputy Commissioner then called upon the District Economic Superintendent to address the audience on the objects of Economic Conference. The latter in a short speech explained the several ways in which the Government of His Highness the Maharaja are striving their best to improve the Economic condition of the State and the means adopted to bring about this much desired state. One of the most important means was the institution of the Economic Conference. He spoke of the several important measures undertaken, how much more yet remained to be done and how it was in the interests of people themselves to co-operate with the Government in their efforts to ameliorate the condition of the people.

The Amildar then read his report on the work of the Village Improvement Committee which was followed by those on the work of the Taluk Progress Committee and the Co-operative Societies in the taluk.

The Amildar's report was a record of very good work done in the taluk by the villagers to improve their villages, etc. The Village Improvement Scheme has taken a strong hold in the taluk and the work done in this connection is very creditable. There are 131 Village Committees and all of them are doing good work. Up to the end of January 1916, work to the extent of about Rs. 27,000 has been done by the villagers by contributing half a day labour for a week and other

No. R. 10733-43—L. R. 15-15-181, DATED 19TH MAY 1916.

works of permanent character done with Government aid amount to Rs. 8,115. As regards Education good progress has been made in the taluk. Nine grant-in-aid schools have been newly started one of them being a Panchama School. Forty-eight Village Committees are getting 109 news papers.

The report of Taluk Progress Committee showed that much useful work is being done and many important subjects such as planting Honge plantations, training of weavers in the new methods, starting of new schools and starting a Seed Depot are engaging their attention.

A list of papers read in the Conference is appended. Many of them were well considered and were practical in their character. A number of papers had reference to the Marikanve Reservoir which is the chief feature of the taluk and the proper development of irrigation under which is one of the most interesting and important problems of the taluk on which the future prosperity of the taluk will largely depend. Mr. S. A. Ramaswami Iyer, Executive Engineer, Irrigation Division, read a paper on "Irrigation below the Marikanve Tank,' which contained useful suggestions which were much appreciated. Among other papers that were read those on malaria by Dr. Samuel, colonisation of Marikanve tract by Mr. T. Narasinga Rao, Block System of Irrigation by Mr. K. Ramakrishna Iyer and by Mr. Kodandaramaiva, on the opening of a ginning factory by Mr. Bhima Rao and the essentials for the success of Co-operative movement by Mr. K. Subba Rao, B.A., Taluk Sheristedar, deserve mention. The reports of the working of some of the Village Committees were very informing. Mr. Shanmugam Mudaliar of Coimbatore, a raiyat who has settled down for agriculture at Hiriyur, spoke on the possibility of introducing the mat weaving as an industry in the taluk and exhibited some of the mats which had been woven out of the reed of the kind found here, and showed that a profitable business might be developed.

Mr. Sitaramiah exhibited some samples of tobacco grown in the taluk and Sanna Thippaiya of Hirehalli, Challakere Taluk, showed some samples of tobacco grown by him and explained the method in the curing of the stuff as practised in his taluk which was certainly an improvement upon that followed at Hiriyur. He also advocated the growing of tobacco as a summer crop in this taluk where there was a great facility and promised to supply seed if wanted.

The Deputy Commissioner who rose amidst cheers reviewed briefly the several papers that were read and thanked Mr. S A. Ramaswami Iyer for kindly attending the Conference and giving it the benefit of his paper. He referred to the paper read by Mr. Kodandaramaiya on the Block System of Irrigation as practised near Poona with its heavy tax and compared it with the comparatively lighter tax levied here. He advised the raiyats holding lands under the Marikanve Tank to grow good crops like sugar-cane. Cambodia cotton and to use manure such as oil cake, etc., heavily. He showed that on average a net profit of about Rs. 350 an acre may be made by raising such crops.

He referred to the good reputation which Hiriyur cotton had earned in the Davangere and other markets and exhorted them to keep it up by paying more attention to the timely picking of the crop, etc. As regards improved agricultural implements of which about 150 ploughs were reported to be in use he said there was room for even 1,500 more and advised the raiyats to take to their use more largely as they certainly give better tilth and therefore larger yield. He did not agree with one of the lecturers who said that transplantation of paddy was not good for Hiriyur but told them that it had been demonstrated not only outside but even at Hiriyur itself by the raiyats from Coimbatore and other places that transplantation would yield better crop and advised them to follow it, though it may be that at present owing to scarcity of labour it was more costly than sowing seed broadcast. He next touched upon the tobacco crop which was largely grown in the taluk and asked them to go to Bettadapur in the Mysore District, where a good variety is grown, to study its cultivation and introduce it into the taluk. They should study the methods advocated by Mr. Sanna Thippaiya of Challakere Taluk which, if adopted, will give them a more paying crop than at present.

Turning to the matters Industrial, he regretted that there were only a few papers read on the subject and expressed a hope that when the next Conference met there would be more papers on it. He advocated the starting of small gins in central places to command 1,000 acres under cotton, so that they may be at work for 100 days ginning about 100 maunds a day with a double roller gin. This would be a profitable undertaking and would cost about Rs. 2,000.

He referred to the possibility of undertaking mat making industry and to the kambli industry and exhorted the people to co-operative with the Officers of Government to bring about the Economic regeneration of the people of the taluk.

As a sequel to the Taluk Conference an Educational Exhibition was held in the Anglo-Vernacular School. The collection of exhibits was good. The organisers deserve credit.

On the morning of the 29th the Deputy Commissioner opened the Free Reading Room and Library before a large gathering of officers and other gentlemen. The building was constructed out of a munificient grant presented by His Highness the Maharaja in 1912. A Library has been added and will, it is reported, be augmented.

Progress in the Constitution of Tank Panchayets.

No. R. 10897-905—L. R. 16-15-33, DATED 24TH MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. 13667, dated 12th April 1916, from the Revenue Commissioner in Mysore, forwarding the statements showing the progress made in the constitution of Tank Panchayets in the several districts for the half-year ended 31st December 1915, together with a copy of his review thereon.

(Printed as accompaniment.)

Order No. R. 10897-905—L. R. 16-15-33, dated 24th May 1916.

Recorded.

2. There has been a delay of about two and a half months in the submission of the present half-yearly statements. Such delays render them valueless.

3. Government regret to note that the progress made during the half-year in question is not satisfactory. Out of a small number of only eighteen Panchayets sanctioned not more than three were actually constituted. The Government desire to impress on Deputy Commissioners the necessity of taking a little more personal interest in this matter and hope that better progress will be shown in the current half-year, the returns and reviews in respect of which shoud be punctually submitted.

V. R. THYAGARAJA IYER,
Secy. to Govt., Rev. Dept.

To—The Revenue Commissioner in Mysore.
The Deputy Commissioners of Districts.

Exd.—C. R.

No. 10897-905—L. R. 16-15-33, DATED 24TH MAY 1916.

ACCOMPANIMENT.

Revenue Commissioner's review of the progress made in the constitution of Tank Panchayets in respect of major tanks during the half-year ending 31st December 1915, received from the Deputy Commissioners of the several Districts.

No. 13659-66, dated 7—12th April 1916.

The accompanying statement shows the progress made in the several districts during the period. The Deputy Commissioner, Kadur District, has not yet furnished information as to whether the total number of major tanks is 131 as stated by him in the Revenue Administration Report of his district for 1914-15 or whether it is 132.

2. *Column 6 of the statement.*—The Deputy Commissioner, Tumkur District, is requested to explain why the two Panchayets that were in existence at the beginning of the previous half-year have been omitted in the statement under consideration. The Deputy Commissioner, Shimoga District, is requested to explain how the number of Panchayets in his district could be only six seeing that there were four at the beginning of the previous half-year and that six were constituted during that half-year. The Deputy Commissioner, Chitaldrug District, is requested to explain when the two Panchayets referred to in his statement came into existence, as the statement for the previous half-year did not show that they were in existence at the beginning of that half-year or that they were constituted during that half-year.

3. The Deputy Commissioner, Tumkur District, is requested to report in respect of which tank the proposal to constitute a Panchayet is pending in this office.

No. R. 10897-905—L. R. 16-15-33, DATED 24TH MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ AGAIN—

Government Order No. R. 10103-111 L. R. 608-14-25, dated the 14th May 1915 appointing a Committee for considering certain questions connected with the rights and liabilities of Inamdars and their tenants, the individual responsibility of the co-sharers for payment of the quit rent due on the village and the compulsory introduction of survey and settlement into inam villages.

READ—

Correspondence ending with letter No. 1500, dated the 5th October 1915, from the Revenue Commissioner in Mysore, forwarding the resolutions adopted by the above Committee at their third meeting held on the 30th September 1915, together with the memoranda furnished by certain members and recommending that the resolutions may be adopted.

2. Summary of discussion relating to Subjects Nos. 52 and 53 discussed at the Representative Assembly of 1915, relating to the appointment of a commission to enquire into the relations between the inamdars and their tenants and the introduction of survey and settlement into inam villages, respectively, and the reply of Government thereto.

Order No. R. 11161-11172—L. R. 608-14-25, dated 31st May 1916

After perusing the report and resolutions of the Committee with much interest Government desire to thank the members for the care and attention bestowed by them on the questions referred to the Committee. It is, however, considered desirable that before coming to a final decision, the views of the representatives of the raiyats in inam villages should be ascertained and further, there are also certain other questions which require special investigation.

2. The Government are therefore pleased to enlarge the Committee already constituted as follows:—

President.

(1) Mr. K. S. Doraswami Iyer, Revenue Commissioner.

Members.

(2) Mr. D. K. Darasha, Superintendent of Revenue Survey and Inam Settlements.

(3) Mr. A. Subramanya Iyer, Deputy Commissioner, Mysore District.

(4) Mr. P. G. D'Souza, Acting Secretary to Government for Education and Agriculture, and Secretary, Economic Conference.

(5) Mr. K. Srinivasa Rao, Retired Deputy Commissioner.

(6) Mr. Karnick Krishna Murti Rao, Member of the Legislative Council.

(7) Mr. D. Venkataramaiya, B.A., Advocate.

(8) Mr. A. Ramanna, Advocate.

(9) Mr. B. Narasinga Rao, Member of the Legislative Council.

(10) Mr. K. Chandrasekhariah, B.A., B.L., Advocate.

(11) Mr. C. Narasimaiya, B.A., B.L., Advocate.

(12) Mr. Venkatachalaiya of Sajjankere, Chitaldrug District.

The Senior Assistant to the Revenue Commissioner will act as Secretary to the Committee.

3. Besides considering the report and resolutions already arrived at, the Committee will also discuss the question of devising a system for making measurement and demarcation compulsory in the case of all alienated villages as well as all

other questions which, in their opinion, have an important bearing on the subject. The Committee may examine representative inamdars and raiyats of inam villages and may also call for the opinions of other gentlemen individually or collectively. The Committee is requested to complete their work and submit a full report to Government with definite recommendations before the 31st August 1916.

V. R. THYAGARAJA IYER,
Secy. to Govt., Rev. Dept.

To—K. S. Doraswami Iyer, Esq., Revenue Commissioner in Mysore.
D. K. Darasha, Esq., Superintendent of Revenue Survey and Inam Settlements.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

The annual Progress Report of the Mysore Revenue Survey Department, for the Survey year ending 31st October 1915, received with letter No. 146, dated the 1st March 1916, from the Superintendent of Revenue Survey and Settlements in Mysore.

Order No. R. 10398-407—L. S. 41-15-3, dated 11th May 1916.

Recorded.

2. During the year under review there was a slight increase in the outturn of work under all heads, except acreage, as compared with that of the previous year. The cost of working, however, showed a slight increase from Re. 0-5-10 per acre in the previous year to Re. 0-6-3 per acre during the year under review. The Superintendent attributes this increase to the decrease in the area dealt with and to the heavy expenditure incurred for carrying out the work of sub-dividing survey numbers in the Kankanhalli Taluk.

3. The work of Revision Survey and Settlement is greatly in arrears. The Superintendent is requested to expedite the disposal of arrear work. Proposals submitted by him for strengthening the staff are engaging the consideration of Government.

4. Government are glad that the working of the Department has been on the whole satisfactory.

No. R. 10995-11003—AGRI. 9-15-11, DATED 27TH MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. 13350, dated 5th April 1916, from the Revenue Commissioner in Mysore, submitting the statement showing the losses in cattle of various kinds in the State, during the quarter ending 31st December 1915, together with a copy of his review thereon.

2. Letter No. 13845, dated 17th April 1916, from the same officer, stating that the increase in the total mortality during the quarter, in the Shimoga and Chitaldrug Districts, are reported to be due to the prevalence of rinderpest and other cattle diseases in certain taluks of the two districts.

Order No. R. 10995-11003—Agri. 9-15-11, dated 27th May 1916.

1. Recorded.

2. The Revenue Commissioner is requested to take the necessary measures for putting down the cattle diseases referred to above.

3. Government will be glad to have information in future reviews regarding such measures.

V. R. THYAGARAJA IYER,
Secy. to Govt., Rev. Dept.

To—The Revenue Commissioner in Mysore.
The Deputy Commissioners of Districts.

Exd.—C.R.

REVENUE COMMISSIONER'S REVIEW AND THE STATEMENT.

Recorded.

From the figures furnished by the Deputy Commissioners it is seen that the total mortality was higher during the quarter in the Shimoga and Chitaldrug Districts. Explanations for the increase have been called for.

In the Mysore and Tumkur Districts the mortality was very low having decreased to one-half of the mortality during the corresponding quarter of the previous year.

The total mortality in the State fell to 14,423 from 15,346 of the corresponding quarter of the previous year.

Statement showing the losses in cattle of various kinds in the State for the quarter ending the 31st December 1915.

Order No. R. 10414-25—Ft. 139-14-6, dated 11th May 1916.

Government are in full accord with the views of the Conservator that the Forests in the interior of the Malnad and of the Mysore District have not been exploited through lack of communications and adequate staff. They are therefore

No. R. 10414-25—Ft. 139-14-6, dated 11th May 1916.

pleased to sanction his proposals temporarily for a period of one year from 1st July 1916, pending further examination of the whole question in detail. A temporary establishment costing Rs. 964 per mensem as noted in the margin is sanctioned for this period, including the establishment set free by the abolition of the Sub-Division Offices named by the Conservator. An additional sum of Rs. 10,128 will be provided in the budget of the year 1916-17 to meet the above charge.

To—The Conservator of Forests in Mysore.
The Comptroller, Mysore Government, through Branch II.
The Revenue Commissioner in Mysore.
The Deputy Commissioners of Districts.
The Secretary, Economic Conference.

Exd.—C. R.

No. R. 10414-25—Ft. 139-14-6, dated 11th May 1916.

No. 4717—Enc. 3, dated Bangalore, 17th November 1915, from M. G. Rama Rao, Esq., B.A., Conservator of Forests in Mysore, Bangalore, to V. R. Thyagaraja Iyer, Esq., M.A., Secretary to the Government of His Highness the Maharaja of Mysore, Revenue Department (through the Comptroller to the Government of His Highness the Maharaja of Myore.)

With reference to your letter No. R. 3727—Fs. 139-14-4, dated the 29th September last, I have the honour to submit herewith the usual proposition statement in connection with the extra establishment required and also a statement showing the forest area and volume of work as measured by revenue in each of the Ranges of the Mysore and Shimoga Districts. It is not possible just now to prepare and submit a re-appropriation statement, pointing out the source from which the extra cost may be met, as it is yet too early in the year to anticipate the probable savings under any budget head. This will be prepared in the usual course later on in the year, and pending its preparation, it may be directed that the charge be debited to the general savings in the Forest Budget for 1915-16. Necessary provision will be made for the extra expenditure in the Budget for the ensuing year.

2. The proposal for revision of the existing charges and Ranges affects the richest timber tracts in the State. A perusal of the Annual Progress Reports of Forest Administration will show that we have not been able in any one year to actually fell the number of trees prescribed for felling in the Working Plants even as regards the well-known timbers, not to mention the extensive quantities of other kinds which under stricter supervision could have been taken out and utilized with advantage to the forests themselves and benefit to the State. The general trend of Forest policy everywhere has been to encourage direct extraction of forest produce by purchasers or consumers so that the Forest Staff may be able to devote more and more time for the protection and improvement of Forest property. This system was introduced into the State some years ago, and though it is yielding an increasingly encouraging result year by year, it is not popular to the extent it ought to, the reason being that the purchasers find themselves inconvenienced either on account of unpunctual or untimely marking of tress or on account of the delay in affixing sold stamps by the Range Officers to enable them to remove the timber. The unmanageable size of the Ranges more than any shortcomings on the part of the Range Officers, is mainly responsible for this undesirable state of affairs. It is also a matter of common knowledge in these timber tracts that an appreciable quantity of forest produce is being annually removed by stealth and the Range Officers and the District Forest Officers find themselves quite helpless to effectively check it owing to the extensive nature of their charges which renders close supervision a physical impossibility. Lastly, these forests are known to contain an abundant supply of hidden sandal roots. For want of efficient check and supervision, vast quantities of this valuable material worth lakhs of rupees are left to perish underground, the lower subordinates being generally loath to trouble themselves about it, knowing as they do full well, that their superiors are unable to afford the requisite time to carefully scrutinize and book them for bad work. I anticipate that the proposed revision of the existing charges and ranges would go a great way in preventing these leakages of revenue and easily bring in an additional revenue of Rs. 2,00,000 per annum as per particulars noted in the margin.

	Rs.
(1) Timber	1,25,000
(2) Sandalwood	50,000
(3) Firewood (4) Bamboos (5) Grazing, etc.	25,000
	2,00,000

3. There can be no sort of comparison between the forests of the Mysore and Shimoga Districts and those of the Kolar and Tumkur Districts. Whereas the former consist of the most valuable high and pole forests available in the State, the latter comprise for the most part of scrub jungle. The nature of treatment which these forests require are also not quite similar and it would be a mistake to suppose that because the maidan charges of Kolar and Tumkur are not as heavy as Mysore and Shimoga, the work of the Forest Officers are necessarily light. The maidan forests have from time immemorial being subjected to such ill usuage from the hands of the surrounding population that they have practically disappeared from the plains, leaving small remnants here and there, mostly on the hill tops and tracts inaccessible to man. At first, these forests were placed under the charge of a single Range Officer, but as the forests began to improve as a result of strict conservancy and reproductive measures, the establishment was gradually strengthened till they reached their present dimensions, and the forests themselves besides paying their way have been yielding a decent surplus to Government. But the work of the Forester is not yet over. He has now to turn his attention to the work of clothing vast stretches of country devoid of all tree-growth in the interests of climate and permanent well-being of the inhabitants. The work is an arduous one requiring the full time and engery of the Forest Officers and it would be extremely undesirable to saddle them with any extra work.

4. No separate staff is maintained for the work of sandal collection. Foresters and Beat Guards are charged with Forest work of all kinds within their respective charges and consequently the reduction of the collection work will not set free any portion of the Forest

No. R. 10414-25—Ft. 139-14-6, dated 11th May 1916.

staff. Moreover there is no appreciable reduction in the work of sandal collection, and if there is any at all, it is only temporary and not expected to last after the cessation of the war.

No. 1655, dated 7th August 1915, from M. G. Rama Rao, Esq., B.A., Conservator of Forests in Mysore, Bangalore, to V. R. Thyagaraja Iyer, Esq., M.A., Secretary to the Government of His Highness the Maharaja of Mysore, Revenue Department, Bangalore.

Referring to my letter No. 9926, dated the 30th March last, I have the honour to state that it must have been clear therefrom that we have by no means reached the end of our forest resources and that there is considerable scope for their further development by the adoption of up-to-date appliances of extraction, conversion and transport, by the adequate strengthening of the controlling staff and by the splitting up of the existing districts of Mysore and Shimoga and some of the Ranges therein into smaller controlling and executive charges. The war conditions prevailing at present which render it difficult to procure the necessary plant and materials might possibly dictate a cautious policy to be pursued in respect of the first two desiderata, but a beginning may be made, I think, in initiating the third in so far as it could be accomplished with the existing material at our disposal.

2. It may be stated at the outset that the maximum results have been long attained under the existing arrangements and no further improvement would be possible, unless there is a redistribution of charges so as to adapt the machinery to the modern conditions of progress. Some of the makeshifts introduced in recent years for lessening the burden of the District Officers such as the formation of sub-divisions and the gradual substitution of private agency of exploitation for Departmental Working have not contributed to the progress that might have been expected, the reason being that these responsibilities have not diminished thereby and that on account of the unwieldy size of their charges and the consequent difficulty of travelling, the District Forest Officers are quite unequal to the task of acquainting themselves intimately with the forests under their charges and the local conditions and requirements of the population. Intense and scientific working of the forests being essential conditions of further development of our resources, any scheme intended to reduce the work of the Controlling Officers which does not involve a reduction in the area of their charges is doomed to be a failure. In all Progressive Forest Administrations in British India, the principal of splitting up divisions into smaller charges to keep pace with the growing requirements of the Department is well recognised so that we frequently come across two or three divisions where one originally existed.

3. The necessity for the redistribution of the existing district charges of Mysore and Shimoga having been explained somewhat at length, the next question calling for consideration is, how best to officer them without involving any extra cost on Government, at any rate, so long as the war conditions last. There are at present three sub-division charges, one in Mysore and two in Shimoga and for reasons stated in the foregoing paragraph, they have not contributed to any progress. The Sub-division Officers who are the subordinates of the District Forest Officer, exercise no initiative and the range officers under them draw funds from and render accounts to the District Forest Officer, the Sub-Division Officers being mere intermediaries. These charges may be abolished as they serve no useful purpose and when this is done, all that would be necessary is to redistribute the existing staff. Excluding the officer in charge of Game Preserves and the Working Plan Officer there would be available four Deputy and six Assistant Conservators of Forests who may be put in district charges of which, there will be ten under the proposed arrangements.

4. Mysore and Sagar may be fixed as the headquarters of the two new divisions which will be named respectively the Mysore Southern Division (to distinguish it with Mysore proper which will be called the Mysore Western Division) and the Sagar Division. The Mysore Southern Division will consist of the Forest Ranges comprised in the Revenue taluks of Chamrajnagar, Seringapatam, Tirumakudlu Narsipur, Gundlupet and Nanjangud. While the Western Division will be made up of the taluks of Heggaddevankote, Hunsur, Yedatore, French Rocks, Mandya, Maddur, Malvalli and Nagamangala. The taluks of Sorab, Sagar, Shikarpur and Kallurkatte will go to form the new Sagar Division, the remaining taluks in the district being attached to the Shimoga Division.

It would be enough for the present to provide these District Forest Offices with the clerical and menial staff on the scale sanctioned for the maidan Districts such as Bangalore, absorbing those that would be available by the abolition of the sub-divisions. The extra cost involved would be Rs. 2,022 as per marginal particulars. The present Sub-Division Office at Sagar and the District Office or some other public offices in Mysore will accom-

Cost of establishment that would be available by the abolition of the Sub-Divisions:—

		Per annum Rs.
3 clerks on Rs. 25	...	75×12=900
3 peons on Rs. 8	...	24×12=288
3 peons on Rs. 7	...	21×12=252
Total	...	1,440

The clerical and menial staff attached to Bangalore District Forest Office.

modate the new divisional offices. The protective establishment required for the new division will be made available by redistribution of the availing staff.

5. Coming next to the Range charges, it is very essential to cut down their size as already proposed in my letter under reference and to form eleven new Ranges. It is hopeless to arrange for skillful or intense working under the existing conditions, much less would it be possible to exercise any effective supervision over the work of the subordinate establishment, or to train them in matters of vital importance to achieve any tangible results. At least, eight more Rangers are required to man the proposed new Ranges, the remaining three being found from among the Sub-Assistant Conservators or the Rangers in charge of light Ranges in the maidan which do not require the services of highly trained men. The extra cost that would devolve on Government by the creation of the new Ranges will be only Rs. 9,336 as per particulars noted in the margin. This is a very pressing matter calling for urgent consideration.

6 Rangers on	Rs 50 .	Rs 300
2 do on	Rs 60	Rs 120.
11 Range clerks on	Rs 20 .	Rs 220.
11 Range peons on	Rs 8 .	Rs 88.
Total per month .		Rs 728
Cost for one year would be	728 × 12	Rs 8,736

6. These reforms in the existing organization, it should be clearly understood, are intended merely to adapt the existing machinery to the conditions of progress as stated already, but should by no means, be regarded as obviating the necessity for strengthening the controlling staff which is indispensable for attaining any substantial material progress. If adopted in time, they may at least quicken the pace of progress. When normal conditions are restored in the affairs of Europe the longer question of strengthening the staff and importing the requisite plant and material may be taken up for consideration.

The proposed redistribution would cost in all, Rs. 10,758 per annum, but this extra expense would be more than compensated by increased revenue which may be roughly estimated at two lakhs by intensive working. Apart from their value as a source of revenue, the proper working of the forests for protective and reproductive purposes should not be overlooked. It is yet too early in the year to say whether there would be any savings in the current year's Budget, but should there be any, the extra cost would be met out of it, regular provision being made in the Budget for next year. I commend the proposals therefore for the favourable consideration and early orders of Government.

No. 9926 E. 1, dated 30th March 1915, from M. G. Rama Rao, Esq., B. A., Officiating Conservator of Forests in Mysore, Bangalore, to D. M Narasinga Rao, Esq., B.A., B.L., Officiating Secretary to the Government of His Highness the Maharaja of Mysore, General and Revenue Departments, Bangalore,

I have the honour to submit herewith for the information of Government, copy of my Demi-Official letter No. 8325, dated the 15th February last, addressed to the Dewan Sahib giving a brief resume of the financial benefit accruing to the State by the development of our forest property. As will be seen therefrom, it would be possible, with the growth and improvement of communications, to assure Government of about eight lakhs of rupees of extra revenue to the State. In order to achieve these results, it is also very essential that the departmental staff should be adequately strengthened. With the steady growth of State Forest areas, and consequent increase of responsibilities, the energies of the existing staff are taxed to the full in attending to the normal needs of the Department. The marginally noted figures will show how these responsibilities have increased in recent years. The Officers are already feeling handicapped in their efforts to prevent the leakage of revenue by exercising satisfactory supervision over the works within their respective charges. Their task would be rendered hopeless, if in addition, they are asked to undertake systematic operations on an extensive scale which the proposed development of the rich forests, specially of the Shimoga and Mysore Districts would involve. It would be no easy thing also to efficiently protect the forests and to maintain a steady supply of material. Any indifferent measures adopted in the work of regeneration, would render vast areas opened out by intensive felling, liable to be overrun with the lantana pest and rank growth of grasses to the detriment of the future well-being of the forests. These are very important considerations and any scheme of development which does not take them into account is bound to be a failure.

	1903-04	1913-14
Area of State Forests, sq. miles ...	2,094	2,750+656
Area of reserved lands, sq. miles ...	720	777+ 55
Area attempted to be fire protected acres . .	11,66,751	15,24,251
Revenue rupees	15,90,758	33,98,240

2. The existing district charges of Mysore and Shimoga are very extensive and it is very necessary to divide each into two for ensuring efficient supervision and control. Similarly, the marginally noted Range charges have to be restricted in area by dividing each into two for effective working. The present sub-division charges which are three in number, may be abolished as they serve no useful purpose, and the Sub-Division Officers put in charge of important timber Ranges in

(1) Tirthahalli. (2) Shimoga.
(3) Umblebyle. (4) Channagiri.
(5) Shikarpur. (6) Lakvally.
(7) Koppa. (8) Jagar Valley.
(9) Kakankote. (10) Begur.
(11) Gundlupet.

which extensive forest operations are undertaken. These changes would involve the appointment of two Gazetted Officers for the charge of the new districts, and eight Range Officers for the new Ranges exclusive of the three present Sub-Division Officers who will be put in charge of important Ranges. In addition to these, two more Gazetted Officers would be required, one for the exclusive charge of the virgin forests of the Shimoga Ghats where there is ample work to be done in the shape of carrying on the antiseptic treatment of sleepers and otherwise developing its resources and the other for organizing the supply of raw material for forest industries, such as paper pulp and charcoal preparation from the State and District Forests of the district. Thus, so far as we have been able to gauge our needs at present, our minimum requirement consists of four more Gazetted Officers and eight Rangers. Of the four officers, I would propose one of the rank of a Deputy Conservator of Gorests for the charge of the new district to be carved out of Shimoga, the remaining three holding the rank of Assistant Conservators of Forests.

3. As for recruiting these extra officers, I would propose, that capable officers now available in service, be put in charge of development operations as works are organized, replacing them in the work of general administration by freshmen trained in Dehra Dun or England. We have already two men under training at Dehra and it would be possible to train four more men here and one in England in the next two or three years, the time required for the development of communications on which the success of our scheme is so largely dependent. Of the seven men that would thus become available, three would be required to fill up vacancies caused by retirement in the Gazetted Grades in the next three years, the remaining four being available to replace the officers drafted on to the works of development.

4. Arrangements will be made to have the required number of Rangers trained at the Coimbatore Forest College. As regards deputing students to Dehra Dun and England, action will be taken on receipt of Government orders on the proposals made in this behalf in my letter No. 5885, dated the 8th December last. I have proposed in this communication for the training of one student every alternate year at Dehra Dun, but it would facilitate work, if in lieu of this, arrangements could be made with the Principal of the College for training one or even two men every year for the next two or three years.

5. If the general outlines of the scheme as set forth above meet with the approval of Government, steps will be taken to define the limits of the new district and Range changes and to fix the strength of the clerical and protective establishment necessary to start the works.

Development of the Resources of Ghaut Forests.

No. R. 10444-55—Ft. 32-15-2, dated 12th May 1916.

Government Order No. R. 7783-84—Ft. 51-14-10, dated 9th March 1915, passing orders on the report of Mr. G. Krishnamurthi Naidu on the potentialities of the Ghaut Forests in the Shimoga District, and directing among other things, that the Conservator of Forests should in consultation with the Director of Industries and Commerce, prepare a list of the items for investigation in connection with the development of the resources of the Ghaut Forests and to get it printed to facilitate the review of progress in the matter from time to time.

2. Letter No. 770, dated 19th July 1915, from the Conservator of Forests in Mysore, forwarding copies of correspondence between himself and the Director of Industries and Commerce in the matter and submitting for orders a list of items that may be taken up for investigation.

Order No. R. 10444-55—Ft. 32-15-2, dated 12th May 1916.

The list of subjects for investigation sent up by the Conservator of Forests is approved and a copy thereof appended to this order.

2. Government observe that the responsibility for carrying out the investigations devolves primarily on the Conservator of Forests who is requested to take needful action in the matter. The Director of Industries and Commerce, the Secretary, Economic Conference and the Revenue Commissioner are requested to render needful assistance to the Conservator in the matter in regard to subjects relating to their respective departments.

3. A report should be submitted at the end of six months by the Conservator showing progress made in the investigation. Provision may be made in the final forest budget of next year for any expenditure incidental to the investigations.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Read—

Letter No. 5674—B. & R. 1955, dated 22nd—28th January 1916, from the Comptroller to the Government of His Highness the Maharaja of Mysore, submitting his Report on the Resource Operations in the State during the year 1914-15.

I have the honour to submit my report on the Resource Operations in the State during the year 1914-15. This report deals as usual—

1. With Government balances—their disposition during the year, their sufficiency or otherwise as compared with actual requirements.
2. The movement of funds—how the funds not immediately required in any treasury was withdrawn and distributed to other treasuries which required additions to their balance to meet their demands.
3. The total absorption of coins in the State.

1. Government balances.

2. The balances of the Government of His Highness the Maharaja consist of the following:—

i. State Huzur or Reserve Treasury balance.
ii. District Treasury balance.
iii. Bank of Madras, Bangalore.
iv. Bank of Madras, Madras, and Messrs. Coutts & Co., London.

3. Since the year when the State Huzur Treasury ceased to have any dealings with the public and was converted only into a reserve treasury, its balance consists only of the :—

a. Surplus cash remitted to it from the district treasuries.
b. Cash received from the Hon'ble the Resident's Treasury, Bangalore, in payment of the dues to Government on account of the Jamakharch account with that treasury and the exchange account with the Accountant-General, Madras.
c. Drawings from the Bank of Madras, Bangalore, and
d. The stock of small silver and copper coins kept for distribution to the District treasuries according to their indents.

4. The District Treasury balances represent the amount of cash held by Government for meeting the demands of administration within the district. This balance is distributed over eight District Treasuries and 67 Taluk Treasuries. For each District Treasury, *i.e.*, including the Taluk Treasuries comprised in it, a minimum balance has been fixed which represents the lowest amount in cash that should be kept at that treasury at the beginning of each month to admit of the whole requirments of the treasury during the month being met without any assistance from outside the district. The minimum balance prescribed for all the District Treasuries varies from about 25 lakhs in September and October to about 40 lakhs in March, April and May of each year. The arrangement by which this minimum is maintained is that the surplus over the minimum in any treasury is transferred to the State Huzur Treasury, or another District Treasury whose cash balance is not sufficient to meet the demands on it and *vice versa*.

5. The balance at the Bank of Madras, Bangalore, represents the amount of surplus cash at headquarters which is kept in a current deposit account opened in that Bank in the name of the Dewan of Mysore. Whenever the balance of whole rupees and currency notes in the State Huzur Treasury becomes larger than current requirements, the surplus is transferred to the Bank. If any large sum is required for remittance to the District Treasuries such amount is withdrawn from the Bank. Besides these withdrawals there are other demands on the Bank balance, such as the value of cheques on the Bank and drafts obtained from it to arrange for payments outside the State. It will thus be seen that the balance at the Bank of Madras, Bangalore, with that in the State Huzur Treasury, represents the balance kept in reserve at headquarters.

No. Fl. 5731-40 - G. F. 179-15-2, dated 8th May 1916.

6. The Madras Bank, Madras, and Messrs Coutts & Co., London, conduct the work of the Government treasuries for the Mysore State in the Madras Presidency and overseas respectively. The receipts into the Madras Bank, Madras, consist of (i) interest on Government of India Securities lodged for safe custody in the Bank, and (ii) occasional small payments at Madras in favour of Government.

7. Messrs. Coutts & Co., London, receive on behalf of the Government of His Highness the Maharaja.

a. Royalty due by Gold Mining Companies on the quantity of gold extracted from gold mines within the State. This is payable in London in sterling within three months after the period to which the royalty relates.

b. The sterling value of the Government's bill in rupees for water supplied to the Gold Mining Companies in the Kolar Gold Fields from the Bethamangala Water Works.

c. Value of electric power supplied to the Kolar Gold Mines from the Cauvery Power Scheme.

The payments from these two Banks for the State is to firms outside the State in India and on the Continents of Europe, America and Australia. Messrs. Coutts & Co. also pay the pensions of European officers retired from the State service and the family remittances to Europe of officers in the State service who have been allowed the privilege of payments in countries with a gold currency at a special rate of 1 s.—6d. the rupee against payments in silver in the local treasuries.

8. Whenever the balance at the Bank of Madras, Madras, is in excess of the demands for payments from their bank the excess is transferred to the branch bank at Bangalore and *vice versa*. Messrs. Coutts & Co's. account generally shews a surplus which is remitted at the end of each month to Bangalore usually by means of Secretary of State's Council Bill on Madras or occasionally by drafts on exchange banks in India when council bills are not procured. When rarely, as in the year under report, the balance with the London bankers is exhausted, it is made good by telegraphic transfers from Madras. A sum of Rs. 5,55,000 was thus transferred in 1914-15, in connection with the heavy payments to be made in England for English stores purchased for the Mysore Railways.

9. The various balances enumerated above on the first of each month during the past year and the year previous are compared in the following table.

For the year 1913-14.

No.	Months	State Huzur Treasury and Madras Bank, Bangalore	District Treasury balance	Madras Bank Messrs. Coutts & Co.	Remittance in transit	Total

No. Fl. 5731-40—G. F. 179-15-2, dated 8th May 1916.

It will be seen from the above that during the year under report the cash balance at the beginning of each month was much below than at the beginning of each month in the previous year. This was due to the following reasons :—

(i) *Investment.*—In pursuance of the arrangements mentioned in para 3 of the last year's report for investing surplus cash balance, the following investments were made during the year:—(*a*) a sum of Rs. 15 lakhs was kept in fixed deposit at the Bank of Madras, Madras, for a period of one year at 4 per cent interest; (*b*) arrangements were made to invest through the Bank of Madras, Madras, a sum of Rs. 15 lakhs in the Government of India loan floated in July 1915, but the Bank succeeded in getting only Rs. 9 lakhs at an average rate of Rs. 95-12-0. A sum of Rs. 8,61,750 was therefore paid in the Bank on account of this investment; (*c*) a sum of Rs. 10 lakhs was proposed to be invested in the new Bombay and Calcutta Port Trust Debentures in July 1914, but the Bank succeeded in securing the debentures of the Bombay Port Trust Loan of 1914 for five lakhs.

(ii) *War Fund Subscriptions.*—A sum of Rs. 50 lakhs contributed by His Highness the Maharaja to the War Fund was paid in three instalments of Rs. 16, 16 and 18 lakhs respectively in October, November and December 1915.

(iii) *Imperial Indian Relief Fund Subscriptions.*—A sum of Rs. two lakhs subscribed by His Highness towards the fund was similarly paid in August 1914.

(iv) *Fall in Revenue.*—(1) The sandalwood revenue of the year fell to the extent of Rs. 17·48 lakhs as compared with the previous year's figure.

2. The Railway earnings also fell to the extent of Rs. 1·60 lakhs.

3. The Land Revenue Realisations for the year which had been estimated at Rs. 106·40 lakhs in the budget amounted only to 101·82 lakhs.

(v) *Savings Bank Withdrawals.*—Owing to the panic created by the war, the Savings Bank withdrawals were unprecedentedly heavy during the year. The amount deposited during the year was Rs 31,47 560 and that withdrawn Rs. 41,93,286 or 10,45,726 in excess of the deposits of the year. The total amount at the credit of Savings Bank deposits was Rs. 8,31,000 less than the balance at the close of the previous year. The excess of withdrawals over deposits occurred in all the districts such excess being largest in the Shimoga District, and next in the Mysore District. The run on the Banks was heaviest in October 1914 and abated gradually afterwards. As the period of this run synchronised with the deficit months of the financial year, it required great caution on the part of my office and taxed its energies to the utmost to keep sufficient balance in the treasuries to meet the run on Savings Banks and also to satisfy the demands for encashing currency notes

10. Thanks to the operations of the previous year which arranged for liquid reserves being available at the end of each month according to requirements and to the co-operation of the Mofussil treasuries which very promptly complied with all requisitions for transfer of funds, the operations proved successful in averting the panic which the situation of the money market following the outbreak of the war had brought about to some extent even to this State. The following were the measures taken by my office to combat the new situation referred to above :—

(*a*) Soon after the outbreak of the war the resource of the State were carefully reviewed with a view to see, if any, and if so, what steps were necessary to meet any possible strain on the finances in consequence of the serious situation of affairs in Europe. The review indicated that on the 1st August 1914, there were about :—

1. sixty lakhs of ready money in the treasuries and with the State Bankers almost all in specie;

2. fifty-six lakhs in short term deposits with Presidency Banks the withdrawals being so regulated according to the arrangements of the previous year that they fell due on the last day of each month during the deficit months so as to recoup the outgoings of the month and to meet the first instalment of the subsidy due in January 1915,

3. a fixed deposit of Rs. 35 lakhs in the Bank of Madras repayable in May 1915, and

4. that the amount of net expenditure from 1st August 1914 to 1st February 1915, the deficit months of the year, would be about 72 lakhs including the capital works programme.

11. The Treasury balance was then considered quite sufficient for the ordinary working of the treasuries and that the current account balance and the short term deposits at the banks would meet all demands during the deficit months including capital works outlay. It was also anticipated that, if circumstances should so develop as to require being in readiness for a run on the Savings Banks, it might be arranged with the Bank of Madras to withdraw from the current account 10 to 15 lakhs to strengthen the Treasury balances.

(*b*) It was accordingly arranged (i) to get information daily as to the cash position in Bangalore in the Bank of Madras and in the State Huzur Treasury, (ii) to draw in specie any sum required without giving the usual notice of a week's time, and (iii) to overdraw on the current account in the Bank of Madras, should it be necessary, to the extent of 10 lakhs till the end of March 1915.

(*c*) The situation was again reviewed in December 1914 when it was found that the financial transactions of the year according to the programme of the year might be conducted without any difficulty with the arrangements already made.

No. Fl. 5731-40 G. F. 179-15-2, dated 8th May 1916.

(*d*) Attempts were, however, made successfully to avoid the need for overdrawing on the current account in the Madras Bank. When such overdrawal was found absolutely necessary about the end of January 1915, the Bank of Mysore came forward with a deposit of 2½ lakhs to be kept in the Savings Bank on some special terms which were granted in view of the special circumstances of the season. The chief features of the arrangement were,

a. an officer on the part of the Bank to keep the sum in the Savings Bank till 28th February 1915,

b. amount not to be withdrawn till that date, and

c. interest to be allowed at Savings Bank rate from date of deposit.

These measures enabled Government to tide over the situation without any difficulty till the revenue began to pour into the treasuries and relieved further anxiety.

(*e*) With the same end in view, arrangements were also made with the Bank of Madras, Bangalore, to deposit the gold holdings of the State Huzur Treasury referred to above in the Bank of Madras against drawings in silver from the current account, the gold being earmarked for return to the State Huzur Treasury in the same form at any time they may be asked for.

Minimum Balance.

12. A comparative statement of the balances at the beginning of each month with the minimum prescribed contained in Statement A, shows that the balances in the treasuries were much above the minimum till the beginning of October 1914 and that till the end of January 1915 they were less than the minimum. On 1st February 1915 which is the period of lowest balance the cash balance was 26·94 against 25·97. The excess in the first three months of the year is explained by the fact that in view of the new situation due to the outbreak of the war, the treasury balances were kept strong by not drawing off as usual the surplus balance. The sudden decline from October 1914 to January 1915 was caused by the heavy Savings Bank withdrawals already referred to.

2 Movement of Funds.

13. Movement of funds forms the chief item of the Resource operations. It consists of transfer of funds made with a view to remove the surpluses available at District Treasuries to the headquarters and to meet the requirements of deficit treasuries. The object of these movements should be to conduct them as economically as possible. So far as the operations in Mysore are concerned they are chiefly within the State. The means by which this is done are,

(i.) Supply Bills, (ii) Currency note remittances, and (iii) Specie remittances.

14. It is only the first method that costs nothing to Government but on the other hand brings some income to the State in the shape of commission levied. Statement E shows the supply bill transactions of the year 1914-15. The transfer of funds effected by means of supply bills amounted to Rs 9,32,000, and this brought to the State a revenue of Rs. 667. The corresponding figures for the previous year were Rs 3,31,000 and Rs. 323. The transactions have thus trebled themselves and thus indicates the growing demand by the public to avail themselves of this mode of remittance which not only saves them the major part of the cost of transit but helps Government to move their funds in the required direction without any cost to themselves. The bulk of the demand for issue of bills was from the Bank of Mysore, the premier banking institution in the State on up-to-date banking methods. As much as nearly 7 lakhs were transferred on behalf of this institution from Bangalore to finance coffee in the districts of Hassan and Kadur, areca in the district of Shimoga, and cotton and copra in Chitaldurg and Tumkur respectively. There was some remittance from Mysore to Bangalore and Hassan to Bangalore also. Statements B and C indicate the specie and currency note remittances effected during the year. A key to the direction in which these remittances move is afforded by the following classification of the treasuries in Mysore. Kolar is the largest surplus treasury and never requires any inward remittance except its annual indent of small coins, Kadur is the next surplus treasury but as its receipts are largely in currency notes it requires in exchange for a part of its outward remittances, specie remittance from headquarters. Tumkur, Shimoga, Chitaldrug and Hassan are surplus in the Revenue season as well as in the other seasons but require occasional assistance from outside during the non-collection season.

15. The surplus is generally drawn to headquarters as far as possible by means of remittances in currency notes. Such remittances aggregated 38·61 lakhs. Kadur contributed largest for this (16·56) as its receipts are generally in currency notes sent by the planters in that district. For about a third of this remittance specie was sent to this district in exchange. Next in order came Shimoga (9·70), (3·61), Hassan (3·57) Kolar (3·41) and Tumkur (1·64). All these remittances were solely with a view to remove the surplus of the treasuries to the headquarters. Attempts were made to send all outward remittances from moffussil treasuries as far as possible in currency notes. The remittances of currency notes to District Treasuries amounted only to 25·17 and was mainly distributed almost equally between the two large deficit treasuries of Bangalore and Mysore 12·17 and 12·41 which were supplied with both specie and currency notes.

16. But for the fact that the deficit treasuries of Bangalore and Mysore and the currency note exporting treasury of Kadur absorbed a very large portion of the balance at headquarters, the specie remittances may also be regarded as mainly outward (Statement B shows that). Kolar is always the largest exporter of specie and its outward specie remittance aggregated 14·59 out of a total of 41·86 of such remittances; next in order were Tumkur (8·93) Chitaldrug (8·25), Hassan (4·32) and Shimoga 3·00. The inward remittances to district treasuries aggregated 65·75 and this was mainly distributed as stated above among Bangalore (31·47), Mysore (24·43) and Kadur (6·44). The remaining

portion of the inward remittances is accounted for by small coin supplies to some of the treasuries and some casual rupee remittances to Shimoga and Hassan to meet emergent demands for which their cash reserves were insufficient during certain parts of the year.

17. As already indicated above in dealing with Government balances, besides the remittances within the district there were during the year many transfers from outside the State and *vice versa*. These transactions may be summarised as under: —

(1) Transfers from Madras to Bangalore and *vice versa* through the Bank of Madras, Madras, and its branch in Bangalore. The inward remittance aggregated 16·92 lakhs and the outward 24·58 lakhs. The latter were mainly to recoup the balance at the head office after meeting payments ordered from the balance there.

(2) Transfers from London to Bangalore *vice versa*. The inward remittances amounted to 9·2 lakhs and the outward to 5·55 lakhs. The outward remittance was special to this year and was made to meet the usually heavy payments made in England in connection with the State Railway Stores.

(3) Transfers from Bombay to Madras. A sum of Rs. 30,90,000 which was deposited in fixed deposit in the Bank of Bombay matured for repayment partly in December 1914 and partly in January 1915, of which a sum of Rs. 17½ lakhs was paid at Bombay towards the first instalment of the subsidy and the balance of 13·40 lakhs transferred to Bangalore through the Bank of Madras, Madras.

3. Absorption of small coins.

18. The total amount of small coins absorbed during the year was 1·14 lakhs against 1·22 lakhs in the previous year. The absorption in the Mysore District alone amounts to 1·23 lakhs owing to large Public Works carried on in that district. Kadur came next with an absorption of thirty-six thousand on account of its planting industry. In other districts there was a *net* return of coins to the extent of ·45 lakhs and this reduced the total absorption to 1·14 lakhs. Bangalore contributed largest to this return (44) and Tumkur next (34). Statement D appended gives the details of coins absorbed which are summarised below:—

		1914-15	1913-14

No. Fl. 5731-40—G. F. 179-15-2, dated 8th May 1916.

Order No. Fl. 5731-40—G. F. 179-15-2, dated 8th May 1916.

Recorded.

2. The Resource Operations during the year were of a specially complicated character owing to the outbreak of the war and the consequent fall in revenue, the payment of 52 lakhs on account of war funds and heavy withdrawals from Savings Banks.

3. The balances in Treasuries were lower than in the corresponding periods of previous years, but they were kept in funds by constant judicious readjustments. The operations were conducted with circumspection and skill and reflect credit on the Comptroller.

4. The total amount of supply bills issued was 9,32,000 against 3,31,000 in the preceding year.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Order No. Fl. 6070-119—G. F. 213-15-1, dated 30th May 1916.

The members of the Representative Assembly have for a long time been requesting that they may be given an opportunity for discussing the State budget in the Assembly. Certain practical difficulties hitherto prevented their prayer being sanctioned. It was His Highness the Maharaja's pleasure, as announced at the last session of the Assembly, that the elected Representatives of the people should become more closely acquainted with the objects and plans of Government by a discussion of the budget. The members of the Assembly were accordingly invited to offer remarks and suggestions on the current year's budget according to certain tentative rules laid down for discussion.

2. Suggestions were also invited from the members of the Assembly as regards the procedure to be adopted in discussing future budgets. As the Assembly meets only two or three months after the beginning of the financial year, the question for consideration was whether final orders sanctioning the budget should be deferred till the Assembly met or whether their suggestions should be reserved for adoption when preparing the succeeding year's budget. The suggestion of some of the members that a separate meeting of the Assembly may be held for the purpose of discussing the budget before its final acceptance by Government, does not commend itself to Government, because it is feared that such a session will interfere with ordinary Government work.

3. The discussion of a budget already passed by Government, though less satisfactory than discussion in an earlier stage, is not altogether without advantage. Any small alterations suggested, when accepted by Government, can be easily introduced into the current budget by revision, while any suggestions for larger alterations can always be taken into consideration while framing the budget for the next succeeding year.

4. Government are therefore pleased to prescribe the rules appended hereto to regulate the procedure for discussing the budget in future at the meetings of the Representative Assembly.

5. For the information of members who may not know English, the budget will hereafter be issued in Kannada also. For this purpose a condensed budget containing figures under minor heads and summaries of details under the principal minor heads with an explanatory memorandum will be published and copies sent to all Dasara Representative Assembly members.

J. S. CHAKRAVARTI,
Financial Secy. to Govt.

To—The Comptroller to the Government of Mysore.
The other Heads of Departments.
The Deputy Commissioners of Districts, for communication to Dasara Representative Assembly members.

No. Fl. 6070-119—G. F. 213-15-1, dated 30th May 1916.

Rules to regulate the procedure for the discussion of the State budget in the Representative Assembly.

1. Questions on the budget may be proposed by members and sent up with the original list of subjects or with the supplementary list. Their number in either case need not be limited and they will not be treated as forming part of the subjects for which a maximum limit is imposed.

2. These questions will be separately entered in the list of subjects after the Financial section and some time set apart for their consideration.

3. Government reserve the power of rejecting any question or questions without assigning reasons.

4. In addition, a general discussion of the budget may also be allowed by the Dewan-President subject to the usual restrictions relating to discussions in the Assembly.

5. Useful suggestions will be noted for consideration while framing the succeeding year's budget.

6. No discussion shall be permitted in regard to items of receipt or expenditure relating to any subject removed from the cognizance of the Mysore Legislative Council by the proviso to Section 12 (*a*) of the Mysore Legislative Council Regulation, 1907.

7. The procedure prescribed above will for the present be tentative and liable to revision at the end of one year.

GENERAL AND REVENUE DEPARTMENTS.

Order No. J. 4253-300—Legis. 6-12-57, dated 2nd May 1916.

At present all applications for the free supply of Government publications to subordinate offices have, under Appendix (BBBB) (*d*) of the Civil Account Code, Vol. I, to be sanctioned by Government however trivial their value. To save time and correspondence Government consider it desirable to delegate to Heads of Departments the power of ordering the free supply to subordinate offices under their control, of Government publications, other than specially valuable ones relating to their departments.

2. Government are accordingly pleased to direct that the following rules be observed under Appendix (BBBB) (*d*) of the Civil Account Code, Vol. I:—

(*a*) In the case of any Government publication, other than specially valuable ones to be specified by Government from time to time, required for public use, the Heads of Departments to which the publication relates may order the free supply thereof.

(*b*) When the publication does not relate to the department requiring it, a requisition shall be made to the Head of the Department to which it relates who may thereupon order the free supply of such publication.

(*c*) In the case of specially valuable publications the application should be addressed to Government in the department concerned.

3. A list of all specially valuable publications already published will be compiled and issued later on, and will include, as a rule, all publications of which the authorised price of sale is five rupees or upwards.

4. Half-yearly supplements will be issued showing any such publications newly published during the half-year, and any alterations to be made in the first list.

GENERAL AND REVENUE DEPARTMENTS.

Read—

Subject No. 29 of the Proceedings of the Representative Assembly of 1912 and the reply of Government thereto regarding the introduction into the State of the system of trial by Jury in Sessions cases.

2. Correspondence ending with letter No. 511-42, dated 1st August 1914, from the Registrar Chief Court, furnishing the opinions of the Sessions Judges and the District Magistrates together with those of the Judges of the Chief Court in the matter.

Order No. J. 4556—Cts. 22-13-5, dated 17th May 1916.

The system of trial by Jury was introduced tentatively in 1886 with respect to certain specified offences coming up from the Nandidroog Division for trial before the Chief Court sitting as a Sessions Court. When a separate District and Sessions Court was established at Bangalore in 1890, the continuance of this practice was authorized but the number of offences to which it was applicable was restricted. On the abolition of this Court in 1898, its original jurisdiction came again under the Chief Court and the procedure introduced in 1886 was resumed. In 1903 a District and Sessions Court was re-established at Bangalore but the practice of trial by Jury by the Sessions Court was not revived.

2. The subject was mooted in the Representative Assembly in 1907 and 1912 and on the latter occasion a definite hope was held out that the system of trial by Jury would be tried at Bangalore, Mysore and Shimoga.

3. As an important measure materially affecting the procedure in Sessions trials, the opinions of the Sessions Judges and the District Magistrates have also been obtained as to the desirability of introducing the system, a majority of whom consider that the system may be tried at least in Bangalore and Mysore.

4. This system of trial of criminal cases by Jury has been in vogue in British India in some form or other for a long time. The Jury Commission appointed by the Government of India to consider this question did not recommend the total abolition of the system. With proper safeguards the scheme is expected to work satisfactorily.

5. Government are therefore pleased to direct that the scheme of trial by Jury be introduced in Bangalore and Mysore for the present as a tentative measure for two years.

6. The Chief Court is requested to favour Government with detailed rules for bringing the scheme into operation, including the draft of a notification to be issued by Government under Section 269 of the Code of Criminal Procedure. The date from which the scheme may conveniently be brought into force may also be intimated.

Exd.—C. R.

No. J. 4480-88—Pol. 166-15-2, dated 15th May 1916.

Annexure.

Letter No. 4531—583, dated 24—25th February 1916, from the Inspector-General of Police in Mysore, to the Secretary to the Government of His Highness the Maharaja of Mysore, General Department.

I beg to the honor to submit the following report on the working of the Mysore Game and Fish Preservation Regulation and the Rules framed thereunder for the calendar year 1915, together with the original reports received from the several District Magistrates.

2. Two hundred and eighty-eight licenses were issued, under the Regulation during the year, against 294 in the year 1914 with a small decrease of six licenses.

3. Of the 288 licenses, 236 were District game licenses, 21 District game licenses including State Forests, 6 Provincial licenses and 25 Agricultural licenses. 135 of these were taken out by Europeans or Eurasians and 153 by Indians. The amount of license fees recovered during the year was Rs. 1,695 against Rs. 2,148 in the preceding year.

4. The following statement shows the Districtwar details of licenses issued and the fees collected:—

District	1914						1915					
	District licenses	District licenses including State Forests	Provincial licenses	Agricultural licenses	Total	Amount of license fees	District licenses	District licenses including State Forests	Provincial licenses	Agricultural licenses	Total	Amount of license fees
					Rs.	Rs					Rs	Rs.
Bangalore	43	8	14	...	60	610	33	..	5	...	38	290
Kolar	12	...	...	...	12	60	55	..	..	...	55	275
Tumkur	9	...	...	...	9	45	11	..	..		11	55
Mysore	30	13	...	1	50	137	32	15		1	48	387
Hassan	30	3	...	1	34	197	27	1		4	32	158
Shimoga	19	9	..	5	33	240	18	5	..	4	27	173
Kadur	63	5	4	17	89	521	52	...	1	16	69	317
Chitaldrug	7	...	...	...	7	35	8	..		..	8	40
Total ...	213	39	18	24	294	2,148	236	21	6	25	289	1,695

It may be seen from the above statement that there was an appreciable fall in the issue of District licenses including State Forests and also in Provincial licenses. This has mainly contributed to the fall in the amount of fees collected.

5. Six cases involving six persons were prosecuted for violation of the provisions of the Regulation and the Rules framed thereunder, of which five cases with as many persons ended in conviction and the remaining person concerned in one case who was un lertrial at the close of the year has also since been convicted. The total amount of fines realized during the year was Rs. 85 8-0.

6. The one case with four persons that was pending in the Shimoga District at the close of the year 1914, ended in acquittal during the year under review.

GENERAL AND REVENUE DEPARTMENTS.

READ—

The District Fund Administration Reports and Accounts for the year 1914-15.

Order No. 8501-15—L. B. 31-15-36, dated 19th May 1916.

The reports have been drawn up in the revised form prescribed in Government Order No. 8850-62—L. B. 234-12-2, dated 12th May 1915. Almost all the reports were received from the districts in time but the final accounts of the Comptroller which were due at the end of December 1915 were received only in the second week of February 1916. The Comptroller is requested to make better arrangements for the submission of the accounts punctually on the prescribed date.

2. *Development of Local Self-Government.*—Considerable attention was paid during the year to the question of improving the organisation and finances of local bodies. Two Committees consisting of selected officers of Government and non-official gentlemen investigated the scheme of Local Self-Government in the State. One of them presided over by Mr. M. Kantharaj Urs, C. S. I., Second Member of Council, dealt with the constitution and functions of the local bodies and the other presided over by Dewan Bahadur C. Srinivasaiengar, retired State Councillor, dealt with their financial resources. Another unique feature of the year under review was the holding of a Local Boards and Municipal Conference at Mysore on the 28th, 29th, and 30th June and 1st July 1915. The District Boards and the Kolar Gold Fields Sanitary Board returned twenty-four delegates to this Conference. The Conference was wholly non-official in its constitution. It considered and for the most part ratified the recommendations of the above mentioned Committees besides discussing various other new questions of great importance. The recommendations of the Committees and of the Conference were considered by Government and a few broad lines on which reform will be effected were announced by the Dewan in para 79 of his Address to the Dasara Representative Assembly of 1915 with a view to elicit public opinion. The entire question is receiving the consideration of the Government.

3. *Regulation, Rules, etc.*—The Kolar Gold Fields Sanitary Board continued to be governed by the Mysore Mines Regulation and the Rules thereunder, while the other local bodies were governed by the Local Boards Regulation and Rules. The Local Boards Regulation was amended during the year by Regulation No. III of 1915 whereby power was conferred on Local Boards to impose a tax on shops in Unions. The rules under the Local Boards Regulation were revised in consequence of the changes in account procedure due to the introduction of the local audit. This opportunity was also utilised to make the following further changes:—

(1) The delegation to the Deputy Commissioners of the power to appoint non-official members of Union Panchayets.

(2) Permitting every Municipal Council in a taluk to return a member to the Taluk Board, and

(3) The appointment of the Civil officer of the Bangalore District as Vice-President of the District Board of Bangalore in the place of the District Treasury Officer.

The Bangalore District Board framed bye-laws for the regulation and licensing of tanneries and they have since been approved by Government.

4. *Constitution and working of Local Boards.*—Besides the Kolar Gold Fields Sanitary Board there were as in the previous year 8 District Boards and 77 Taluk Boards. The number of Union Panchayets rose from 251 to 255, six new

Panchayets having been constituted and two existing ones discstablished in the Mysore District during the year. The average attendance of members at the meetings remained practically the same as in the previous year, the percentage to the total strength being seventy-six, fifty-two and sixty-seven at the meetings of the District Boards, the Taluk Boards and the Union Panchayets respectively. The average attendance of official members at the meetings of the Taluk Boards was not quite satisfactory and was particularly bad in the case of the Taluk Boards of Tumkur, Kunigal, Nanjangud, French Rocks, Alur, Kunsi, Narasimharajapura, Davangere and Harihar. The Co-operation of officials in the work of Local Boards is highly necessary. The Government hope that the attendance of officials will show improvement in future.

5. *Finance Committees.*—In none of the districts did these Committees meet the prescribed number of times to check the accounts as required by Rules 136 and 137 of the Rules under the Local Boards Regulation. The results of the Committee's work in the Bangalore and Mysore Districts were mostly unsatisfactory. It is surprising to note that in the Bangalore District the Committee is reported to have met only once and that only one official member attended this single meeting. A perusal of the notes of the examination of the District Fund Accounts by the Local Audit Staff of the Comptroller's office indicates that the examination made by the Finance Committees was probably of a very superficial character in the majority of cases. The importance of a thorough and detailed examination of the transactions and accounts of the District Boards every month by the Finance Committees in the interests of the individual members themselves cannot be too greatly emphasised in view of their liability under Section 36 of the Local Boards Regulation for any loss, waste or misapplication of District Funds or property occasioned by their neglect. The Presidents of the District Boards are therefore requested to place this matter preminently before the District Boards for their consideration and to see that more satisfactory measures are taken for the regular and prompt scrutiny of accounts and transactions by the Finance Committees.

6. *Audit of Accounts.*—The accounts for the year 1913-14 were audited by the Local Audit Staff of the Comptroller's office and did not disclose any grave irregularities. Copies of audit notes were supplied to each of the local bodies concerned. There was considerable delay in the disposal of these audit notes and objection statements and also in forwarding the monthly accounts to the Comptroller. Government hope that the instructions given in their Order No. 3923-44—G. R. 11-14-11, dated 23rd October 1914, and the recent amendment of Rule 141 of the Local Boards Rules will tend to minimise such delays in future.

7. *Financial Condition.*—The income and expenditure during the year contrast with those of the previous year as shown in the following statement :—

Items	1914-15	1913-14
I. Receipts—	Rs.	Rs.
1. Allotment from local cess	5,60,678	5,49,059
2. Railway cess	47,661	... ...
3. House tax and mohatarfa	1,12,337	1,24,060

11. Other items	41,641	44,422
Total ...	12,60,680	11,76,837

The increase under receipts was chiefly due to:—

(1) The loan raised for the construction of a Railway in the Shimoga District.

(2) The contributions for the construction of drinking water wells and the special repairs of roads within a radius of 15 and 10 miles round the Bangalore and Mysore Cities, respectively, and

(3) The levy from 1st July 1914, of a railway cess at 6 pies in the rupee on items contributing to the ordinary local cess, in the Kolar District.

There was a substantial increase in the amount of local cess collected in the Mysore District, while the income from the house tax decreased to some extent in the Chitaldrug, Bangalore, Mysore and Shimoga Districts. The realisations from market fees in the Hassan District were slightly better on account of the levy of fees newly at 12 weekly santes during the year. The apparent increase under expenditure was due to the special repairs carried out to roads round the Bangalore and Mysore Cities, from grants from the State Funds and the Local Funds General. The large excess of expenditure over the income in the Kolar District was due to overdrawals on account of the construction of the Railway from Kolar to Chikballapur.

8. *Defects in Accounts.*—The collections made by the Kolar District Board in connection with the 2nd debenture loan do not appear in the accounts and no interest has been charged on the minus balance outstanding against the Board. Adjustments in respect of the contributions due from the Local Funds General and the State Funds on account of the outlay incurred on the special repairs of roads round Bangalore and Mysore Cities have not been effected in full in the accounts and the adjustment of credits on this score has not been made after a correct calculation of the amounts due from each of the Funds.

9. *Local Fund General.*— The receipts and expenditure under Local Funds General amounted to Rs. 2,22,471 and Rs. 1,95,239 against Rs. 2,38,531 and Rs. 1,70,655, respectively, in the previous year. The principal source of income was as usual the contribution of the 67 per cent of the local cess on Abkari and miscellaneous items of revenue. The major portion of the expenditure was on public works and contribution to Dasara Exhibition charges and Industrial schools charges. The Local Fund General had a balance of Rs. 3,52,002 at the end of the year.

10. *Working of Union Panchayets.*—The number of Union Panchayets that met the prescribed number of times decreased from 105 to 78 and 14 Panchayats did not hold even a single meeting during the year. There was however appreciable improvement in the utilization of the Union Funds during the year, the percentage of income spent within Union limits being 69 against 51 in the previous year. The measures necessary for infusing greater life into Union Administration are under consideration in connection with the Local Self-Government Scheme.

No. 8501-15—L. B. 31-15-36, DATED 19TH MAY 1916.

11. *Demand, Collection and Balance.*—As the local cess is collected by the Revenue Department along with the Land Revenue and credited to the District Funds, the main item requiring the attention of the collection staff employed by the Local Boards is the house tax in Unions, which falls due in two equal half-yearly instalments in July and January every year. Out of the current demand of Rs. 1,18,795 on this account about 33 per cent was left uncollected, while out of the arrears that exsisted on the 1st July 1914 only about 28 per cent was collected during the year. The arrears were heavy in all the districts except Tumkur. The arrears in the Hassan District under tolls and ferries and in the Shimoga District under ferries were also heavy. The accumulation of arrears leads to the ultimate writing off of large amounts which could have been recovered if prompt steps had been taken for their collection and the presence of large arrears on the books affords wide scope for misappropriation by the collecting agency and also leads to irregularities of other kinds. The Presidents and Chairmen should therefore deal promptly with all cases of arrears, which at present encumber the accounts, by taking special measures, if necessary, with the approval of their Boards.

12. *Public Works.*—The outlay incurred from the District Funds in the State Public Works Department was mainly on the repairs of the District Fund roads, while that in the Civil Department was as usual for the provision of the water-supply facilities, the repair of roads of minor importance and sanitary works in Unions. One-fourth of the total expenditure on works in the Civil Department was incurred within Union limits. The total length of District Fund roads repaired by the Public Works Department was 3,522 miles of which 1,605 were metalled ones. The Mysore-Talkad-Sivasamudram road was retransferred to the Public Works Department for upkeep during the year. Two hundred and seventeen new wells were sunk during the year at a cost of Rs. 31,632 and 131 old ones repaired or improved at an aggregate cost of Rs. 11,062. In eighty-five villages drains were constructed and existing ones repaired at a total cost of Rs. 14,164.

13. *Lapses under Public Works executed by the Civil Department.*—Fifty-two per cent of the allotment for public works to be executed by the Civil Department lapsed during the year. The lapse was the least in Kolar (13 per cent) and the highest in Hassan (73 per cent). Lax supervision by Amildars, late submission of bills for work done, meeting hard and rocky soil while sinking wells and the consequent necessity to revise the estimates or to abondon works, paucity of competent contractors and scarcity of labour and inadequacy of sanctioned rates are the principal reasons assigned for the occurrence of these lapses. Government note that almost all these are remediable or capable of speedy solution and hope that the non-official members and the officers will exert themselves to bring about better results in future years. Government trust also that the instructions issued in their Order No. 9231-52—L. B. 249-14-1, dated 22nd May 1915, will tend to minimise lapses and to ensure better execution of works.

14. *Rural Water-supply.*—With a view to provide facilities for drinking water in every village in the State a comprehensive programme has been sanctioned and Government have promised a special grant of 1 lakh of rupees per annum for three years commencing from 1914-15 for this purpose. An additional grant of half a lakh of rupees has also been made available from the Village Improvement grant and the District Boards have been requested to contribute a similar amount. All these contributions together with the grants, if any, from the villagers concerned have been constituted into a separate fund under the control of the Deputy Comissioners known as the Drinking Water Wells Fund. Well works are ordinarily sanctioned only if the villagers concerned contribute one-half of the cost in the shape of labour or money; but the Deputy Commissioners have been allowed to waive the contribution in specially hard cases. As this scheme was sanctioned rather late in the year and the necessary preliminary arrangement took time, the progress was not appreciable and only Rs. 8,126 were spent during the year. It is hoped that better progress will be shown in the current year.

15. *Vital Statistics.*—The number of births and deaths registered during the year was 98,522, and 82,308 against 99,768 and 90,866, respectively, in the previous year. Cholera and small-pox were less prevalent than in the previous year. There was marked decrease in the mortality registered in the Tumkur and Chitaldrug Districts.

16. *Medical Relief.*—The District Funds contributed towards the maintenance of the Maternity Hospitals at Mysore and Kolar Gold Fields, 117 Local Fund Dispensaries, 32 Ayurvedic and Unani Dispensaries and the employment of 100 midwives during the year. The Female Dispensary at Champion Reefs was closed on the 7th October 1914, on the opening of the New Maternity Hospital but it was re-opened on the 4th March 1915, on the Sanitary Board agreeing to meet the charges thereof. New Local Fund Dispensaries were established at Bidare in the Kadur District and Humchadakatte in the Shimoga District. A Vaidyasala was newly established at Hosakere in the Gubbi Taluk. The Local Fund Dispensary at Chelur and the Vaidyasalas at Augumbi and Rayalpad were transferred to Pathapalya, Chinikatte and Manchaneelkote, respectively. The Redfern Memorial Hospital at Hassan continued to receive a grant of Rs. 200 a year from the Hassan District Funds.

17. *Vaccination.*—There was a general decrease in the number of vaccinations performed in all the districts, except Mysore and the Kolar Gold Fields. Belated supply of vaccine lymph in February and March 1915, the absence of vaccinators on leave in the Tumkur District, the failure to fill up vacancies in the Hassan District till very late in the year and the difficulty felt by the temporary vaccinators in gaining the confidence of the villagers in the Bangalore District are some of the reasons adduced for the decrease in the number of vaccinations performed. Government are not satisfied that these explanations are satisfactory. The Sanitary Commissioner's attention is invited to the inadequate work of the Vaccination staff and he is requested to issue definite instructions to ensure improvement.

18. *Conservancy and Sanitation.*—A sum of Rs. 1,11,557 was spent under this head of which Rs. 97,635 were on establishments, Rs. 947 were spent on sanitation during jatras and Rs. 6,890 on the prevention of epidemics. Seventy-four Sanitary and Assistant Sanitary Inspectors were employed for the supervision of sanitation in rural parts and separate places were set apart for storing manure in 537 villages. In 40 villages, besides the Unions, separate establishments were maintained at a cost of Rs. 2,794 to clean the streets. The Village Improvement Committees and Malnad Improvement Committees have been doing a good deal of work in improving the sanitary condition of the villages by way of clearance of lantana, etc., within their spheres of activity. To facilitate the operations of the Malnad Improvement Committees, the Village Sanitation Rules have been ordered to be introduced into all the villages coming within their operation, irrespective of the number of houses therein, and to safeguard the health of populous towns and important railway stations; a similar relaxation of rules was permitted in the cases of villages in close proximity to such towns and stations. (*Vide* G. O. Nos. 4091-6—Med. 24-13-134, dated 20th November 1914 and 3828-37—Ml. 394-13-2, dated 12th November 1914.)

19. *Prosecutions under Sanitation Laws.*—On the Kolar Gold Fields, 78 persons were convicted for breach of sanitary rules, while in the rural parts under the control of the District Boards out of 616 persons prosecuted for the breach of rules under the Village Sanitation Regulation, 340 were convicted and fines amounting to Rs. 547 recovered and credited to the District Funds. The number of applications for licenses to build houses which were pending at the end of the year was very heavy in the Taluks of Kolar, Dodballapur, Sidlaghatta, Mulbagal, Arkalgud and Arsikere. Prompt action should be taken to dispose of these cases.

20. *Accommodation for Travellers.*—One hundred and thirty-six 3rd class travellers bungalows and 235 musafirkhanas and other buildings were maintained at a cost Rs. 26,534 from the District Funds during the year. At Kondaji in the Hassan District, a rest house was constructed by Mr. Appannaiengar at a cost of Rs. 2,000 and placed at the disposal of the District Board for the use of the travelling public. The travellers bungalow at Muthodi was retransferred to the charge of the Forest Department and the musafirkhana at Lakkavalli was placed at the disposal of the Malnad Improvement Committee for locating a dispensary. The building known as the Revenue Lodge at Marikanve was converted into a musafirkhana and handed over to the Chitaldrug District Board for maintenance. In connection with the improvement of hill stations in the State, the Mysore District

No. 8501-15—L. B. 31-15-36, DATED 19TH MAY 1916.

Board agreed to contribute to Government a moiety of the cost of construction of a musafirkhana on the Chamundi Hills.

21. *Cattle Shows and Exhibitions.*—In addition to the usual cattle shows held at the several places under the auspices of the District Boards, five new shows organised purely by private enterprise were held at the marginally noted places. At Hoskoppa in the Kadur District a non-official member organised an exhibition of Malnad products and at Bowringpet an Industrial and Agricultural Exhibition was held in connection with the show above referred to.

1. Bowringpet.
2. Chickarsinakere (Malvalli Taluk).
3. Kotebetta (Nagamangala Taluk).
4. Bhimanahalli (Heggadevankote Taluk).
5. Karighatta (Seringapatam Taluk).

22. *Tolls.*—The toll-gate at Siddapur on the Somwarpet-Konanur road was abolished from 1st July 1914 and new toll-gates were established on the Hangal-Rayadurga road and the Bababudan Hill road. The total number of local fund toll-gates at the end of the year was 22 and the revenue therefrom was Rs. 45,553 or 5 per cent of the total receipts of the District Boards under revenue heads excluding extraordinary items.

23. *Cattle Pounds.*—From the statistics furnished, it is seen that in the case of 486 out of 971, *i.e.*, one-half the number of pounds, the income from fines was less than Rs. 20 for the entire year and that in 31 pounds no animals were impounded during the year. The highest income from fines is reported from the pound at Basapur, Bangalore Taluk (Rs. 658) and the next from the one at Robertsonpet (Rs. 536). In the four marginally noted cattle pounds, an income of only four annas is reported.

Motaganahalli, Magadi Taluk.
Nayanahalli, Chikballapur. Taluk.
Issur, Shikarpur Taluk.
Tatur, Sorab Taluk.

The number of cattle pounds in each district also varies largely, ranging from 70 in the Bangalore District to 247 in the Kolar District. One hundred and seventy-two of the pounds in the last named district had an income less than Rs. 20, and ten did not work.

There is thus considerable reason to believe that pounds have in the past, been opened without sufficient consideration as to their necessity.

From some instances recently brought to their notice, Government have reason to believe also that the low income of some pounds may be due to the absence of sufficient check over the staff in charge of the pounds. Government hope that this matter also will receive due consideration from the Local Boards and the Revenue Officers.

24. *Railways.*—During the year the Government undertook to become a joint and equal partner with the Kolar District Board in the Railway line from Bowringpet to Chikballapur. To meet the cost of the extension of the line from Kolar to Chikballapur the District Board were authorised to raise a further debenture loan of Rs. 4 lakhs. But the money market being unfavourable the Board succeeded in raising only a sum of Rs. 51,799, on account of this loan and they have found themselves unable to sell, at a reasonable rate of discount, the Government of India securities in which the original loan is invested. Government have in view of the necessity for the very early completion of this railway, agreed to make temporary advances and allow overdrawals for meeting the District Board share of the cost of constructing the line, the District Board being required to pay interest at 4 per cent on the temporary advances and on the minus balances outstanding in their accounts.

To open up the Malnad portion of the Shimoga District by the construction of a railway line, the Shimoga District Board undertook to raise a loan of Rs. 10 lakhs under the usual Government guarantee. Shares to the extent of Rs. 5,82,000 were subscribed for, and Rs. 2,36,423 actually collected before the end of the year.

25. *General.*—The thanks of Government are due to the several members of the local bodies who have co-operated in successfully administering the District

No. 8501-15—L. R. 31-15-36, DATED 19TH MAY 1916

Funds during the year. Government trust that the members will be prepared to show more initiative and assume greater responsibilities in future.

Review of Municipal Administration Reports for the year 1914-15.

No. 8482-98—Ml. 73-15-37, dated 19th May 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Read—

The Administration Reports and Accounts of the Municipalities for the year 1914-15.

Order No. 8482-98—Ml. 73-15-37, dated 19th May 1916.

All the reports, except that of the Bangalore City Municipal Council, were received by the 1st October 1915, the prescribed date. There was a delay of over five and eight weeks respectively in the submission of the Bangalore City Report and the final accounts of the Comptroller.

2. *Development of Local Self Governmet.*—As detailed in the Review of the District Fund Administration Reports, two Committees presided over by Mr. M. Kantaraj Urs, C.S.I., and Dewan Bahadur Rajamantrapravina C. Srinivasa Iyengar, considered the scope for improving the organisation of Local Self Government in Mysore and the improvement of local finances respectively. A Conference of Municipal Bodies and District Boards was also held at the end of the year under the auspices of the Mysore City Municipal Council and it discussed various important questions for extending the activities of Municipal Bodies such as the conduct of Civic Surveys the undertaking of Town Planning Schemes and the development of Municipal trading. The recommendations of the two Committees and the resolutions of the Conference are receiving the consideration of Government.

3. *Constitution of Municipalities.*—The number of municipalities in the State was 89 as in the previous year, but the number of those governed by the Municipal Regulation rose from 35 to 36 consequent on the constitution of Bowringpet into a permanent municipality under the Municipal Regulation from the 1st May 1915. The new Municipal Council for Bowringpet was not however constituted before the end of the year.

4. *Elections.*—General elections were held in the Municipalities of Mulbagal, Sidlaghatta, Chikballapur, Melkote and Shikarpur and 16 members were elected in all. Four seats in Sidlaghatta and 3 in Melkote were filled up by nomination as the candidates did not secure the prescribed percentage of votes. In Channapatna general elections were postponed as the voters' list had not been revised according to the rules and the immediate holding of an election would not have given scope to all the ratepayers to take part in it. To fill up casual vacancies on the Municipal Councils of Bangalore City, Chikballapur, Sidlaghatta and Chitaldrug by-elections were also held. The attendance of the voters at the polls was not quite satisfactory except in the Bangalore City, Mulbagal, Chitaldrug and in two Divisions in Chikballapur.

5. *Meetings and Attendance.*—The average number of meetings held by the Municipal Bodies was 14 against 13 in the previous year. The average attendance of official members remained at 2·5 as before but that of non-official members decreased from 5 to 4·7 during the year. The decrease is most noticeable in the Municipalities of Nelamangala, Srinivaspur, Bagepalli, Channarayapatna and Birur. The attendance of official members in Sidlaghatta, Mulbagal, Seringapatam and Hosdurga was not satisfactory. In the Seringapatam Municipality as many as nine meetings had to be adjourned and the attendance of both the official and non-official members was very unsatisfactory.

No. 8482-98—Ml. 73-15-37, dated 19th May 1916.

6. *Committees.*—A special feature of the Municipal Administration during the year was the development of Municipal activities through Committees in the Bangalore and Mysore Cities. By this means the services of experienced gentlemen who are not on the Municipal Councils were secured for the inauguration of measures conducive to the welfare of the cities. Action on these lines has since been taken in the other District Headquarter towns also. The Managing Committees have been invested with powers under Section 27 (2) of the Municipal Regulation only in the Bangalore and Mysore Cities and the Tumkur, Chitaldrug and Davangere Municipalities. The attention of the other Municipal Councils is once again invited to the imperative need for suitable delegation of powers to the Managing Committees, in the interests of despatch of work and sound Administration.

7. *Amendment of the Municipal Regulation.*—During the year the Municipal Regulation was amended in the following direction by Regulation No. VIII of 1914:—

(*a*) Power was conferred on the Municipal Councils to raise loans with the previous sanction of Government for constructing any work of a permanent nature and

(*b*) Persons primarily liable to payment of municipal taxes on buildings and lands are made responsible to give notices of all transfers of their properties to the Municipal Councils to facilitate the mutation of names on the assessment registers.

8. *Rules framed by Government under the Municipal Regulation and powers Conferred on Municipal Councils.*- Rule 10 (*a*) of the revised rules for the regulation of the water-supply in the cities of Mysore and Bangalore was amended so as to exempt houses having water connection from payment of metre rent in every month in which the consumption does not exceed 4,000 gallons. All the powers specified in Sub-Section 2 of Section 149 of the Municipal Regulation in regard to the abatement of overcrowding were conferred on the Bangalore City Municipal Council.

9. *Rules and Bye-laws.*—The Municipal Councils continued to show considerable activity in framing rules and bye-laws during the year.

10. *Demand, Collection and Balance under Assessed Taxes.*—The aggregate current demand under all items of taxation excepting octroi which is collected on the spot and tolls which are generally paid up in instalments on the due dates by the contractors was Rs. 3,74,366 of which about 27 per cent was left uncollected against 23 per cent in the previous year. This is not satisfactory. In the Municipalities of Hoskote, Closepet, Channapatna, Gundlupet, Seringapatam, Nagamangala, Maddur, Krishnarajpete, Arsikere, Mudgere, and Chitaldrug more than 50 per cent of the current demand was left uncollected. In Hoskote, Closepet, Channapatna, Hunsur, Heggaddevankote, Nanjangud, T.-Narsipur, Mandya, Nagamangala, Saligrama, Arsikere, Mudgere, Narasimharajapura, Koppa, and Chitaldrug the total outstandings at the end of the year exceeded a year's current demand, while in the case of Gudlupet, Yedatore and Maddur, it exceeded two years' demand and in Seringapatam three years' demand.

The accounts show that warrants had been issued and were pending execution in respect of arrears amounting to Rs. 6,375 only out of the total arrears of Rs. 2,24,390. Such an unsatisfactory state of affairs resulted from failure to take prompt steps for the collection of taxes and to adopt the prescribed coercive steps in cases of non-payment. Government have also reason to believe that the unauthorized practice of refusing to accept payments tendered in respect of current demand on the ground that arrears of past years have not been paid prevails to some extent and is responsible for the further accumulation of arrears. Government hope that better attention will be paid by the Municipal Bodies and their executive to this important matter in future years.

11. *Revision of Assessments.*—In the Mysore City assessments on properties liable for Municipal taxes were not revised since 1904-05 and in the majority of the other Municipalities also this omission has continued much to the detriment of the Municipal Funds. The attention of all Municipal Councils was invited during the year to the need for periodical revision of assessments. The revision was completed

in the Municipalities of Heggaddevankote, Sarjapur, Kolar, Tumkur, Maddagiri, Channagiri, Sorab and Tirthahalli. Some of the other Municipal Bodies also are reported to have commenced the revision.

12. *Fresh Imposts and Variations in Taxation.*—In the Bangalore Municipality a water rate at one per cent of the rental value was levied on all shops from 1st July 1914 and the special sanitary cess which was being levied in the shape of a monthly rate according to a fixed scale was from the 1st January 1915 converted into a rate of 2 per cent on the rental value and made payable in two equal half yearly instalments. With a view to find funds for the annual maintenance charges of the sanitary improvements effected in Hiriyur, jaggory was included among the dutiable articles in that town during the year. In the Tiptur Municipality the levy of tolls was authorised from March 1915 to accumulate funds for the water-supply scheme of the town.

13. *Financial Position.*—The income and expenditure during the year contrast with those of the previous year as shown below :—

No.	Items	1914-15	1913-14
1	2	3	4
	I. RECEIPTS.	Rs.	Rs.
1	Octroi	3,54,617	3,79,626
2	House, land, lighting and water taxes	2,28,670	2,38,120
3	Mohatarfa	96,121	94,790
4	Taxes on vehicles and animals	11,251	14,098
5	Tolls and ferries	95,644	98,179
6	Special sanitary cess	7,710	5,095
7	Cattle pounds	21,919	22,215

13	Deposits	84,937	47,158
14	Repayment of loan	24,818	19,778
15	Investments	75,000	3,500
16	Other items	48,299	47,478
	Total II ...	11,98,328	10,92,161

The European war had some slight effect on the realisations from octroi and tolls and a combination among the bidders in the Bangalore City accounts mainly for the decrease under the sale-proceeds of manure. The decrease under house tax and tax on vehicles and animals was evidently due to the slackness of the collecting agency. The decrease under contributions is mainly due to the failure to adjust in the accounts of the year the contributions due from Government to the Bangalore and Mysore City Municipal Councils. The net increase of over one lakh of rupees under expenditure is nominal and is due to the investment of the surplus balance of the Bangalore City Municipal Council in Government Securities and in

the Mysore Bank and to the transfer of the value of sites sold in the Davangere Municipality in the previous year from deposits to the proper head of account under service heads. The Bangalore City Municipal Council were also authorised to conduct their cash transactions with the Mysore Bank and their cash transactions with the Government District Treasury at Bangalore ceased from the middle of the year. The progress of the water-supply projects of Nanjangud and Davangere account for the large increase under expenditure on public works executed by the Public Works Department. The decrease under "maintenance of water-supply" is not real as the entire maintenance charges of the Chamarajendra and Vani Vilas Water-works have not been included in the accounts as directed in G. O. No. 8724-8—Ml. 251-12-6, dated 23rd March 1914. The Comptroller is requested to see that all such contributions are promptly credited to the accounts of the Local Bodies.

14. *Loans.*—The Mysore City Municipal Council and the Hunsur Municipal Council completely paid up the balance of their loans during the year. There were only five Municipal Bodies indebted to the Government at the end of the year. Besides these, there was one other Municipal Council namely Chikmagalur indebted to the Local Fund General to the extent of Rs. 37,405.

	Rs.
Kolar	400
Kadur	722
Harihar	750
Sringeri	2,034
Shimoga... ...	20,983
Total ...	24,889

15. *Incidence of Taxation.*—In the two cities of Bangalore and Mysore and in seven other marginally noted municipalities the incidence of taxation per head of population was between Rs. 2 and 3. In three municipalities it ranged between Rs. 3 and 4 and in the Alur Municipality, Hassan District it amounted to Rs. 4-1-8. The incidence in the Kolar and Chitaldrug town Municipalities is very low being Rs. 1-1-2 and 0-15-7 respectively. In the towns where the incidence is very high, the major portion of the income is derived from octroi or tolls and does not seem to fall on the local residents but on the people of the neighbourhood resorting to these towns for their purchases or business. Some complaints have been received recently in this respect and the Deputy Commissioners are therefore requested to investigate particularly bad cases of this sort and take suitable action for securing a more equitable distribution of the burdens of the municipal taxation.

3. Davangere ...	3	5	7

16. *Public Works executed by the Civil Department.*—The outlay on works proper was Rs. 2,08,332. Repairs of roads and drains were as usual the main items on which the expenditure was incurred. In the Bangalore City about 30% of the budget grant was allowed to lapse, while in the Mysore City the outlay was a little in excess of the budget grant. The average lapse in the other municipalities was 35% of the budget grant. The attention of all Municipal Bodies is invited to the observations of Government regarding lapses in the review of the District Fund Reports. Government hope that earnest attempts will be made to show better results in future years as one prime test of the efficiency of the Local Self Government necessarily is how far they have utilised the funds at their disposal to good purpose.

17. *Water-supply and maintenance.*—Scarcity of water was not felt during the year except in the Municipalities of Tumkur, Tiptur, Maddagiri, Sira, Pavagada, Chitaldrug and Holalkere. The situation was promptly met in those towns as far as funds permitted by deepening and improving existing sources of water-supply and sinking temporary wells. To alleviate the distress in the Chitaldrug town the Government sanctioned a contribution of Rs. 3,460. The water-supply projects of Nanjangud and Davangere made good progress and Rs. 22,521 and Rs. 70,183 have been already spent on them. The long pending question of supply of water to the Chitaldrug town has since reached a practical stage and the Municipal

Council have been authorised to raise a loan for financing the scheme. The water-supply of Chikmagalur town is represented to require urgent improvement and the Deputy Commissioner urges the deputation of a Public Works Officer to investigate the matter. More Public fountains and sub-mains to facilitate house connections are stated to be required in the Mysore City. The President of the Bangalore City Municipal Council notes that if a small staff be appointed for the prevention of waste and misuse of water, considerable savings can be effected in the total consumption. The attention of the Chief Engineer is invited to these remarks. As regards the abatement of waste of water Government consider that the matter can be successfully regulated only by securing the co-operation of the citizens. The formation of local citizens guilds and committees under Sections 29 and 30 of the Municipal Regulation for preventing waste will not only be effective but will also have a great educative value.

18. *Public Health and Vital Statistics.*—The public health during the year was generally good. The total numbers of births and deaths registered in all municipal towns were 15,391 and 13,595 against 15,054 and 12,162 respectively in the previous year. There was an appreciable decrease in the number of deaths from small-pox but plague was more virulent in all but the Hassan and Shimoga Districts and accounted for 16% of the total mortality during the year. Forty-nine persons in all were prosecuted in the Bangalore and Mysore Cities and Shimoga town for not reporting births and deaths in accordance with the bye-laws and 31 of them were convicted.

19. *Conservancy and Sanitation.*—Except in the Bangalore City the daily conservancy system was not availed of to the fullest extent possible. A comprehensive programme for introducing the system into the whole of the Mysore City is reported to be under the consideration of the Municipal Council. The provision of daily conservancy and the abolition of the pit system are very necessary in the interests of public health and the Municipal Bodies will do well to take early action in this direction. The flushing tanks in the extensions of the Bangalore City are reported to be not properly working. The Chief Engineer is requested to investigate this matter.

20. *Town Planning.*—Select plans and photographs of Bangalore and Mysore Cities were sent to the Town Planning Exhibition held in Madras in January 1915 and the Presidents of the two City Municipal Councils and a few others were also deputed to attend, Professor Geddes' lectures on town planning. The Bangalore City Improvement Committee appointed last year submitted a report of the more urgent requirements of the city and their proposals have since been generally approved.

21. *Fairs and Festivals.*—The Bangalore City Municipal Council organised an Industrial and Agricultural Exhibition in the Cubbon Park during the year in aid of the Imperial Relief Fund. The annual market show was also held as usual in the City.

22. *General Administration.*—The Bangalore City Municipal Office was reorganised during the year and the Cash and Account Branches were placed under different officers. To afford relief to the Amildar Vice-President of the Davangere Municipality the appointment of a Secretary was sanctioned. A similar appointment was also sanctioned for the Shimoga Municipality but on a further representation the appointment of a full-time Vice-President has since been sanctioned for this Municipality. The Municipal Council of Bangalore City continued to be presided over by Rajasabhabhushana Dewan Bahadur K. P. Puttanna Chetty, while those of Kolar, Chikballapur, Tumkur, Nanjangud and Chikmagalur had non-official Vice-Presidents.

23. *Audit of Municipal Accounts.*—As remarked in the District Fund Review the defects disclosed at the audits conducted by the Local Audit Section of the Comptroller's Office were mostly such as could have been avoided by a careful scrutiny of accounts periodically by the Municipal Audit Committees. In order to facilitate the work of these Committees and to see that all important items are scrutinised by them a set of simple questions to embody the result of their audit has since been prescribed. The attention of all Municipal Councillors is invited to

the remarks on this subject in the District Fund Review and to Section 42 of the Municipal Regulation.

24. *Defalcations.*—In the Mysore City two cases of misappropriation of octroi collections and short remittance of assessed taxes amounting to Rs. 188 were discovered. The octroi Daroga and Manegar were suspended and prosecuted. The official responsible for the short remittance of taxes had absconded and he is since reported to be dead.

25. *Hand-books of Municipal Towns.*—A hand-book for the Nanjangud Town and booklets for 16 other towns were published during the year. Information regarding Municipal towns other than the District Headquarters has since been ordered to be incorporated in the Taluk Hand-Books.

26. *General.*—The relations between official and non-official members and the executive continued to be cordial and the administration of the Municipalities was generally satisfactory. The thanks of Government are due to all the gentlemen who have co-operated to bring about this gratifying result and in particular to Rajasabhabhushana Dewan Bahadur K. P. Puttanna Chetty, Mr. C. Seshadri Iyengar, Mr. C. Narayanasamy Chetty, Mr. C. B. Gopala Rao, Mr. C. Vasudeva Rao and Mr. K. Venkataswamaiya.

Government regret to observe that the administration of the Seringapatam Municipality is reported to be not satisfactory on account of want of harmony among the members. The Deputy Commissioner, Mysore District, will investigate this matter and submit a special report.

Concessions to Settlers in Malnad.

No. 8201-7—San. 99-15-5, dated 8th May 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Read—

Letter No. 71, dated the 7th February 1916, from the Deputy Commissioner and Chairman of the Malnad Improvement Committee, Shimoga District, pointing out the need for affording certain facilities to persons willing to settle down in the malnad, and submitting his proposals in the matter.

2. Letter No 77, dated the 13th February 1916, from the Secretary to the Central Committee, Malnad Improvement Scheme, Shimoga, submitting a resolution of the Committee on the above subject.

3. Letter No. 10395, dated the 19th February 1916, from the Revenue Commissioner in Mysore.

Order No. 8201-7—San. 99-15-5, dated 8th May 1916.

Government consider that the proposals contained in the first of the communications read above are calculated to forward the movement for the improvement of the malnad and they are accordingly pleased to authorise the Deputy Commissioner of the Shimoga District to offer the following concessions to intending settlers:—

(i) Grant of assessed waste land not exceeding eight acres in extent for a single family of settlers, without any upset price and free of assessment for the first three years but subject to half assessment for the next two years and to full assessment thereafter.

The sanction of Government required in this behalf under Rule 44 of the Land Revenue Rules will be dispensed with for a period of one year up to a maximum of 500 acres in the first instance.

(ii) Grant of building materials in accordance with the scale laid down in Government Order No. 3394-9—San. 110-15-3, dated the 1st March 1916.

(iii) Grant of advances, not exceeding Rs. 100 for a single family, for the purchase of the necessary agricultural stock and implements in cases where such assistance is called for and some local men of sufficient means stand surety, subject to the condition that the amount should be repaid in not more than ten yearly instalments commencing from the third year.

A sum of Rs. 5,000 will be placed at the disposal of the Deputy Commissioner, Shimoga District, for the above purpose and the Special Revenue Officer, Malnad Improvement Scheme, is for this purpose invested with the same powers as Assistant Commissioners of the Revenue Department in the matter of dealing with applications for *takavi* loans.

The amount will be made available from the provision of one lakh of rupees in the current year's State budget for the improvement of the Bangalore City.

2. Among the other measures that may be found desirable to adopt for securing the object in view, the Deputy Commissioner of the Shimoga District suggests the attraction of settlers through the agency of responsible landed proprietors on payment of a commission and the appointment of a special subordinate to develop this branch of work. Definite proposals in this behalf together with information as to the expenditure involved should be submitted in consultation with the Committee for the orders of Government.

No. 8201-7—SAN. 99-15-5, DATED 8TH MAY 1916.

3. The Deputy Commissioner and Chairman is requested to report to Government at the end of a year how far the concessions sanctioned in paragraph 1 above have contributed to encourage immigration into the Malnad.

Report on the Working of the Department of Mines and Geology.

No. G. 15405—GEOL. 15-15-4, DATED 12TH MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Report on the working of the Department of Mines and Geology during the year 1914-15, received with Director's letter No. 663, dated the 20th September 1915.

Order No. G. 15405—Geol. 15-15-4, dated 12th May 1916.

The department, which was constituted in 1894, was for the first time thoroughly re-organized in February 1915. The work of the department was classified into certain definite heads and was considerably amplified in order to better satisfy the needs of the public as well the interests of mining industry. Provision was made for training local people for mining work and for conducting the business of the department according to a definite programme.

During the short period of four months intervening the re-organization and the close of the official year, substantial progress was made in the direction of giving due effect to the new scheme of work, as shown in the report under review.

Government attach great importance to a proper dissemination among the people of information regarding the occurrence of economic minerals in the various parts of the State, the training of local people as Geologists, Mining Engineers and Prospectors, the exploration of mineral products of economic value and the production and manufacture of special metals such as pig iron, steel, ferro-manganese, ferro-chrome, etc., and the enlistment of capital and enterprises in the production and exploitation of minerals and metals. Government have no doubt that the Director will pay special and sustained attention to these matters.

2. *Geological Survey.*—The Geological Survey consisted of Survey work in connection with prospecting for economic minerals, the revision of maps of areas surveyed in previous years for publishing special maps on the half inch scale and the preparation of a large Geological map on the scale of eight miles to an inch. The latter map has been completed and is in print.

3. The special prospecting work consisted of investigation of deposits of iron ore, kankar, limestone, clay and magnesite in different parts of the State.

4. *Mining Industries (a) Gold.*—The prospects of the producing companies on the Kolar Gold Field are stated to be distinctly encouraging. The output of gold during the year was 568,847 oz. of an approximate value of Rs. 3,26,76,516 as against 559,832 oz. of the value of Rs. 3,23,53,731 in the year before. The royalty due to Government on the output and on the dividends declared by the companies amounted to Rs. 18,95,740 in 1914-15 as against Rs. 18,95,018 in 1913-14.

5. *(b) Manganese.*—During the year manganese was produced chiefly in the Kumsi Mines in the Shimoga District owned by the Workington Iron and Steel Co., Limited. The ore exported amounted to 19,629 tons yielding a royalty of Rs. 4,907 against 5,953 tons in the preceding year on which a royalty of Rs. 1,461 was realized.

6. *(c) Other Ores.*—Work in regard to other ores, *viz.*, chrome, asbestos, mica, iron ore, magnesite, corumdum, clay and copper, is being carried on under prospecting licenses; but progess was hindered considerably by war conditions.

No. G. 15405--Geol. 15-15-4, dated 12th May 1916.

7. *Accidents.*—It is satisfactory to note that there was a considerable deminution in the number of mining accidents and that mortality therefrom fell from 4·38 per 1,000 in 1913 to 2·28 per 1,000 in 1914.

8. *General.*—Much work was accomplished in the other branches of the Department, *viz.*, the Geological Museum, Library and Explosives. Government are pleased to record that, on the whole, the work of the Department was satisfactory.

Grant of Mineral Licenses and Leases.

No. G. 15409—Geol. 5-15-7, dated 12th May 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Read—

Correspondence ending with letter No. 624, dated 17th September 1915, from the Director, Department of Mines and Geology regarding the necessity for certain changes in the Rules for the grant of mineral licenses and leases published with Notification (Geological) No. 800, dated 29th October 1910.

Order No. G. 15409—Geol. 5-15-7, dated 12th May 1916.

The alterations proposed are mostly verbal in character and necessitated by the transfer of the Secretariat functions from the Department of Mines and Geology to the General and Revenue Secretariat and the delegation of certain powers to the Director in respect of the receipt and disposal of applications for licenses and leases for minerals.

2. The only two independent changes proposed are the insertion of the words "tramways and ropeways" in clause 3 of the form of mining lease and the omission of the clause 13 prescribing a minimum working capital for mining companies. It is urged that the first alteration is necessary to render it clear that the expression "mining plant" includes tramways and ropeways also and that the second is found both unnecessary and unworkable. Government agree with the Director in these views.

2. The changes proposed are accordingly approved.

4. The revised rules will be separately notified for the information of the public.

D. M. NARASINGA RAO,
Secy. to Govt., Gen. Dept.

To—The Director, Department of Mines and Geology.

Revised Rates of Royalty on Manganese Chrome and Magnesite Ores.

No. G. 16129—GEOL. 26-15-8, DATED 27TH MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ-

Correspondence ending with letter No. 3146, dated 5th April 1916, from the Director of the Department of Mines and Geology on the subject of the revision of the present rates of royalty on manganese, chrome and magnesite ores.

Order No. G. 16129—Geol. 26-15-8, dated 27th May 1916.

The Director represents that the present rates of royalty on the above ores as prescribed in the Government Notification Geological No. 800, dated 29th October 1910, as amended by Notification No. 99, dated 12th July 1912, go up to an impossible point owing to change of freights as the market value depends chiefly on freights and these have gone up considerably owing to the present war conditions. He accordingly suggests that, for the ores referred to above, royalty be fixed as at present at 5 per cent of the sale value on the mining block, convertible annually or for a fixed term at the option of Government into an approximately equivalent charge per ton or other unit of measurement and subject to certain minimum charges as follows:—

Manganese ores	8 annas per ton
Manganese ores containing not more than 42 per cent of manganese on production of satisfactory certificates of grade of—	
Shipments	4 annas per ton
Chrome ores	10 annas do
Raw magnesite	8 annas do
Calcined magnesite	1 rupee do
Dead burnt magnesite....	Rs. 1-4-0 do

Government have carefully considered the Director's proposals and while agreeing with him that a revision of rates is necessary at present they are of opinion that the minimum rates suggested by him do not sufficiently protect the royalty revenue so far as Government is concerned.

It is therefore directed that the following rates of royalty be levied for two years on Manganese, Chrome and Magnesite Ores:—

5 per cent of the sale value of the ore on the mining block convertible annually or for a fixed term at the option of Government into an equivalent charge per ton subject to the following minimum charges:

Chrome	12 annas per ton
Raw magnesite	10 annas do
Calcined magnesite	Re. 1-4-0 do
Dead burnt magnesite	Re. 1-8-0 do
Manganese	10annas do
Manganese ores containing not more than 42 per cent of manganese	6 annas do

The above rates will be duly notified in the Gazette.

No. G. 16129—Geol. 26-15-8, dated 27th May 1916.

The Director has also raised the question of the mining rent now recovered from the lessees in addition to the royalty and recommends that royalty in excess of the rent should only be levied. This recommendation is however not based upon adequate grounds and involves a departure from the existing rules on the subject. The object of the recommendation is to relieve the lessee during such time that his output is small and expenses heavy, but there is no reason why the Government should forego the surface rent collected on mining leases under the general rules in force. The present rules will continue to remain in force.

D. M. NARASINGA RAO,
Secy. to Govt., Gen. Dept.

To—The Director, Department of Mines and Geology.

GOVERNMENT OF H. H. THE MAHARAJA OF MYSORE,

Memo No. G. 15883-922 / G. M. 523-15-1

GENERAL AND REVENUE SECRETARIAT,

Dated Bangalore, the 22nd May 1916.

OFFICE MEMORANDUM.

In the case of Government officers who have executed agreements of service or who have entered service on special conditions, a register in the following form should be maintained in the Audit Office and in the Secretariat and the Office of the Head of the Department concerned.

Serial No.	Name and designation of officer	Date and purport of agreement or special conditions	Number and date of Government order sanctioning the appointment	Remarks

2. The original agreements should be sent to the State Huzur Treasury for safe custody and copies thereof kept in the aforesaid three offices, together with a complete file of the orders relating to each case.

3. A similar record should be maintained about holders of State Scholarships who have entered into agreement with Government.

4. Heads of Departments are requested to send lists of such officers and scholarship-holders to Government and to the Comptroller at a very early date in the form referred to in paragraph 1, together with copies of agreements.

By Order,
D.M. NARASINGA RAO,
Secy. to Govt., Gen. Dept.

To—The Heads of Departments

Government Order No 5015-64—A & I. 147 14-2, dated 25th May 1915, issuing a set of rules for the grant of loans for sericultural improvement in Mysore

2. Letter No. 2177, dated 4th March 1916, from the Secretary, Mysore Economic Conference, forwarding for orders a copy of letter No 3736, dated 29th February 1916, from the Secretary, Agricultural Committee, recommending the adoption of certain supplementary rules for the grant of loans for the benefit of small sericulturists who form the bulk of the people engaged in the industry.

Order No. 6320-68—A. & I. 184-15-5, dated 2nd May 1916.

The rules proposed by the Agricultural Committee, as appended to this Order, are sanctioned with some modifications. They will be published in the *Mysore Gazette* for general information as supplementary to those issued with Notification No. 5065—A. & I. 147-14-3, dated 25th May 1915.

2. Applications for loans exceeding Rs. 500 will be governed by the rules already issued in the aforesaid Government Order of the 25th May 1915.

3. Loans should not be issued for the same purpose under two sets of rules, *i.e.*, Land Improvement Loan Rules or Industrial Takavi Rules, etc.

No. 6320-68—A. & I. 184-15-5, DATED 2ND MAY 1916.

RULES.

1. Loans referred to in Government Notification No. 5065—A. & I. 147-14-3, dated 25th May 1915, for setting up a rearing house and raising mulberry plantation shall also include the following :—

(*a*) Mulberry cultivation including preparation of land, provision of irrigation facilities, purchase of cuttings, manure, etc.

(*b*) Purchase of silkworm seed and rearing appliances.

(*c*) Construction or repair of rearing houses.

(*d*) Repairs and purchase of reeling machines.

2. The following officers shall be competent to sanction loans not exceeding the sums specified against them on each individual application :—

	Rs.
Amildars	100
Sub-Division Assistant Commissioners ...	250
Deputy Commissioners	500

3. Applications shall, in the first instance, be made to the Amildar of the Taluk or to the shekdar of the hobli. The application shall, after local enquiry, be disposed of by the Amildar, if it is within his powers of sanction, otherwise shall be submitted without unnecessary delay with his recommendation and the record of enquiry to the officer competent to dispose of it.

4. In regard to the security offered, the bonds to be executed, the rate of interest, the period of repayment of the loan and other details, the rules for the grant of loans for sericultural improvement issued with the notification referred to in Rule 1 shall govern these loans also.

Agricultural School at Chikkanahalli, Sira Taluk.

No. 6436-50—A. & I. 195-15-2, DATED 6TH MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No 2602, dated the 29th March 1916, from the Secretary Mysore Economic Conference forwarding for orders a scheme formulated by the Deputy Commissioner of Tumkur, for establishing an Agricultural School at Chikkanahalli, Sira Taluk and approved by the Agricultural Committee at their 44th meeting together with an extract of paragraph 13 of the proceedings of the meeting

EXTRACT OF PARA 13 FROM THE PROCEEDINGS OF THE 44TH MONTHLY MEETING OF THE AGRICULTURAL COMMITTEE HELD ON 26TH FEBRUARY 1916

13 *An Agricultural School at Chikkanahalli, Sira Taluk* —Letter No 1315, dated 24th February 1916, from the Deputy Commissioner, Tumkur District, about the establishment of an Agricultural School in Chikkanahalli Sira Taluk, which runs as follows, was read —

"I have the honor to state that one Mr Ugre Gowda of Chikkanahalli Sira Taluk, died leaving behind him large property both moveable and immoveable Before his death he set apart a portion of his property for charitable purposes and both the executor of his will, Mr Munilingappa and Mr Annaiya his adopted son, have now proposed that the whole of the amount of Rs 24 000 intended by the deceased to be spent for charity and the chattram building which is estimated to cost over Rs 25,000 and nearing completion may be utilised for the establishment of an Agricultural School with residential quarters for students In addition to this, they have agreed to place 6 acres of land both dry and wet and a kapile well situated therein at the disposal of Government for the purpose

I have herein enclosed a note drawn up by me in which I have indicated the lines on which the school may be started and worked The Director of Agriculture whom I consulted has stated that he approves of my proposals made in connection with the starting of the school and that he has no alteration to suggest in the scheme proposed by me

It will be seen that in accordance with the estimate of receipts and expenditure the annual recurring expenditure will amount to Rs 2 200 as against an income of Rs 1,100 derived from endowment set apart for this purpose An initial expenditure of Rs 1,000 is also needed for starting the institution as shown by me in the appended note

The matter was put before the District Committee in its last meeting held on the 21st instant and in expressing their approval to the proposed scheme the Committee resolved that the initial expenditure needed to start the school and any recurring annual expenditure of over Rs 1,000 which is the income expected to be derived from the endowment may be kindly recommended to be borne by Government

Under these circumstances, I request that necessary steps may be taken to obtain the sanction of Government for the scheme and that the Government may be moved to bear the initial expenditure needed to start the institution as well as the annual recurring expenditure over and above Rs 1,000, the estimated receipts from the endowment in view of the munificent grant made by the donor

I may add that the building as well as the grounds thereto have been inspected by the Revenue Commissioner and the Chairman of the Agricultural Committee on the 23rd instant and that he has been pleased to order the papers to be sent up to him at once for being placed at the Agricultural Committee meeting on the 26th instant"

"NOTE"

It is proposed to start an Agricultural School at Chikkanahalli, Sira Taluk, with a view to give instruction to the agriculturists in the district in improved methods of cultivation and also to train up persons for employment as fieldsmen for whom there is a great demand in this district and elsewhere

2 Though the District Headquarters should ordinarily be a more suitable place for the location of such a school, Chikkanahalli has been selected for the purpose as an endowment of Rs. 25,000 has been made by a public spirited gentleman for the school and building constructed at a cost of Rs 40,000 with plenty of accommodation for the school as well as the student boarders and teachers has been placed at the disposal of Government for the school, in addition to 6 acres of dry and garden lands with a nice kapile well containing a good supply of water.

No. 6436-50—A. & I. 195-15-2, dated 6th May 1916.

The school building is by the roadside on the Tumkur-Sira road, and being situated in a healthy locality is expected to attract a good number of students from all over the district

3. The instruction in the school will be given in Kanarese Only students who know to read and write fairly well be admitted to the school *Preference will be given to persons* who have passed the Lower Secondary Examination

(*A grant-in-aid elementary* school is held near the school where the students may receive instruction in the three R's if necessary.)

4. The course will for the present extent over one year so as to cover a full season for each crop.

5. The strength of the school will be restricted to twelve for the present Provision will be made for the free lodging and boarding of about ten students at an estimated cost of Rs. 8 each per mensem. In admitting students preference will ordinarily be given to those who are recommended and to whom scholarships may be awarded by the District Agricultural Association and the District Committee of the Economic Conference

6. The management of the school will be in the hands of a Committee consisting of the Deputy Commissioner of the District as President, the Deputy Director of Agriculture and a member of the donor's family.

7. In accordance with the estimate of receipts and expenditure herewith attached the initial charges of starting the school are estimated at Rs. 700 and the annual recurring expenditure at Rs 2,200 as against an income of Rs. 1,120 It is proposed that considering the very munificent endowment made by the donor towards the institution, the initial charges as also any excess over Rs 1,000 in the annual recurring expenditure should be borne by Government

8. The arrangements proposed above may be sanctioned by Government, tentatively for two years.

No 6136-50—A. & I. 195-15-2, dated 6th May 1916

Resolution 12 Resolved that a strong recommendation be submitted to Government for starting the proposed school at Chikkanahalli and for sanctioning from Government funds the initial cost of Rs. 1,000 and the annual recurring expenditure of Rs 1,200 as proposed by the Deputy Commissioner

---

Order No. 6436-50- A. & I. 195-15-2, dated 6th May 1916.

The proposal to open an Agricultural School at Chikkanahalli in the Sira Taluk is approved. The school will be treated as an aided school and given a grant of Rs. 700 for initial expenditure and Rs. 1,200 towards the annual recurring cost, for a period of two years, subject to the following conditions. –

(1) The management of the school will be in the hands of a Committee consisting of the Deputy Commissioner of the Tumkur District, the Deputy Director of Agriculture and a member of the donor, the late Mr Ugre Gowda's family, to be nominated by the Deputy Commissioner as members

(2) The work in the school will be co-ordinated with that in the school at Hebbal, the courses being drawn up in consultation with the Director of Agriculture and the school will be subject to his general superintendence.

(3) The Government grant will be paid by the Director to the Deputy Commissioner in such sums as may be found necessary subject to such conditions of efficiency as may be laid down with the approval of Government. The Director's detailed proposals in this behalf are awaited.

(4) In course of time arrangements should be made to teach sericulture in the school.

2. The school will be opened from 1st July 1916. The Deputy Commissioner is requested to arrange for all necessary steps being taken to give legal effect to the bequest. A report on the working of the school should be submitted by the President of the Committee of management with the Directors opinion, before the end of August following the year to which it relates.

3. Necessary provision for meeting the initial expenditure of Rs. 700 and the Government share of Rs. 1,200 of the annual recurring charges will be made in the budget of the Agricultural Department, for the year 1916-17.

4. The question as to the conditions under which the school will be continued at the end of two years will be taken up for consideration before the expiry of that period.

5. Government consider that the munificence of the late Mr. Ugre Gowda in providing a building and an endowment for the school deserves great commendation. The Deputy Commissioner is requested to submit proposals as to the manner in which it may be suitably recognised.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Government Order No. G. 1929-33—G. M 55-12-236, dated 28th August 1913, and Government Order No. G. 3358-61, dated 7th November 1913, regarding the transfer of the Mysore Tile Factory to a private body

(2) Letter No. 2140, dated 13th March 1916, from the Secretary, Industries and Commerce Committee, submitting for orders of Government the resolution of the Committee recommending the transfer on certain terms of the factory to Mr. Narasinga Rao Sindhe.

(3) Letter dated 10th April 1916, from the Chairman, Mysore Tile Syndicate, offering to take over the factory on certain conditions.

Order No. 6492-8 -A. & I. 202-15-2, dated 10th May 1916.

As the Mysore Tile Syndicate consisting of a number of influential persons of the Mysore City made their first offer in 1913 and as the terms now offered are in substance the same as those offered by Mr. Narasinga Rao Sindhe, Government are pleased to accept the offer of the Syndicate.

2. The transfer to them of the factory is granted on the following terms :—

(1) They should purchase the machinery and plant together with accessories for a sum of Rs. 2,000, the sale amount being payable in five annual instalments commencing from 1st June 1916.

(2) The present lands and buildings to be leased to the Syndicate for a term of ten years.

(3) The possession to be rent-free for the first three years and an annual rental of Rs. 500 be paid for the remaining period.

(4) The lease will be subject to renewal only if the factory has been worked successfully as a commercial concern; but should the business fail and prove unsatisfactory, Government to have the right of terminating the lease at three months' notice.

(5) The Syndicate should have, at their own cost and without any claim for compensation from Government under any circumstances, an up-to-date kiln constructed, necessary additional machinery introduced and the business expanded in proportion to the demand, and

(6) the Syndicate agree to have all amounts due from them to Government recovered as arrears of Land Revenues.

3. The Syndicate will be granted the following concessions :—

(1) Permission to take clay from available clay beds, free of cost, from Government lands for the first three years, and subsequently on payment of reasonable royalty.

(2) Supply of water from the water tap in the premises on payment of a charge of 8 annas per 1,000 gallons.

(3) Supply of electric power at reasonable rates for a term of three years.

(4) The Director of Industries and Commerce will give expert advice whenever necessary.

No. 6492-8—A. & I. 202-15-2, DATED 10TH MAY 1916.

4. The Director of Industries and Commerce will arrange for the transfer of the factory on the aforesaid conditions and for the execution of the necessary bonds and the performance of the conditions stipulated in the above, reporting the result to Government. A suitable draft agreement will be prepared in consultation with the Government Advocate and forwarded to the Director in due course.

Division of Business between the Provincial and the Central Co-operative Banks, Bangalore.

No. 6560-71—A. & I. 19-15-15, DATED 13TH MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. 4450—A. & I. 19-15, dated the 8th March 1916, from the Secretary to Government, Departments of Education and Agriculture, to the Registrar of Co-operative Societies, stating that Government will be prepared to give the Provincial Co-operative Bank a cash credit of Rs. 50,000 on certain conditions and issuing instructions regarding the division of business between the Provincial and Central Co-operative Banks.

2. Letter No. 4471, dated 23rd March 1916, from the Registrar of Co-operative Societies, forwarding certain further correspondence on the subject of improving the Provincial Bank and recommending that (1) the cash credit of Rs. 50,000 promised may be allowed to be dealt with as an overdraft and the difference in the rate of interest charged by the Bank and that paid to Gover ment be utilised towards the general purposes of the Bank and that (2) a loan of two lakhs of rupees may be granted to the Provincial Bank free of interest and an equal sum with interest at 3 per cent for a period of ten years.

3. Read also correspondence ending with letter No. 696, dated 31st March 1916, from the President, Central Co-operative Bank, Limited, making certain representations in regard to the position of the Central Bank and its treatment at the hands of the Registrar of Co-operative Societies.

4. Read also letter No, 4663—C. S, dated 5th April 1916, from the Registrar of Co-operative Societies in Mysore, submitting certain points for the consideration of Government with respect to the distribution of the loans required by Co-operative Societies between the Central and Provincial Banks.

Order No. 6560-71—A. & I. 19-15-15, dated 13th May 1916.

With a view to prevent unhealthy competition between the Central Bank and the new Provincial Bank as regards the custom of the Co-operative Societies in the State and to enable the two institutions to have it divided in equal proportions between themselves, Government have already passed the following orders, *viz.*,

(1) that a cash credit of Rs. 50,000 be allowed to each Bank with interest at 3 per cent repayable in five years subject to certain conditions;

(2) that the business be fairly and impartially divided between the two institutions according to their resources and that not less than half in amount of the applications for loans received every month should be transferred to the Central Bank.

2. In respect of the cash credit allowed to the Provincial Bank, the Registrar now recommends the following further concessions, namely,

(*a*) that the restrictions regarding the utilisation of the difference between the rate of interest charged by the Bank and that paid to Government towards the reserve fund be withdrawn;

(*b*) that the Bank be not called upon to repay each instalment of the loan drawn within two years.

The Registrar also recommends the grant of a loan of 2 lakhs of rupees free of interest and an equal sum with interest at the rate of 3 per cent per annum for a period of ten years.

No. 6560-71—A. & I. 19-15-15, dated 13th May 1916.

3. As regards the direction that not less than one-half in amount of the applications for loans received every month should be transferred to the Central Bank, the Registrar represents that he is unable to give effect to the arrangement under his existing powers, as it would, in his opinion, involve an interference with the decision of the primary societies as to the quarter from which loans are to be raised.

4. The authorities of the Central Bank on the other hand complain that the Registrar has taken up an unsympathetic and even hostile attitude towards that institution as contrasted with the personal and active interest said to be displayed by him in the promotion of the new Provincial Bank and object to the grant to the latter institution of any special concessions.

5. After careful consideration of the various points arising for decision in the case, Government are pleased to direct as follows:—

(*a*) The orders already passed in regard to the amount of financial help which Government can render to the Provincial Bank cannot be reconsidered and the proposal to grant further loans to the Provincial Bank cannot be entertained.

(*b*) The concessions asked in respect of the cash credit referred to in paragraph 2 above are not unreasonable and are sanctioned;

(*c*) In the matter of the division of the loans between the two Banks, Government do not consider that the practical difficulties brought to notice by the Registrar are of such a character that it would be impossible to give effect to the same by the exercise of proper tact and discretion on his part. At the same time, Government consider it very desirable that any scheme for the division of loans between the two Banks should have in view the creation of a close feeling of solidarity between the primary societies and the Central Institution concerned and that each Bank should have a direct and personal interest in the granting of the loans and the working of the Societies applying for the same. In modification of the arrangements sanctioned in the letter of the 8th March 1916, a territorial distribution will be substituted so that each Bank may have its own separate and distinct sphere of operation and be able to devote itself to develop fully the field of investment and co-operative organisation therein.

The Central Bank will deal with all applications for loans proceeding from the Bangalore, Kolar and Chitaldrug Districts and the Provincial Bank for the other districts from the 15th March 1916. The arrangement will be sanctioned tentatively for a period of one year in the first instance;

(*d*) the grant of the cash credit and other concessions allowed to either Bank will be subject to their adhering strictly to the territorial distribution of business now approved.

6. The Registrar is requested to take immediate steps to give effect to the arrangements ordered above and forward for the information of Government a copy of the instructions issued by him in respect of the same. He is also requested to report the working of the arrangement at the end of one year. He should impress on both the banks the fact that in deciding how far the arrangement should be continued in favour of either of them at the end of that period, the Government will be guided among other things by the nature of the endeavours made by the Bank to conform as closely as possible to the ideal of a Central Co-operative Bank particularly in regard to the definite limitation of the dividends on shares to the minimum rate compatible with the attraction of capital, the gradual elimination of individuals in favour of societies as shareholders, the inclusion of representatives of societies on the directorate the grant of rebates to borrowing societies as an inducement to prompt repayments, the provision of adequte supervision over such societies, and the utilisation of surplus profits for purposes of co-operative education and propaganda.

Honorary Supervisors for Economic Conference Work.

No. 6600-51—A. & I. 137-15-2, DATED 15TH MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. 1456, dated 3rd January 1916, from the Secretary, Mysore Economic Conference, submitting copy of letter No. 1112, dated 20th December 1915, from the Deputy Commissioner and President, Mysore District Committee, recommending the appointment of Honorary Supervisors for Economic Conference work in the taluks, and suggesting that the scheme may be given a trial in the taluks of Gundlupet, Seringapatam, T.-Narsipur, Heggaddevankote and Malvalli, together with a note on the subject.

Order No. 6600-51—A. & I, 137-15-2, dated 15th May 1916.

Government consider that the scheme of appointing non-official gentlemen as Honorary Supervisors in taluks to assist Taluk Progress Committees and other agencies connected with the Economic Conference in stimulating the activities of the people in the advancement of education, agriculture, industries and trade, deserves to be tried, and are pleased to direct that it be brought into operation tentatively in selected taluks for one year.

2. The Honorary Supervisors will be expected to travel throughout the taluk explaining to the people the aims and objects of the Conference and assist them to obtain necessary help and information from the departments and committees concerned to enable them to undertake works of improvement. They should also co-operate in extending the benefits of the Village Improvement Scheme. The Secretary, Economic Conference, is requested to arrange for the preparation of a manual of instructions for the guidance of the Supervisors in their work.

3. The scheme will be brought into operation in taluks in which non-official gentlemen are prepared to undertake these duties without remuneration, or if any remuneration has to be paid, when not less than half the amount is raised locally or is provided by the Taluk Progress Committee.

4. The Supervisors will be appointed by the Deputy Commissioners on the recommendation of the Taluk Progress Committee concerned and will be under the control of that body. A brief statement of work done by the Supervisors during each month will be furnished to the Taluk Progress Committee and reviewed at its monthly meeting. The Deputy Commissioners should also instruct the District Economic Superintendents and other local officers connected with the Conference to be in touch with the Honorary Supervisors and guide them in their work.

5. In order to meet the cost of travelling expenses a grant may be sanctioned by the Deputy Commissioners at the rate of one rupee per day, whenever necessary, for the total number of days actually spent in travelling each month. To enable the Taluk Progress Committee to raise the full amount required for the purpose, a Government contribution equal to the amount obtained locally for this specific purpose but subject to a maximum of Rs. 15 per month for each taluk may be sanctioned by Deputy Commissioners. A sum of Rs. 3,000 will be provided in the budget estimates of the Economic Conference for contributions of this kind.

6. The Secretary to the Economic Conference will be requested to obtain lists from the Deputy Commissioners, of taluks in which the scheme is proposed to be tried and submit the same for the information of Government with the names of the Supervisors appointed.

No. 6600-51—A. & I. 137-15-2, DATED 15TH MAY 1916.

7. A complete list of Honorary Supervisors in each district will be furnished to the Secretaries of the Central Committees. These officers will arrange to provide them with such information and assistance as may be useful to them in their work.

8. The Secretary to the Economic Conference is requested to obtain a report on the working of the scheme from the Deputy Commissioners before the 1st April 1917 and forward the same with proposals to continue the scheme, if necessary.

The Secretaries of Central Committees.

Exd.—C. R.

No. 6828-43—A. & I. 17-15-106, DATED 19TH MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Paragraph 7 of Government Order No. 4450-4500—A. & I. 17-14-39, dated 28th April 1915, regarding the functions of Taluk and Town Progress Committees.

Order No. 6828-43—A. & I. 17-15-106, dated 19th May 1916.

From the reports of the work of Taluk Progress Committees now received, it is clear that many of them are in need of special assistance to enable them to prepare proper programmes of work and become efficient working bodies. The Deputy Commissioners of Districts are requested to take necessary steps in the matter and direct the District Economic Superintendents to assist the Committees in preparing and working out their programmes. The Revenue Sub-Division Officers should also be instructed to interest themselves in the working of these Committees.

2. With a view to facilitate the selection of definite items of work, a specimen programme drawn up on the lines laid down in the order read above is printed as an appendix. It will be left to each Taluk Progress Committee to choose its own items of work according to local needs and conditions, but it is essential that it should have not less than six items of work under each of the main heads, *viz.*, Education, Agriculture, Industries and Trade, continuously under investigation at a time. The collection of statistics and of funds for the work of the Conference should also receive special attention.

3. The following suggestions are made for the distribution of work among the members of the Committee:—

(*a*) One member should be responsible as Organiser under each of the three heads of activity and the Secretary of the Committee will be the General Organiser for co-ordinating the work of the other three Organisers.

(*b*) The General Organiser or Secretary will help the Amildar-Chairman in—

(*i*) general organisation work, *i.e.*, selection of items of work and workers, co-ordinating the work of other members, placing before the Committee completed schemes and periodically taking stock of progress;

(*ii*) collecting essential statistics;

(*iii*) maintaining a complete collection of standing orders and up-to-date information in respect of all items of work in the programme.

(*c*) The Organisers for the three main branches will co-operate with other members and collect details respecting any schemes referred to them. They will also revise the statistics collected and help in carrying out duly approved schemes, and in spreading information.

(*d*) Each Organiser may select one or more associates in each hobli to help him in collecting information and giving effect to schemes.

4. The Secretary of the Committee may directly correspond, in all matters relating to the work of the Committee, with the District Economic Superintendent, the Secretary to the District Committee and the principal officers of the Education, Agriculture and Industries and Commerce Departments in the district.

5. A list of associates and of the distribution of work among them should be maintained by the Taluk Progress Committees.

No. 6828-43—A. & I. 17-15-106, DATED 19TH MAY 1916.

6. The work of the Progress Committees should be reviewed every quarter by the District Committees and a copy of the review forwarded to the Secretary, Economic Conference, for information.

P. G. D'SOUZA,

Offg. Secy. to Govt., Edn. and Agriculture.

To—The Secretary, Economic Conference.
The Chairmen of Central Committees.
The Deputy Commissioners of Districts and Presidents of District Committees.
The Director of Industries and Commerce.
The Inspector-General of Education.
The Director of Agriculture.
The Registrar of Co-operative Societies.

No. 6828-43—A. & I. 17-15-106, DATED 19TH MAY 1916.

APPENDIX.

SPECIMEN PROGRAMME FOR A TALUK PROGRESS COMMITTEE.

I. ORGANISATION.

1. Preparation of a list of important wants and needs of the taluk.

2. Preparation of a list of influential persons who are likely to interest themselves in Conference work, and securing at least 100 workers, each being entrusted with some definite work in which he is interested.

3. Arranging for the collection of funds, about Rs. 30 by each Village Committee, and having about Rs. 500 to Rs. 1,000 for the work of the Taluk Progress Committee and contributing a similar amount for the work of the District Committee and making a list of useful endowments in the taluk.

4. Organisation of:—

(*a*) Taluk Conference.

(*b*) An Agricultural Association.

(*c*) Merchants' Association.

(*d*) Syndicates or groups of workers to carry out definite schemes.

5. Making a list of places where 500 and more persons assemble periodically, arranging for lectures, magic lantern shows and demonstration at those places and instituting a system of prizes so as to create a spirit of healthy emulation among workers of each class.

6. Arranging for stock of all work done being periodically taken.

II. EDUCATION.

1. Fixing a standard to be reached during the year by the taluk in the matter of educational progress. (See development form.)

2. Preparation of a statement giving particulars of the existing schools in the taluk, in the form annexed.

3. Preparation of a list of villages, arranged in the order of population, having no schools, and selection of twelve villages therefrom for starting new schools during the year. Taking necessary steps to start schools at those places.

4. Opening twelve night schools during the year.

5. Opening at least three schools every year for the backward classes.

6. Arranging for practical instruction to be given in at least six schools.

7. (*a*) Sending pupils every year for purposes of special and higher education to each of the institutions noted below:—

Hebbal School, Bangalore.

Mechanical Engineering School, Bangalore.

Arts and Crafts Institute, Mysore.

Commercial School, Bangalore.

Maharani's College.

District High Schools.

(*b*) Sending six boys to the District Headquarter Industrial School.

8. Creation of an education fund for the taluk.

9. Securing the services of itinerant teachers and honorary workers.

10. Opening six reading rooms and libraries during the year and doubling the circulation of newspapers and magazines.

11. Giving special stimulus to female education so that the number of girls going to school may be at least doubled in the next three years.

12. Adoption of necessary measures to increase the usefulness of existing schools, such as, provision of healthy buildings, qualified teachers, necessary equipment, local supervision, etc.

No. 6828-43—A. & I. 17-15-106, DATED 19TH MAY 1916.

No. 6828-43—A. & I. 17-15-106, DATED 19TH MAY 1916.

III. AGRICULTURE.

1. Collection of essential agricultural statistics.

2. Preparing an estimate of the agricultural production of the main crops of the taluk during the previous year.

3*a*. Maintaining farm accounts; members to make a beginning.

3*b*. Choosing six Village Improvement Committees which are to collect from the raiyats details of the area cultivated by each and the quantity harvested.

4. Forming an agricultural association for the taluk and also village agricultural associations in about fifteen villages.

5. Organizing cattle shows and agricultural demonstrations.

6. Collection of particulars as regards agricultural practices.

7. Extension of the use of improved implements during the year; say—

20 ploughs.
6 *dodguntes*.
3 cultivators, etc.,
stone rollers for threshing.

8. Sending raiyats to Hebbal to attend the various short courses.

9. Sending one or two raiyats and one or two merchants to study improvements in agriculture and trade, to places outside the State.

10. Arranging for securing the advice of the Agricultural Department in jaggery-making, where the area under cane is less than 20 acres; of the Industries Department where the area is larger.

11. Introduction of *honge*-oil cake as manure, improvement of farm yard manure, green manuring of crops, etc.

11*a*. Supply of good seed.

12. Popularising large landed estates scheme and attempting to have at least one estate formed during the year.

13. Arranging for the construction of 16 minor tanks and raising contributions for major tanks.

14. Arranging for sinking 25 irrigation wells.

15. Laying out cart-tracks below big tanks, where such do not exist, for carting manure, etc., and bringing produce. Two places to be selected for the year.

16. Preparing a list of places in the taluk, where power machinery can be introduced with advantage to pump water, thresh ragi, mill sugar-cane, etc., and attempt to introduce one installation of each kind during the year.

17. Raising plantations for timber, manure and fuel purposes, at least one during the year.

18. Introducing fruit and flower cultivation on a business scale, in at least three places during the year.

19. Arranging for a small plot of land being kept well cultivated attached to the village school and teaching pupils agriculture, and growing fruit and flower plants.

20. Improving breeds of cattle, sheep and goats.

IIIA. SERICULTURE.

1. Collecting essential statistics under Sericulture and estimating the quantity and value of silk prepared during the past year.

2. Increasing the area under mulberry by at least 10 per cent.

3. Arranging for the demonstration of improved methods.

4. Starting one model rearing-house.

5. Arranging for the supply of disease-free eggs to rearers.

6*a*. Encouraging at least half a dozen men to adopt improved methods of rearing.

No. 6828-43—A. & I. 17-15-106, dated 19th May 1916.

6*b*. Sending at least six men to Channapatna farm to study the system of rearing and reeling practised there.

7. Encouraging persons to plant tree-mulberry on a larger scale.

8. Starting a well equipped filature on modern lines.

IV. INDUSTRIES AND COMMERCE.

1. Preparation of a list of the arts and crafts pursued in the taluk with particulars noted below for each art or craft :—

(*a*) Name of village ;
(*b*) Number of workmen or families engaged ;
(*c*) Description of work done by them ;
(*d*) Value of work done per annum ;
(*e*) Number of working days ;
(*f*) Average earnings per workman or family per annum ;
(*g*) Location of market.

2. (*a*) What industries are declining and what are prospering ? Investigate causes.

(*b*) What facilities are needed to improve the industries that are declining ?

3. Starting three major industries and six minor industries and at least one Joint Stock Company during the year.

4. Preparation of a list of subsidiary industries followed by the people of the taluk and noting which of them can be developed further.

5. Introducing the following cottage industries :—

Poultry farming.
Sheep and pig rearing.
Rearing young stock.
Mat and basket making
Vegetable gardening.
Sericulture.
Knitting.
Tailoring.
Cobbling
Dairying
Carpentry.
Rope-making.

IVA. TRADE.

1. Estimating the quantity of exports and imports for the last year.

2. Making a list of the important trading centres in the taluk as also a list of wholesale traders.

3. Enquiring if there is sufficient business in the taluk to open an agency of the Mysore Bank and, if so, taking steps to establish one.

4. Which are the local articles for which there is a good demand and ascertaining if business in them can be improved ?

5. Making a list of post and telegraph offices in the taluk and triyng to have at least one more post office opened during the year.

6. Introducing at least 500 sets of standard weights and measures during the year.

7. Making a list of roads that are most urgently needed in the interests of agriculturists and tradesmen.

IVB. BANKING AND CO-OPERATION.

1. (*a*) Making a list of Co-operative Societies,
Joint Stock Banks,
Private Bankers.

(*b*) Finding out the extent of transactions done by each ;
(*c*) Ascertaining rates of interest charged by each ;
(*d*) Enquiring if there are any obstacles in the way of their development and trying and removing them ;

———

Apportionment of Work between the Registrar and the Assistant Registrar of Co-operative Societies.

No. 6652-700—A. & I. 67-15-20, DATED 15TH MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. 1763, dated the 18th September 1915, from the Registrar of Co-operative Societies in Mysore, on the subject of entrusting his Assistant with an independent charge in the Co-operative Department.

Order No. 6652-700—A. & I. 67-15-20, dated 15th May 1916.

It is ten years since the Office of the Registrar of Co-operative Societies was constituted and during that period the co-operative movement has made steady progress in the State.

2. The number of Societies is at present 730, but they are mainly banking and credit societies. In recent years, other forms of co-operations are being developed and a number of co-operative institutions for carrying on agricultural and industrial operations, such as rice-hulling and jaggery manufacture, stores societies, building societies and societies for weavers are springing up.

3. At present the work of supervising and inspecting all the co-operative institutions of the State is carried out by the Registrar with the help of an Assistant Registrar and the Inspectors. In view of the growth of the co-operative movement in the State and the necessity to develop other forms of co-operation besides credit, the Registrar has urged the desirability of strengthening the higher supervising staff of the Department.

4. The Registrar proposes that the whole State may be divided into two separate divisions, each being placed in independent charge of an Assistant Registrar, and that he may also be provided with a Personal Assistant to assist him in his office work. The subordinate executive staff of the department has recently been considerably increased. The Registrar has now an Assistant Registrar to help him, but as much of the time of the latter officer is spent in work at headquarters, it has not been possible to delegate to him any material part in the inspection and consolidation of societies. Government are therefore of opinion that if the Registrar is provided with a Personal Assistant of the rank of an Amildar, it may be possible to assign more definite responsibility and a separate and defined sphere of work to the Assistant Registrar, subject to the general control of the Registrar, without further increase in the number of Gazetted Officers of the Department.

5. Government are pleased to sanction the appointment of a Personal Assistant of the rank of an Amildar to the Registrar of Co-operative Societies. Mr. R. Ranga Rao, B.A., B.L., Assistant Registrar of the Co-operative Societies, will be placed in charge of Co-operative Societies in the districts of Tumkur, Chitaldrug, Shimoga and Kadur and allowed to exercise, subject to the general control of the Registrar, all the powers of a Registrar under the Mysore Co-operative Societies Regulation. The Registrar will be in direct charge of Societies in the remaining districts, in addition to exercising general supervision over the work of his Assistant. The Registrar or the Assistant Registrar should inspect every Society situated within the group assigned to their charge at least once in two years. The groups of districts

No. 6652-700—A. & I. 67-15-20, DATED 15TH MAY 1916.

assigned to the Registrar and the Assistant Registrar may be changed from time t time with the approval of Government.

6. In addition to the inspection of Societies, the Registrar and the Assistan Registrar will be expected to hold meetings in the course of their tours and sprea among the people sound co-operative ideas, to arrange for conferences, to form union and to bring into existence a strong non-official agency to gradually undertake th work of inspecting and developing the societies. It will be a part of their duty t collect statistics and information about the general economic condition of the people They should also co-operate with the Departments of Agriculture and Industrie and Commerce and the Economic Conference in improving the resources of th people.

7. The Assistant Registrar's Headquarters will be fixed for the present a Bangalore and his office treated as a part of the Registrar's office. All correspon dence between the Registrar and the Assistant Registrar will be carried on throug notes and memoranda and with other offices in the name of the Registrar and i important matters with his approval.

8. The Assistant Registrar should tour not less than 240 days in the yea within the districts assigned to him and the Registrar for not less than 180 days The touring should be done according to a programme prepared every quarte copies of which should be sent to Government. They should also maintain a con tinuous record of the work done and the information collected by them in the for of a diary, a brief quarterly analysis of the same being forwarded to Government

9. Separate orders will issue regarding the selection of an officer for the pos of Personal Assistant to the Registrar of Co-operative Societies.

P. G. D'SOUZA,

No. 7108-11—A. & I. 197-15-2, DATED 31ST MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. 2614, dated 30th March 1916, from the Secretary, Economic Conference, submitting a recommendation of the Industries and Commerce Committee in regard to Government pioneering button manufacture in the State.

Order No. 7108-11—A. & I. 197-15-2, dated 31st May 1916.

The Industries and Commerce Committee consider that, as button manufacture is a new industry involving experimental work with no prospect of immediate return, private capitalists cannot be expected to undertake such a scheme for sometime to come, and they are therefore of opinion that the industry may with advantage be taken up by Government, as raw materials required for button manufacture, such as horns, hoofs and bones, are plentiful and cheap in the State and the industry will create a new occupation for young men and boys.

2. The Committee estimate that a small button making plant with a motor to drive the machinery and the necessary shafting, will cost about Rs. 7,000 and the Director of Industries and Commerce considers that a sum of Rs. 12,000 should be set apart for experiments and working expenses. The whole scheme is thus estimated to cost about Rs. 20,000.

3. The Committee recommend that Mr. Mustaphi, the expert working in the Button Factory at Madras, may be put in charge of the Factory proposed to be erected, on a salary of Rs. 100 per mensem with an allowance of 25 per cent of the net profits.

4. Government are pleased to sanction the Committee's recommendation on the understanding that the business should be established on commercial lines, yielding a fair return within three years, so that it may be transferred to private enterprise ultimately. The work should be carried on under the control of the Industries and Commerce Department.

5. The cost on account of the scheme for the current year will be met out of savings in the current year's budget of the Committee or of the General Conference, suitable provision being made therefor in succeeding years' budgets.

6. A half-yearly report on the working of the scheme will be submitted to Government by the Director of the Industries and Commerce Department.

P. G. D'SOUZA,
Offg. Secy. to Govt., Depts. of Edn. and Agri.

To—The Director of Industries and Commerce in Mysore.

Experimental Farm at Babbur in the Hiriyur Taluk.

No. 7104-7—A. & I. 191-15-5, DATED 31ST MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Government Order No. R. 102-12—Agri. 105-12-6, dated the 8th July 1915, sanctioning 150 acres of wet land and 50 acres of dry land at Babbur in the Hiriyur Taluk being taken on lease for a period of five years for establishing an Experimental Farm.

2. Correspondence ending with letter No. 319, dated the 7th April 1916, from the Director of Agriculture in Mysore, proposing the acquisition of the lands instead of leasing them.

No. 285, dated 21st—22nd March 1916, from Leslie C. Coleman, Esq., M. A., Ph. D, Director of Agriculture in Mysore, Bangalore, to P G. D'Souza, Esq, B.A., B.L., Officiating Secretary to the Government of His Highness the Maharaja of Mysore, Departments of Agriculture, etc., Bangalore.

With reference to Government Order No. R. 102-12—Agri. 105-12-6, dated the 8th July 1915, sanctioning the establishment of a Farm at Babbur, Hiriyur Taluk, I have the honour to state that I have just returned from there after going over the ground carefully with the Deputy Commissioner and the Amildar.

2. A detailed investigation which was not possible during my former visit has revealed the fact that the value given for the land previously is three or four times as much as it should have been. The former value was fixed after consulting both the former Amildar and the officials of the village and it was presumed that it was approximately correct. An examination of registration records in the village shows that lands similar to that which we propose to take up has been sold within the past two or three years at prices varying between Rs. 7 and Rs. 50 per acre. This means that land can be purchased at a figure which would make rental a very unprofitable arrangement in comparison. Both the Deputy Commissioner and the Amildar agreed that if it were necessary to buy the land now under private holding which it is proposed to include in the farm, the outside figure would be Rs. 6,000 as compared with the Rs. 20,000 originally estimated. They further considered that in the case of a part, if not all, of the owners it would be possible to give them other lands in lieu of the land to be acquired, so that the cost should be considerably lower than Rs. 6,000.

3. I have the honour to append a map showing the exact location with survey numbers of the proposed farm. The following statement shows the various divisions with the area of each irrigable land 132 acres, 23 guntas divided as follows:—

A. 64 acres, 12 guntas. —This area has already been brought under the block system. It is an average red soil of the canal area and is decidedly saline. Raiyats are at present growing paddy as their wet crop on a part of this and under these circumstances, the land is likely to deteriorate in value.

B. 34 acres, 36 guntas.—This land is at present uncultivated, part of it belongs to Government. The remainder will almost certainly be resumed by Government shortly as the arrears of taxes are about double the value of the land. This land is not quite so good as the "A" block being more alkaline.

C. 17 acres, 10 guntas.—This has not yet been included in the block system and is now being cultivated with dry crops. It is the same class of soil as "B."

D. 13 acres, 25 guntas.—This is at present uncultivated but in private holding. The soil is black decidedly alkaline and is typical of a considerable area in the village which is at present not being cultivated.

4. The dry area comprises in all 90 acres, 25 guntas. Of this only 44 acres, 8 guntas are under cultivation. Of the remainder possibly about one-half can be profitably brought under cultivation. The balance is covered without out-croppings of trap and is suitable only for grazing. It will however furnish an excellent site for farm buildings and in fact the only really healtny site available. The cultivable dry area is a typical black cotton soil of medium quality and is thus eminently suited to carrying on work in connection with the dry crops of Chitaldrug District.

No. 7104-7—A. & I. 191-15-5, dated 31st May 1916.

5. It will be seen from the above description that the land selected is very varied in character and so gives excellent scope for showing what can be done by improved methods of cultivation. If the farm is to be established within three years on a self supporting basis it is necessary to have a fair amount of land which can be brought without much trouble into a high state of cultivation. Hence the necessity for a fairly large area The area at present under cultivation scarcely exceeds 100 acres and with this to begin on it should be possible to bring the rest even the most alkaline portion gradually under intensive cultivation.

6. In the Government Order referred to above sanction was given for leasing the land for this farm. As we would have to take the land at whatever rate the owners are pleased to fix, I doubt if it would be possible to get it for less than Rs. 2,000 per year. As already pointed out the land can be bought for Rs 6,000 at the outside. In other words we should pay in three years as rental a sum equal to the cost of the land If at the end of five or ten years, it is thought advisable to sell a part or the whole of the land, I am quite sure it will then be worth four or five times as much as it is now so that Government stand to make a handsome profit on the investment

7. In the light of the above facts, I have the honour to request sanction for the purchase of the land at a sum not to exceed Rs. 6,000. This sum can be met out of the Rs. 12,000 estimated as the cost of buildings, cheaper structures being put up until the farm is on a paying basis. The total initial expenditure will thus remain at Rs. 20,000 as originally estimated by me.

8. In explanation for the delay in connection with this matter I have the honour to point out that it was due to my having to proceed on leave at short notice so that I could not make any arrangements before I left. I have the honour to request that the subject may now be treated as a very urgent one as we should get possession of the land without delay if we are to get into shape for utilizing it to the best advantage during the coming year.

No. 5478—A. & I. 191-15-2, dated 30th March 1916, to the Director of Agriculture in Mysore.

With reference to your letter No. 285, dated 21st March 1916, recommending the purchase of the lands for the Experimental Farm at Babbur in the Hiriyur Taluk instead of leasing them as sanctioned in Government Order No. 102-12—Agri. 105-12-6, dated 8th July 1915, I am directed to request you to be so good as to furnish information on the following points:—

(1) Whether all the lands proposed to be purchased are free from encumbrances.

(2) Whether the owners are agreeable to sell their lands at the rates fixed by you.

(3) Whether in the interests of Government it would not be better to acquire the lands under the Land Acquisition Regulation than to purchase them by private negotiations which may lead to litigation.

(4) Of the lands proposed to be purchased how many acres are dry, wet or garden, and what is the assessment and extent of each survey number.

The favour of a very early reply is requested.

No. 311—S., dated 31st March 1916, from Leslie C. Coleman, Esq., M.A., Ph. D., Director of Agriculture in Mysore, Bangalore, to P. G. D'Souza, Esq., B A., B.L., Offg. Secretary to the Government of His Highness the Maharaja of Mysore, Departments of Agriculture, etc., Bangalore.

With reference to your letter No. 5478—A. & I. 191-15-2 of 30th instant, I have the honour to reply as follows:—

1, 2 and 3. It is proposed to acquire the lands under the Land Acquisition Regulation but in order to avoid any hardship on the parties, the Deputy Commissioner proposed to give the owners other lands in lieu of the lands taken.

4. Less than one half acre of the irrigable land may be classed as garden. The map and statement accompanying my previous letter gave information with regard to the irrigable and unirrigable land. The remainder of the information required is not available with me and I am addressing the Hiriyur Amildar on the subject today.

D. O. No. 5663—A. & I. 191-15, dated 5th April 1916.

My dear Mr. Balasundaram Iyer,

Will you kindly let me know what is the approximate value of the lands which have been selected by the Director of Agriculture for the agricultural Farm at Babbur in the Hiriyur Taluk? The Director of Agriculture says that the value is only Rs. 6,000 and that if the land is taken on lease it will be necessary to pay Rs. 2,000 per year. Do you also agree

No. 7104-7—A. & I. 191-15-5, DATED 31ST MAY 1916.

with him in this opinion? Before orders are passed for the acquisition of the land, would it be possible to take possession of them by private negotiation in view of eventual purchase or lease as may be convenient, so that farm operations can be started at once. The favour of a very early reply is requested.

D. O. No. 462, dated 6th April 1916, from Mr. C. S. Balasundaram Iyer, to Mr. P. G. D'Souza.

Your D. O. letter No. 5663, dated 5th April *re* lands required for the Agricultural Farm at Babbur.

Dr. Coleman and I inspected these lands on the 19th March 1916 and discussed the question of their acquisition and value with the Amildar and the people concerned. I agree with Dr. Coleman in thinking that the land selected can be acquired outright at a cost of about Rs. 6,000 to 8,000. I do not think it would be advantageous to lease the lands for a few years and, if we lease them, the rent would be fairly heavy. I think it is much better to buy up the lands outright, and later on, if at any time the lands are not wanted for the farm, they can be sold. Some of the raiyats whose lands have been selected are reluctant to give up their lands, but I think I shall be able to find lands in exchange for most of them and very little actual payment in money would be required even out of the 6 or 8,000 rupees I anticipate. After Government makes up its mind to acquire the land, I shall take up these individual negotiations and make the most economical arrangement that is possible. In any case, I am of opinion that it would be cheaper to acquire the lands outright than to lease them.

As regards the last question, it would no doubt be possible to take possession of the lands before formal acquisition and I shall take steps to do so, if so desired. There is a little crop on some of the lands and we may wait for the crop to be reaped so far as they are concerned. The rest of the land on which there is no crop can be taken possession of at once.

No. 319—St. 2, 7—8th April 1916, from Leslie C. Coleman, Esq., M.A., Ph. D., Director of Agriculture in Mysore, Bangalore, to P. G. D'Souza, Esq., B.A., B.L., Offg. Secretary to the Government of His Highness the Maharaja of Mysore, Departments of Agriculture, etc., Bangalore.

In continuation of my letter No. 311—S., dated 31st March 1916, I have the honour to forward herewith, with compliments, a copy of letter No. 1789, dated 5th instant and its enclosures received from the Amildar of Hiriyur Taluk furnishing information *re* the extent and assessment of each survey number proposed to be purchased for the Hiriyur Farm.

Letter No. 1789, dated 5th April 1916, from the Amildar of the Hiriyur Taluk, to the Director of Agriculture in Mysore, Bangalore.

With reference to your letter No. 2130, dated 31st March 1916, I have the honour to forward herewith a statement of lands (as per Revenue accounts) proposed to be purchased for the Hiriyur Farm, showing their extent, assessment, etc. All the lands are classed as "dry" by the Survey Department, but an extent of 118 acres, 38 guntas is already brought under "Blocks" under the block system of irrigation, while 13 acres 25 guntas is said to be irrigable by the Marikanve channels though not so brought under the block system. The remaining 90 acres, 25 guntas is only fit for dry cultivation, being above the contour line.

The rough sketch of the lands received from your office is herewith returned.

Statement showing the details of lands proposed to be purchased for Babbur Farm, Hiriyur Taluk.

Order No. 7104-7—A & I. 191-15-5, dated 31st May 1916.

Government have no objection to the required extent of land being acquired under the Land Acquisition Regulation.

2. The Deputy Commissioner of the Chitaldrug District is requested to submit declaration statement in respect of the lands required and take steps under Sections 9 and 17 of the Acquisition Regulation.

3. A sum of Rs. 6,000 is also sanctioned from the source pointed out by the Director of Agriculture to meet the cost of acquisition.

4. The Deputy Commissioner's proposal to give the owners of the lands so acquired, other lands in exchange, wherever possible, is approved.

5. The Director is requested to arrange with the Deputy Commissioner to take possession of the lands at once by private negotiations with the owners and start farm operations immediately.

P. G. D'SOUZA,
Offg. Secy. to Govt., Depts. of Edn. and Agri.

No. 6954-6—A. & I. 155-15-2, DATED 25TH MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ –

Government Proceedings No. 2240-8—A & I. 109-14 2, dated 2nd January 1915, appointing Mr. T. Hanumantha Rao, Assistant Secretary, Dasara Industrial and Agricultural Exhibition, as Special Officer until the end of June 1915 to conduct an enquiry into and report on the home industries and subsidiary occupations now pursued by the people in the cities of Bangalore and Mysore.

2. Correspondence ending with letter No. 253, dated 5th August 1915, from the Secretary, Mysore Economic Conference, forwarding an abstract statement of work done by the Home Industries Officer up to the end of April 1915, together with a statistical abstract relating to his work during the quarter ending 30th June 1915, and stating that the final report will be submitted to Government with the Committee's views shortly.

3. Letter No. 1884, dated 5th February 1916, from the Secretary, Economic Conference, submitting a recommendation of the Industries and Commerce Committee, suggesting the establishment of a Home Industries Institute.

Order No. 6954-6 A. & I. 155-15-2, dated 25th May 1916.

The Industries and Commerce Committee consider that the report prepared by the Special Officer discloses that, owing to the increased cost of living and other causes, there is a genuine desire among the people to supplement their income by the adoption of subsidiary occupations during their leisure hours, and that a systematized attempt to foster the growth of subsidiary occupations is likely to meet with success. The Committee accordingly recommend the establishment of a Home Industries Institute on the lines indicated by Rajamantrapravina Dewan Bahadur Mr. J. S. Chakravarti in his note* on the development of Home Industries in Mysore. To meet the cost of the scheme a lump sum provision of about Rs. 5,000 is asked for, for the equipment of a Workshop and an annual grant of Rs. 10,700 as detailed below:—

		Rs.	
(a) 1. Superintendent ...	...	300	per mensem.
2. Assistant Lady Superintendent ...	...	100	,,
3. One Clerk ...	...	25	,,
4. Two Mechanics on Rs. 30 each ...	...	60	,,
5. Two Demonstrators on Rs. 30 each	...	60	,,
6. Four peons on Rs 8 each ...	...	32	,,
Total	..	577	,,
(b) Rent for building ...	..	100	,,
Total	...	677	,,
	or Rs. 8,124 per annum		
(c) Annual contingent grant ...	...	2,500	
Grand Total	...	10,624 per annum	
	or Rs. 10,700 in round figures.		

2. Government are pleased to sanction the scheme tentatively for a period of one year. The necessary provision will be made in the budget of the Industries and Commerce Committee for 1916-17.

3. The Institute will devote special attention to the following items of work:—

(a) study of subsidiary occupations as now practised by people in the State (1) in towns and (2) in the country,

* Printed as annexure.

(*b*) collection of various types of machines and appliances suitable for home industries and adapting them to local requirements so as to bring them into common use and the opening of a depot for selling implements and materials not readily available in the market and rendering financial aid in deserving cases for purchase of the same by securing industrial loans or other means,

(*c*) demonstration before visitors and enquiries and opening demonstration and teaching classes for men and women under male and female teachers at the Institute and other centres, and organization of public lectures for propagandistic purposes,

(*d*) registration and classification of home workers in the Bangalore City and getting into touch with them and taking steps to see that they get a regular flow of work and improving the standard and quality of their work and stimulating enquiries and replying to enquiries by letter and in person.

4. A report should be submitted in due course regarding the establishment entertained and other arrangements made to give effect to the scheme.

5. A report on the working of the scheme should be placed before the Standing Committee of the Economic Conference after the lapse of six months and forwarded to Government with their remarks, if any.

P. G. D'SOUZA,
Offg. Secy. to Govt., Depts. of Edn. & Agri.

To—The Secretary, Economic Conference.
The Comptroller, Mysore Government, through Branch II.
The Secretary, Industries and Commerce Committee.

No. 6954-6—A. & I. 155-15-2, DATED 25TH MAY 1916.

ANNEXURE.

NOTE ON THE DEVELOPMENT OF HOME INDUSTRIES IN MYSORE BY RAJAMANTRAPRAVINA DEWAN BAHADUR MR. J. S. CHAKRAVARTI.

A.—A HOME INDUSTRIES INSTITUTE.

In the Birthday Session of the Economic Conference, 1914, I intended to bring forward a resolution on the subject of encouraging and organizing home industries in the State. Owing to my unavoidable absence on the day on which the proposition was to be taken up, the subject was not finally dealt with by the Conference but was referred to the Industries and Commerce Committee. The subject had been placed by me before the Industries and Commerce Committee at its sitting in May 1914 before being placed on the Conference agenda, and I understood that it received the general approval of the Committee. As desired by the Conference, the matter is again placed before the Committee for consideration and such action as may be thought desirable.

2. The resolution that was proposed to be brought forward ran thus:—

"That the provision of subsidiary occupations for agriculturists and middle class men and their families is of great importance.

That systematic action should be taken to ensure that ultimately each agriculturist and middle class family has one or more subsidiary occupations to fill up the spare time of all members who can work.

That the possibility of popularising paddy-hulling, hand-spinning, oil-pressing, corn-grinding, rope-making, basket-making, pickle-making, dairying, weaving, poultry-farming, sheep, goat and pig breeding, knitting, tailoring and other industries as such subsidiary occupations for various classes be considered and measures adopted to make the suitable occupations attractive and profitable to the masses.

That institutions be organized in course of time at as many places as possible to train people in such subsidiary occupations and furnish them on convenient terms with appliances, materials, live-stock, etc., for following such occupations.

That as a beginning and with the object of developing the whole scheme on satisfactory lines, a Home Industries Institute on the lines indicated in the skeleton scheme attached be opened in Bangalore under a Superintendent, who will devote his whole attention to the subject of developing suitable subsidiary occupations for the raiyat and middle classes."

3. The scheme referred to in the resolution is reproduced below:—

PART I.—OUTLINE.

Branch I.—Study of Needs; Experiment.

1. Study of home industries and subsidiary occupations in different countries and publication of bulletins.

2. Study of subsidiary occupations as now practised in Mysore, (*a*) in towns, (*b*) in the country.

3. Collection of various types of machines and appliances suitable for home industries—using them under actual working conditions—adapting them to local circumstances.

4. Thinking out new subsidiary occupations suitable to local conditions and inventing appliances therefor.

Branch II—Demonstration and Training

5. Stimulating enquiries and replying to enquiries by letter and in person.

6. Demonstration before visitors and enquirers.

7. Organization of public lectures for propagandic purposes.

8. Demonstration and teaching classes for women under lady teachers at the Institute and other centres.

9. Demonstration and teaching classes under male teachers at the Institute and other centres.

10. Stimulating the formation of such classes in district and taluk towns.

11. Introduction of training in suitable home industries in industrial and primary schools.

Branch III—Business Organization.

12. Registration and classification of home workers in the Bangalore City and getting into touch with them.

13. Taking steps to see that they get a regular flow of work by securing orders from the public and from dealers and distributing them amongst the registered workers.

14. Improving the standard and quantity of their work by seeing that they get the best machines, implements and raw materials.

15. Rendering financial help in deserving cases by securing industrial loans or by other means.

16. Undertaking similar work as in 12 to 15 above, in respect of other stations by the establishment of home industries associations or otherwise.

17. To effect the business organization that will be necessary before new subsidiary occupations can be introduced.

18. To direct home industries on right lines and see that they do not unduly compete with and injure existing industries of the State.

Branch IV—Propagandic Work.

19. Propagandic work in connection with the extension of the scheme.

Branch V—Sales Depot.

20. A depot for selling implements and materials not readily available in the local market.

Part II.—Requirements.

1. A suitable Superintendent.

2. A building, with a library, a workshop, an office, three or four demonstration and class rooms, a machine and implements hall and a sale room—on a small scale to begin with, to be developed as necessary.

3. A staff of clerks, mechanics, demonstrators, etc. To begin with there may be one of each class. A lady Assistant to the Superintendent and a staff of menials are also required.

4. An itinerant staff both male and female for collecting information, for lectures, demonstrations, etc.

5. A suitable grant for purchasing various types of machines, materials for demonstrations and for contingencies.

6. A suitable advance for the sales depot.

4. It will be seen that the proposed Home Industries Institute will have five main branches. The work of the first branch will be *study of local needs and experiments connected therewith.* The proposed sub-heads under this branch are: (1) study of home industries and subsidiary occupations in different countries and publication of bulletins. This is of course the first thing necessary. Home industry is no new thing. It has been and is being practised in most countries of the world. We can get new ideas by studying the conditions of home industry in those countries. Like every good thing in the world home industry has its abuses. We must study the system as it prevails in different countries under various circumstances and see how we can introduce the good into our country and avoid the evil. The next sub-head is study of subsidiary occupations as now practised in Mysore (*a*) in towns, (*b*) in the country. In a matter like this which concerns the masses, it is much easier to build on existing foundation, if sound, rather than strike new lines. We should therefore study what home industries exist within the State so that they may be developed as far as possible. The third sub-head is collection of various types of machines and appliances suitable for home industries—using them under actual working conditions—adapting them to local circumstances. This is the most important part of the work. The success of the whole scheme will depend on the people being given the right machines and appliances. If they are given something

which they cannot work, which is too complicated, too elaborate, too troublesome or too tiresome they will have nothing to do with home industries and will revert to their habits of idleness and indolence. But if they are provided with appliances which they can easily manage, by which they can easily produce something which means money, the scheme will become popular at once and the earning power of the people will rise.

Of course there may be classes of people for whom no appliances already on the market will be suitable. We shall have to think out and devise something suitable for them. For this reason sub-head (4) has been added, *viz.*, thinking out new subsidiary occupations suitable to local conditions and inventing appliances therefor.

5. The Second Branch of the Institute will have for its work *demonstration and training*. The First Branch gets ready, by study of needs and by experiment, appliances quite suitable for home industry for a particular section of the population. The next step should be to demonstrate the use of the machine to the people and to train them to use that machine successfully and to the best advantage. For this purpose several means may be adopted. These are the sub-heads of Branch II.

All these methods of demonstration and training are extensively used in many countries. By these means the people will know that appliances have been selected or devised for their benefit and, if they like, they can buy them and manufacture articles during leisure hours to supplement the family income.

6. Branch III of the Institute will concern itself with *business organization* to place subsidiary occupations on a satisfactory basis. It is not sufficient to pay attention only to the mechanical or manufacturing aspect of home industry. Success depends much on the business organization of the scheme. There must be facilities for converting the articles produced by home workers into money. Financial help must be forthcoming in deserving cases when necessary. Home industries must not be led along channels where they will clash with existing industries to the detriment of both. To secure all these objects, the sub-heads of work enumerated under Branch III must be undertaken.

7. Branch IV of the Institute relates to propagandic work in connection with the extension of the scheme. If the vast masses of population in the interior of the country are to be touched, the central Institute at Bangalore by itself will not be sufficient. There must be itinerant lecturers who will spread the idea of useful home work amongst the people. They should be equipped with printed lectures, they should have lantern slides showing people, like men and women in the audience, working with simple appliances, they should be supplied with demonstration appliances in cases in which this is necessary and possible. All the staff will have to be directed and controlled by the Institute and this will be a very important part of the Institute's work.

8. Branch V of the scheme relates to a stage when the idea will have taken root in some minds and some people will come forward to try the scheme. They must be given every help and every facility in doing so. The things required should be at once made available. For this purpose the Institute should have a depot for selling implements and materials not readily available in the local market.

9. The requirements for giving the scheme a fair trial are briefly enumerated in the second part of para 3 above. Everything will not be required at once and the initial expenditure need not be large. All that is necessary as a beginning is to select a suitable officer and place him on special duty to develop the scheme. The several items of requirement may be supplied as the scheme develops and one branch after another is brought to the stage of practical action.

10. Of course there are numerous objections against home industries, or rather against the abuse of home industries as they are practised in some countries under certain circumstances. When home industries compete with existing industries, which form the chief occupation and source of living of a section of the population, and lower wages, they are no doubt harmful. But industries in India are yet few and it is certainly possible to organise home industries so as not to

interfere with vocational industries. Again it has been said that the majority of the agricultural and working classes in India who are cried down as inefficient or lazy and are under-worked, are also underfed. To give them full work by introducing home work schemes would mean that extra food will have to be given to them. The extra income earned by them, it is urged, will hardly meet the cost of this extra food and so, on the whole, there will not be more wealth. To this view, it may be replied that even if the whole of the extra earnings be swallowed up in better and more food, there will be immense gain on the whole. For it is better to have a fully fed and fully worked population rather than a half worked one. Another objection to the home work system is that the introduction of home work in a family would make the chief worker in the family receive less wages from his employer and so there will be no increase to the earnings of the family as a whole. This is indeed a serious obstacle to the system of home work in countries like the United States where the bulk of the population are wage-earners at the hands of large joint stock companies or trusts, and can be subjected at the pleasure of such employers to reduction of wages or sweating. But, in India, where agriculture or business on one's own behalf forms the occupation of the bulk of the population, circumstances are different. Judicious introduction of home work can certainly lead to material increase of the family income under such circumstances. It has also been urged as an objection against the introduction of home work that it makes men and women more toiling machines and takes away the brightness and cheerfulness of the home. This argument would of course have great force in a country where every man and women already has full and healthy occupation, but pressure or love of money leads people to work more by encroaching on the hours of legitimate rest and domestic duties. To India, where tens of millions of people have no work to keep them engaged for days together in a month and for many months of the year, the argument can have little application.

11. The various aspects of small and domestic industries have been carefully considered by Prince Kropotkin in his "Fields, Factories and Workshops." A few extracts from this valuable book are given in the Appendix. The great importance and extreme usefulness of home industries will be apparent from these extracts.

12. A beneficial and constructive scheme of this nature deserves support and encouragement. If successfully worked, it will tend to raise the earning power and ameliorate the condition of the great masses of our raiyat population. It will bring much needed relief to the families of our middle classes where, with the rise of prices and with the increasing struggle for existence, the pinch has already begun to be felt and the system under which half a dozen or a dozen people live on the unsupplemented income of a single individual is fast proving to be unsuitable. It may even be of use to the higher and more well-to-do classes, for filling up, with pleasing and healthy occupation, some of their vacant hours which are not more usefully employed at present. The object of the scheme is to prevent waste of time and waste of energy in every home and amongst all classes. Its aim is to fight idleness in all parts of the State and to prevent the numerous sins of which she is the proverbial mother. The scheme represents the first step of an attempt to cope with one of the most momentous problems which confronts the administrator and the economist in this country; the problem, namely, of removing that slackness and lifelessness, that apathy in respect of progress and development, which one meets with everywhere and on all sides. The Indian is not by nature dull or indolent. It is want of opportunity and want of proper training that has made him so in most cases. Given suitable opportunities and proper facilities, he can earn as much and become as industrious and efficient as members of any other race in the world. The scheme that is now proposed goes some way in providing thousands of people of this State with such facilities and such opportunities. It is proposed to begin the work on modest but thoroughly practical lines and to expand it gradually year by year. In towns, the scheme will immediately yield tangible results, and in the very first years the Institute may organize in Bangalore and other urban areas, a body of home-workers all of whom will materially increase the earnings of their respective families. To spread the work into our villages,

some more time will be required, but given suitable facilities and support, there is every reason to hope that the movement will rapidly extend into the interior, to the lasting benefit of our rural population.

13. It is therefore proposed that the Committee may now definitely recommend the scheme to Government. After the scheme is generally approved by Government and a grant made, a Sub-Committee may be appointed to work out the details of the scheme and, with the help of the Superintendent who may be appointed, start work.

B.—A HOME INDUSTRIES CENSUS FOR BANGALORE CITY.

14. It is also proposed that a "Home Industries Census" be undertaken for the Bangalore City. The lines on which the census should proceed will be clear from the form annexed. It is intended that such a form should be filled up after careful enquiry in respect of each family residing within the municipal limits of Bangalore City. If such a census be undertaken, the Home Industries Institute, when started, will be in a position to commence at one active and useful work as regards the city. Apart from the working of the proposed Institute, the information thus collected will be valuable in many other ways and the Home Industries Census for Bangalore is worth undertaking by the Industries and Commerce Committee as a work by itself.

15. It is estimated that the taking of the census, tabulating the result and preparing and publishing the report will occupy about six months. The cost will be about Rs. 1,700 in all thus:—

		Rs.
Pay of Supervisor at Rs. 50 a month	...	300
Printing 20,000 forms	...	300
Remuneration for filling up forms at ½ anna each	...	625
Rent at Rs. 15 a month	...	90
Two menials at Rs. 8 each	...	96
Two clerks for tabulation, etc., for three months at Rs. 30 each		180
Contingencies, etc., say	..	109
Total	...	1,700

If the Committee are of opinion that the work may be taken up a small Sub-Committee may be appointed to start and control the work and the Chairman requested to arrange for the necessary funds being allotted.

J. S. CHAKRAVARTI.

No. 6954-6—A. & I. 155-15-2, DATED 25TH MAY 1916.

FORM

(Vide paragraph 14 above.)

MYSORE ECONOMIC CONFERENCE.

INDUSTRIES AND COMMERCE COMMITTEE.

Proposed Institute of Home Industries in Bangalore.

Home Industries Census, Bangalore City.

NOTE.

With a view to see how far the starting of an Institute, according to the scheme detailed on page 11 *infra*, will prove useful to all sections of the population, it is proposed to collect some statistics and carry on some experimental operations during the year 1914-15 in Bangalore City. Complete information on the points noted overleaf is necessary in respect of all families residing within the municipal limits. The statistics when collected will be tabulated in a convenient form and published for general information. Experimental operations in the way of starting home industries and helping home workers will commence as soon as statistical information indicating the necessity of such operations, in respect of any particular industry, is forthcoming.

Citizens of all ranks are respectfully reminded that even the highest classes in a community should have home work of some kind suited to the tastes and capacities of the members of the family concerned; and no head of a family should feel any hesitation in furnishing the necessary information to the Agent of the Committee when he calls.

RULES FOR FILLING UP THE FORM.

1. The form should be filled up by the Agent in ink in legible English characters.

2. The Agent should call at a house at the time most convenient to the head of the family and obtain the required information in a respectful manner without giving any cause for offence or complaint.

3. The statement given by the head of the family will be noted by the Agent without question. If, however, he thinks that any answer requires verification by the Supervisor, he should enter the letter " V " after the answer.

4. If the Agent cannot get information readily on any point the letters I. N. A." indicating 'information not available' should be noted against the point. The Supervisor will in such cases obtain, after personal enquiry, the nearest possible approach to a correct answer and note it under his initials.

5. Ten per cent of the forms will be checked in detail by the Supervisor by calling on the family a second time. Such forms will be signed by the Supervisor with the remark "checked in detail". The other forms will be generally examined by him and signed. When any form is found on examination to be incomplete, the Supervisor will see to its completion.

No. 6954-6—A. & I. 155-15-2, DATED 25TH MAY 1916.

7	How many of the male family members are literate? ...Adult.....Juvenile.....Total..... How many of the female family members are literate? ...Adult.....Juvenile.....Total.....	
8	How many can read and write English? ...Males.....Females.....Total.....	
9	Does any member of the family supplement the income of the head of the family by any home work? If so, give details—	
	Number of workers ...Males.....Females.....Total.....	
	Nature of work	
	Approximate value of work per annum	

No. 6954-6—A. & I. 155-15-2, DATED 25TH MAY 1916.

10	Number of males who can and will take up home work ...Adult... .. .. ..Juvenile..... ....Total ..... Number of females who can and will take up home work ...Adult .. ..Juvenile.....Total	
11	Nature of home industry suitable.—Unskilled manual, Skilled manual, Skilled mechanical or Skilled artistic.	
	Is any of the following industries specially suitable ?—	
12	Paddy-hulling; Rope-making; Poultry-farming; Weaving, Hand-spinning; Basket-making: Sheep, goat and pig breeding; Oil-pressing; Pickle-making; Picture-decorating, Embroidery; Corn-grinding; Dairying; Knitting; Bamboo-work; Carpentry, Cane-work; Plain-sewing; Dress-making.	(*Here enter names of industries suitable*).
13	If not, what kind of home work would be agreeable ?	
14	Will any members attend a home work class if one is established in the locality ? Separate classes for males and females will be held, the latter being conducted by female instructors.	
15	Can the family purchase a machine for home work if free demonstration, training and trial are arranged for and arrangements made for advancing raw materials and for purchasing the finished product at reasonable price ?	Machine costing up to Rs. 25..... Do Rs. 100..... Do Rs. 250.....
16	If a home work machine is purchased for the family will the payment be made in a lump sum or by instalments on the hire-purchase system ?	
17	Can the family give orders for any class of work referred to in question 12 to the Home Industries Institute which the Institute can get done by home workers ?	
18	Are you in sympathy with the proposal to establish a Home Industries Institute ?	
19	Will you contribute any amount, however small, towards its funds ?	
20	Will you work for the Institute in respect of any branch of home work in your locality ?	

BANGALORE,

1914.

Signature of head of family.

No. 6954-6 -A. & I. 155-15-2, dated 25th May 1916.

SCHEME OF THE PROPOSED HOME INDUSTRIES INSTITUTE.

Branch I.—Study of Needs; Experiment.

1. Study of home industries and subsidiary occupations in different countries and publication of bulletins.
2. Study of subsidiary occupations as now practised in Mysore (*a*) in towns, (*b*) in the country.
3. Collection of various types of machines and appliances suitable for Home Industries—using them under actual working conditions—adapting them to local circumstances.
4. Thinking out new subsidiary occupations suitable to local conditions and inventing appliances therefor.

Branch II.—Demonstration and Training.

5. Stimulating enquiries and replying to enquiries by letter and in person.
6. Demonstration before visitors and enquiries.
7. Organization of public lectures for propagandic purposes.
8. Demonstration and teaching classes for women under lady teachers at the Institute and other centres.
9. Demonstration and teaching classes under male teachers at the Institute and other centres.
10. Stimulating the formation of such classes in district and taluk towns.
11. Introduction of training in suitable home industries in industrial and primary schools.

Branch III.—Business Organization.

12. Registration and classification of home workers in the City and getting into touch with them.
13. Taking steps to see that they get a regular flow of work by securing orders from the public and from dealers and distributing them among the registered workers.
14. Improving the standard and quantity of their work by seeing that they get the best machines, implements and raw materials.
15. Financial help in deserving cases by securing industrial loans or by other means.
16. Undertaking similar work as in 12 to 15 above in respect of other stations by the establishment of Home Industries Associations or otherwise.
17. To effect the necessary business organization that will be necessary before new subsidiary occupations can be introduced.
18. To direct home industries on right lines and see that they do not compete with and injure existing industries of the State.

Branch IV.—Propagandic work.

19. Propagandic work in connection with the extension of the scheme.

Branch V.—Sales depot.

20. A sales depot for selling implements and materials not readily available in the local market.

Requirements.

1. A suitable Superintendent
2. A building with a library, a workshop, an office, three or four demonstration and class rooms, a machine and implements hall and a sales room—on a small scale to begin with, to be developed as necessary.
3. A staff of clerks, mechanics, demonstrators, etc. To begin with, there may be one of each class. A lady Assistant to the Superintendent and a staff of menials are also required.
4. An itinerant staff—both male and female—for collecting information, for lectures, demonstrations, etc.
5. A suitable grant for purchasing various types of machines, materials for demonstrations and for contingencies.
6. A suitable advance for the sales depot.

No. 6954-6—A. & I. 155-15-2, dated 25th May 1916.

APPENDIX.

(Vide paragraph 11 above.)

Extracts from "Fields, Factories and Workshops" by Prince Kropotkin, Revised Edition, 1912.

(Figures at the end of each extract indicate the page; most of the italics are for this paper.)

I.—Importance of the Agriculturist or the Brain Worker having a Second Occupation of an Industrial Nature.

Each nation—her own agriculturist and manufacturer; each individual working in the field and in some industrial art; each individual combining scientific knowledge with the knowledge of a handicraft—such is, we affirm, the present tendency of civilised nations * * * (24—25).

The industrial nations are bound to revert to agriculture, they are compelled to find out the best means of combining it with industry, and they must do so without loss of time.

To examine the special question as to the possibility of such a combination is the aim of the following pages. Is it possible, from a technical point of view? Is it desirable? Are there, in our present industrial life, such features as might lead us to presume that a change in the above direction would find the necessary elements for its accomplishment? Such are the questions which rise before the mind. And to answer them, there is, I suppose, no better means than to study that *immense but overlooked and underrated branch of industries which is described under the names of rural industries, domestic trades, and petty trades*: to study them, not in the works of the economists who are too much inclined to consider them as obsolete types of industry, but in their life itself, in their struggles, their failures and achievements * * * (243).

In Russia, in France, in Germany, in Austria, and so on, millions and millions of workers are in the first case. *They are owners or occupiers of the land; they keep one or two cows, very often horses, and they cultivate their fields, or their orchards, or gardens, considering industrial work as a by-occupation. In those regions, especially, where the winter is long and no work on the land is possible for several months every year, this form of small industries is widely spread.* * * * *(224).*

Altogether, it is striking to observe, on perusing M. Ardouin Dumazet's little volumes, *how domestic industries go hand in hand with all sorts of small industries in agriculture* gardening, poultry-farming, fabrication of fruit preserves, and so on—and how all sorts of associations for sale and export are easily introduced. * * * (298).

The facts which we briefly passed in review show, to some extent, the benefits which could be derived from a combination of agriculture with industry, if the latter could come to the village, not in its present shape of a capitalist factory, but in shape of a socially organised industrial production, with the full aid of machinery and technical knowledge. In fact, *the most prominent feature of the petty trades is that a relative well-being is found only where they are combined with agriculture: where the workers have remained in possession of the soil and continue to cultivate it.* Even amidst the weavers of France or Moscow who have to reckon with the competition of the factory, relative well-being prevails so long as they are not compelled to part with the soil. On the contrary, as soon as high taxation or the impoverishment during a crisis has compelled the domestic worker to abandon his last plot of land to the usurer, misery creeps into his house. The sweater becomes all-powerful overwork is resorted to, and the whole trade often falls into decay. * * * (349—350).

Besides, in all the northern part of the temperate zone, the cultivators of the soil must have some sort of industrial employment during the long winter months. This is what has brought about the great development of rural industries, of which we have just seen such interesting examples. (358—359).

Note.—(This remark applies *mutatis mutandis* to Indian seasonal conditions. (J. S. C.)

No. 6954-6—A. & I. 155-15-2, dated 25th May 1916.

We maintain that in the interests of both science and industry, as well as of society as a whole, *every human being, without distinction of birth, ought to receive such an education as would enable him, or her to combine a thorough knowledge of science with a thorough knowledge of handicraft.* We fully recognise the necessity of specialisation of knowledge, but we maintain that specialisation must follow general education, and that general education must be given in science and handicraft alike. To the division of society into brain workers and manual workers, we oppose the combination of both kinds of activities; and instead of "technical education," which means the maintenance of the present division between brain work and manual work, we advocate the *education integrale*, or complete education, which means the disappearance of that pernicious distinction.

(369).

II.—Importance of Cottage and Home Industries—their vitality—they are not always killed by large factories.

It is especially in revising the chapters dealing with the small industries that I had to incorporate the results of a great number of new researches. In so doing I was enabled to show that *the growth of an infinite variety of small enterprises by the side of the very great centralised concerns is not showing any signs of abatement.* On the contrary, the distribution of electrical motive power has given them a new impulse. In those places where water power was utilised for distributing electrical power in the villages, and in those cities where the machinery used for producing electric light during the night hours was utilised for supplying motive power during the day, the small industries are taking a new development. (VI.)

(*Note.*—Mysore State enjoys this facility in an extraordinary degree J. S. C.)

The small industries are thus quite a world, which, remarkable enough, continues to exist even in the most industrial countries, side by side with the big factories. Into this world we must now penetrate to caste a glimpse upon it: a glimpse only, because it would take volumes to describe its infinite variety of pursuits and organisation, and its infinitely varied connection, with agriculture as well as with other industries. (248).

Whenever a crisis breaks out in some branch of the petty trades, there is no lack of writers to predict that, that trade is going to disappear. During the crisis which I witnessed in 1877, living amidst the Swiss watchmakers, the impossibility of a recovery of the trade in the face of the competition of machine-made watches was a current topic in the press. The same was said in 1882 with regard to the silk trade of Lyons, and in fact, wherever a crisis has broken out in the petty trades. And yet, notwithstanding the gloomy predictions, and the still gloomier prospects of the workers, that form of industry does not disappear. Even when some branch of it disappears, there always remains something of it; some portions of it continue to exist as small industries (watch-making of a high quality, best sort of silks, high quality velvets, etc.,) or new connected branches grow up instead of the old ones, or the small industry, taking advantage of a mechanical motor, assumes a new form. *We thus find it endowed with an astonishing vitality.* It undergoes various modifications, it adapts itself to new conditions, it struggles without losing hope of better times to come. Anyhow, it has not the characteristics of a decaying institution. In some industries the factory is undoubtedly victorious; but there are other branches in which the petty trades hold their own position. Even in the textile industries especially in consequence of the wide use of the labour of children and women—which offer so many advantages for the factory system, the hand-loom still competes with the power loom. (251).

How can we then explain the persistence of the petty trades? Many causes, however, most of which cannot be valued in shillings and pence, are at work in favour of the petty trades, and these causes will be best seen from the following illustrations. (252).

Consequently, to affirm that the small industries are doomed to disappear while we see new ones appear every day, is merely to repeat a hasty generalisation that was made in the earlier part of the nineteenth century by those who witnessed

the absorption of hand-work by machinery work in the cotton industry - a generalisation which, as we saw already, and are going still better to see in the following pages, finds no confirmation from the study of industries, great and small, and is upset by the censuses of the factories and workshops (283—284).

Of course, it would be a great mistake to imagine that industry ought to return to its hand-work stage in order to be combined with agriculture. Whenever a saving of human labour can be obtained by means of a machine, the machine is welcome and will be resorted to; and there is hardly one single branch of industry into which machinery work could not be introduced with great advantage, at last at some of the stages of the manufacture. In the present chaotic state of industry, nails and cheap penknives can be made by hand, and plain cottons be woven in the hand-loom; but such an anomaly will not last. The machine will supersede hand-work in the manufacture of plain goods. But at the same time, hand-work very probably will extend its domain in the artistic finishing of many things which are now made entirely in the factory; and it will always remain an important factor in the growth of thousands of young and new trades. (350-351).

III.—CAPACITY OF INDIAN WORKER.

As to the superiority of workmanship, nobody who knows the Hindu worker will doubt about his capacities. (57).

IV.—COTTAGE AND HOME INDUSTRIES IN ENGLAND.

The Sheffield cutlery—one of the glories of England—is not made by machinery: it is chiefly made by hand. There are at Sheffield a number of firms which manufacture cutlery right through from the making of steel to the finishing of tools, and employ wage workers; and yet even these firms - I am told by Edward Carpenter who kindly collected for me information about the Sheffield trade—let out some part of their work to the "small masters." But by far the greatest number of the cutlers work in their homes with their relatives, or in small work-shops supplied with wheel-power, which they rent for a few shillings a week. (274).

In England, as everywhere, the small industries are an important factor in the industrial life of the country, and it is chiefly in the infinite variety of the small trades, which utilise the half-fabricated produce of the great industries, that inventive genius is developed, and the rudiments of the future great industries are elaborated.

The small village jam-makers were the precursors and the rudiments of the great factories of preserves which now employ hundreds of workers. And so on (283).

V.—COTTAGE AND HOME INDUSTRIES IN FRANCE.

As regards France, the most interesting observations made by M. Ardouin Dumazet during his many years' travels all over the country give me the possibility of showing the remarkable development of rural industries, and the advantages which were taken from them for recent developments in agriculture and horticulture. (vii).

A considerable number of peasants who resort to small industries without abandoning agriculture would have to be added to the just-mentioned items, and *the additional earnings which these peasants find in industry are so important* that in several parts of France peasant proprietorship could not be maintained without the aid derived from the rural industries (285).

Market-gardening and fruit culture often go hand in hand with small industries. *And wherever well-being is found on a relatively unproductive soil, it is nearly always due to a combination of the two sister arts.* (286).

At the present time, the factories must have made further progress; but we still see from the excellent descriptions of M. Ardouin Dumazet, whose work will have in the future almost the same value as Arthus Young's Travels, that a considerable portion of the rural weavers has still survived; while at the same time one invariably meets, even nowadays, with the remark that *relative well-being is prominent in the villages in which weaving is connected with agriculture* (291).

No. 6954-6—A. & I. 155-15-2, DATED 25TH MAY 1916.

Within the curve made by the Loire as it flows past Orleans we find another prosperous centre of domestic industries connected with cottons. "From Romorantin (in Loire-et-Cher, south of Orleans) to Argenton and Le-Blanc," the same writer says, "we have one immense workshop where handkerchiefs are embroidered, and shirts, cuffs, collars and all sorts of ladies' linen are sewn or embroidered. *There is not one house, even in the tiniest hamlets where the women would not be occupied in that trade* and if this work is a mere *passe-temps* in vine-growing regions, here it has become the chief resource of the population." (295).

At Fougeres (*in* Ille-et-Vilaine, *to the north-east of Reims*) one sees how the factory has contributed to the development of various small and domestic trades. In 1830 this town was a great centre for the domestic fabrication of the so-called *chaussons de tresse*. The competition of the prisons killed, however, this primitive industry; but it was soon substituted by the fabrication of soft socks in felt (*chaussons de feutre*). This last industry also went down, and then the fabrication of boots and shoes was introduced, this last giving origin, in its turn, to the boot and shoe factories, of which there are now thirty-three at Fougeres, employing 8,000 workers (yearly production about 5,000,000 pairs). But at the same time domestic industries took a new development. Thousands of women are employed now in their houses in sewing the "uppers" and in embroidering fancy shoes. Moreover, quite a number of smaller workshops grew up in the neighbourhood, for the fabrication of card-board boxes, wooden heels, and so on, as well as a number of tanneries, big and small. * * * (296-297).

[*Note.*—This illustrates how, if the people once get accustomed to a form of home industry, they will always have profitable home occupation even if the original industry is injured by competition. It is the *habit* which is important. (J. S. C.]

In the woody regions of the Perche and the Maine we find all sorts of wooden industries which evidently could only be maintained owing to the communal possession of the woods. Near the forest of Perseigne there is a small burg, Fresnaye, which is entirely peopled with workers in wood.

"*There is not one house*," Ardouin Dumazet writes, "*in which wooden goods would not be fabricated.* Some years ago there was little variety in their produce, spoons, salt-boxes, shepherds' boxes, scales, various wooden pieces for weavers, flutes and hautboys, spindles, wooden measures, funnels and wooden bowls were only made. But Paris wanted to have a thousand things in which wood was combined with iron: mouse-traps, cloak-pegs, spoons for jam, brooms.....And now every house has a workshop containing either a turning lathe, or some machine tools for chopping wood, for making lattice-work, and so on .....Quite a new industry was born, and the most coquettish things are now fabricated. Owing to this industry the population is happy. The earnings are not high, but each worker owns his house and garden, and occasionally a bit of field" (300).

At Gien a large factory of china buttons (made out of felspar-powder cemented with milk) has lately been established, and employs 1,500 workmen, who produce from 3,500 to 4,500 lbs. of buttons every day. And, as is often the case, part of the work is done in villages. For many miles on both banks of the Loire, in all villages old people, women and children sew the buttons to the cardboard pieces. Of course, that sort of work is wretchedly paid; but it is resorted to only because there is no other sort of industry in the neighbourhood to which the peasants could give their leisure time.

In the same region of the Haute Marne, especially in the neighbourhood of Nogent, *we find cutlery as a by-occupation to agriculture.* (302).

In this last department, at Villaines, everyone is a basket-maker, "and all the basket-makers belong to a co-operative society," Ardouin Dumazet remarks "There are no employers; all the produce is brought once a fortnight to the co-operative stores and there it is sold for the association." (304).

In the neighbourhoods of Nantua and Cluses, silks are woven in nearly all villages *the peasants giving to weaving their spare time from agriculture.* (305).

No. 6954-6—A. & I. 155-15-2, DATED 25TH MAY 1916.

Finally, omitting a mass of small trades, I will only name the hat-makers of the Loire, the stationery of the Ardèche, the fabrication of hardware in the Doubs, the glove-makers of the Isère, the broom and brush-makers of the Oise (valued at £800,000 per annum), and the house machine-knitting in the neighbourhoods of Troyes. But I must say a few words more about two important centres of small industries: the Lyons region and Paris (309).

The banks of the Rhone, between Ampuis and Condrieu, are one of the wealthiest parts of all France, owing to the shrubberies and nurseries, market-gardening, fruit-growing, vine-growing, and cheese-making out of goats' milk. *House industries go there hand in hand with an intelligent culture of the soil*; Condrieu, for instance, is a famous centre for embroidery, which is made partly by hand, as of old, and partly by machinery (312).

The spinning mills and the large finishing factories were at Tarare, while the weaving of the muslins and the embroidery of the same were made in the surrounding villages, especially in the hilly tracts of the Beaujolais and the Forez. *Each peasant house, each farm and metayerie were small workshops at that time, and one could see, Reybaud wrote, the lad of twenty embroidering fine muslin after he had finished cleaning the farm stables, without the work suffering in its delicacy from a combination of two such varied pursuits.* On the contrary the delicacy of the work and the extreme variety of patterns were a distinctive feature of the Tarare muslins and a cause of their success. All testimonies agreed at the same time in recognising that, while agriculture found support in the industry, the agricultural population enjoyed a relative well-being (313).

(Note.—This shows how the supposition that our agriculturists cannot do any work requiring fineness of touch is not correct *J. S. C.)*

At Courts, 1,600 workers are employed in making "blankets," chiefly of the lowest sort (even such as are sold at 2*s.* and even 10*d.* a piece, for export to Brazil; all possible and imaginable rags and sweepings from all sorts of textile factories (jute, cotton, flax, hemp, wool and silk) are used for that industry, in which the factory is, of course, fully victorious. But even at Roanne, where the fabrication of cottons has attained a great degree of perfection and 9,000 power-looms are at work, producing every year more than 30,000,000 yards—even at Roanne one finds with astonishment that domestic industries are not dead, but yield every year the respectable amount of more than 10,000,000 yards of stuffs. At the same time in the neighbourhood of that big city the industry of fancy-knitting has taken within the last thirty years a sudden development. Only, 2,000 women were employed in it in 1864, but their numbers were estimated by M. Dumazet at 20,000; and, *without abandoning their rural work, they find time to knit, with the aid of small knitting-machines, all sorts of fancy articles in wool*, the annual value of which attains £360,000. (314—315).

Small Industries in Paris:—Linen, shoes, gloves, engraving, book-binding, manufacture of musical and mathematical instruments, basket-making, brushes, furniture, leather fancy goods, jewelry, artificial flowers, fine straw hats, glass-cutting, painting on glass and china, fancy buttons, mother-of-pearl, horn and bone. (461—62)

VI.—Cottage and Home Industries in Germany.

And finally, the recent publication of the results of the third industrial census made in Germany in 1907 gives me the data for showing how the German small industries have been keeping their ground for the last twenty-five years—a subject which I could touch only in a general way in the first edition (VII).

It is evident that a number of petty trades are already now doomed to disappear; but there are others, on the contrary, which are endowed with a great vitality, and all chances are in favour of their continuing to exist and to take a further development for many years to come. In the fabrication of such textiles as are woven by millions of yards, and can be best produced with the aid of a complicated machinery, the competition of the hand-loom against the power-loom is evidently nothing but a survival, which may be maintained for sometime by certain local conditions, but finally must die away.

The same is true with regard to many branches of the iron industries, hardware fabrication, pottery, and so on. But wherever the direct intervention of taste and inventiveness are required, wherever new patterns of goods requiring a continual renewal of machinery and tools must continually be introduced in order to feed the demand, as is the case with all fancy textiles even though they be fabricated to supply the millions, wherever a great variety of goods and the uninterrupted invention of new ones goes on, as is the case in the toy trade, in instrument-making, watch-making, bicycle making, and so on; and finally, wherever the artistic feeling of the individual worker makes the best part of his goods, as is the case in hundreds of branches of small articles of luxury, *there is a wide field for petty trades, rural workshops, domestic industries, and the like.* More fresh air, more ideas, more general conceptions, and more co-operation are evidently required in those industries. But where the spirit of initiative has been awakened in one way or another, we see the petty industries taking a new development in Germany as we have just seen that being done in France. (328—330).

In an immense number of trades it is not the superiority of the *technical* organization of the trade in a factory, nor the economies realised on the prime-motor, which militate against the small industry in favour of the factories, but the more advantageous conditions for *selling* the produce and for *buying* the raw produce which are at the disposal of big concerns. Wherever this difficulty has been overcome, either by means of association, or in consequence of a market being secured for the sale of the produce, it has always been found—first, that the conditions of the workers or artisans immediatly improved; and next, that a rapid progress was realised in the technical aspects of the respective industries. * * * (333).

Dr. J. Grunzel comes to a similar conclusion:—"*Life experience shows that the home industries are not a form of industrial organization which has had its time,*" he writes in his afore-mentioned work. "*On the contrary, it proves to be possessed of a great life force in certain branches.* It is spread in all branches in which handwork offers advantages above the work of the machine" (p. 46). It is also retained wherever the value of labour exceeds very much the value of the raw produce; and finally, in all the branches devoted to articles which are rapidly changing with the seasons or the vagaries of fashion. And he shows (pp. 46 and 149) how the home industries have been increasing in Germany from 1882 to 1895, and how they are widely spread in Austria, France, Switzerland, Italy, Belgium and England. * * * (474).

VII—Cottage and Home Industries in Russia.

The domestic industries so characteristic of Russia, and so necessary under her climate, occupy now more than 7,500,000 peasants, and their aggregate production was estimated a few years ago at more than the aggregate production of all the manufactures. It exceeded £180,000,000 per annum. I shall have an occasion to return later on to this subject, so that I shall be sober of figures and merely say that even in the chief manufacturing provinces of Russia round about Moscow, domestic weaving—for the trade—shows a yearly return of £4,500,000, and that even *in Northern Caucasia, where the petty trades are of a recent origin, there are, in the peasants' houses, 45,000 looms showing a yearly production of £200,000.* (38—39).

(*Note* -There is no reason why small industries suitably introduced should not similarly flourish in our raiyats' homes. *J. S. C.*)

At the present time only a little more than 1,500,000 men and women, out of the 112,000,000 strong population of European Russia, work in manufactures, *and 7,500,000 combine agriculture with manufacturing.* This figure may treble, without Russia ceasing to be an agricultural nation; but if it be trebled, there will be no room for imported manufactured goods, because an agricultural country can produce them cheaper than those countries which live on imported food. (42).

Besides, in the fifteen volumes published by the Petty Trades Committee, and still more in the publications of the Moscow Statistical Committee, and of many provincial assemblies, we find exhaustive lists giving the name of each worker, the

extent and the state of his fields, his live stock, the value of his agricultural and industrial production, his earnings from both sources, and his yearly budget; while hundreds of separate trades have been described in separate monographs from the technical, economical, and sanitary points of view.

The results obtained from these inquiries were really imposing, as it appeared that out of the 80 or 90 million population of European Russia proper, no less than 7,500,000 persons were engaged in the domestic trades, and that their production reached, at the lowest estimate, more than £150,000,000 and most probably £200,000,000 (2,000,000,000 roubles) every year. It thus exceeded the total production of the great industries. As to the relative importance of the two for the working classes, suffice it to say that even in the Government of Moscow, which is the chief manufacturing region of Russia (its factories yield upwards of one-fifth in value of the aggregate industrial production of European Russia), the aggregate incomes derived by the population from the domestic industries are three times larger than the aggregate wages earned in the factories.

The most striking feature of the Russian domestic trades is that the sudden start which was made by the factories in Russia did not prejudice the domestic industries. On the contrary, it gave a new impulse to their extension; they grew and developed precisely in those regions where the factories were growing up fastest.

Another most suggestive feature is the following: although the unfertile provinces of Central Russia have been, from time immemorial, the seat of all kinds of petty trades, *several domestic industries of modern origin are developing in those provinces* which are best favoured by soil and climate. Thus, the Stavropol Government of North Caucasus, where the peasantry have plenty of fertile soil, *has suddenly become the seat of a widely developed silk-weaving industry in the peasants' houses, and now it supplies Russia with cheap silks which have completely expelled from the market the plain silks formerly imported from France.* In Orenburg and on the Black Sea, the petty trades' fabrication of agricultural machinery, which has grown up lately, is another instance in point. * * * (344 to 346).

(*Note.*—Cannot new home industries introduced into Mysore similarly expel from its markets many varieties of foreign stuff? *J. S. C.*)

As to the relations between agriculture and industry, *one cannot peruse the documents accumulated by the Russian statisticians without coming to the conclusion that, far from damaging agriculture, the domestic trades, on the contrary, are the best means for improving it,* and the more so, as for several months every year the Russian peasant has nothing to do in the fields. * * * (347).

VIII.—COTTAGE AND HOME INDUSTRIES IN SWITZERLAND.

If all that be taken into consideration, we must agree with the conclusion that the "domestic trades have in Switzerland a much greater extension than in any other country of Europe" (save Russia), which we find in an elaborate recent work, published in connection with the 1910 exhibition of Swiss domestic industries, and edited by Herr Jac. Lorenz (*Die Wirtschaftlichen und sozialen Verhaltnisse der Schweizerischen Heimarbeit, Zurich, 1910 1911, page 27.*)

A feature of importance which appears from this last work is, *that more than one-half of the workers engaged in domestic trades have some other source of income besides these trades. Very many of them carry on agriculture,* so that it has been said that in Switzerland "the domestic trades question is as much a *peasant question* as a labour question."

No. 50-4—E. A. G., DATED 9TH MAY 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

RAILWAY DEPARTMENT.

READ—

Correspondence ending with letter No. 844, dated the 10th December 1915, from the Superintendent, Government Stationery, submitting for approval a list of questions for the periodical inspection of his office.

Order No. 50-4—E. A. G., dated 9th May 1916.

The draft inspection form submitted by the Superintendent is approved with slight modifications and printed as an appendix to this Order.

The Superintendent will hold inspection of his office along with the annual stock-taking and report the result to Government in the prescribed form within a month after completion of the inspection.

D. M. NARASINGA RAO,
Secy. to Govt., Gen. Dept.

To—The Superintendent, Government Stationery.

Exd.—C. S.

No. 59-4—E. A. G., DATED 9TH MAY 1916.

MEMO OF QUESTIONS FOR THE INSPECTION OF THE OFFICE OF THE SUPERINTENDENT, GOVERNMENT STATIONERY.

---

1. **Name** of Inspecting Officer with designation.

2. **Duration of Inspection** { Date commenced . . . . . Date concluded . . . . . .

3. **Previous Inspection** { Date . . . . . Name of Inspecting Officer . . . . . .

QUESTIONS

I. General

1 Is the office accommodation sufficient and suitable? Are the rooms and premises kept clean?

2. Is an attendance register in use? Is the attendance regular? Who checks the register daily?

3. How many clerks are working in each branch of the office and what is the qualification of each?

Service Registers, Lists of Establishments, etc

4. Is an up-to-date list of the establishment both clerical and menial maintained?

5. Is a record of the qualifications and services of the ministerial officers maintained up to-date?

6. Is a service register maintained for every permanent official and brought up-to-date? Are these registers arranged in order and kept in the records in a separate box? Who keeps the key of the box?

7. Is an office order book maintained? Are orders of leave, punishment, etc., regularly recorded and given effect to?

8. Is a register of applications for appointments maintained and are selections made therefrom?

9. Are all appointments made in accordance with rules pertaining to the Department?

Distribution of Work.

10. Is a record of the distribution of work among the several clerks in each branch maintained? Is the work assigned to each official sufficient without being excessive?

11. Does each official maintain a diary and do the entries show sufficient work for each day?

What is the general condition of the work indicated by these records? Is it up-to-date and efficient?

Arrear Lists.

12. Does every official in each branch prepare and submit once a month a list of references pending with him as required by Rule 14 of the General Rules of Office Procedure? Are these lists consolidated by the Head of the Branch and is a statement submitted by the 5th of the month following?

13. Are these lists scrutinised carefully by the ministerial head of the office and reminders sent promptly where necessary?

Reports and Returns.

14. Is a statement of the periodical reports and returns due from each branch prepared and maintained up-to-date? Are the due dates, the dates of actual submission and the names of the clerks responsible for their preparation noted therein? Is it scrutinised monthly by the head of the office? (*Vide* Rule 6 of the Efficiency Rules.)

How many and which returns were overdue at the time of inspection?

Furniture List.

15. Is a register of furniture maintained? Are all articles of furniture entered therein together with details as to the cost and date of purchase of each? Is the register verified once every quarter and the result reported to the head of the office? Is a note made in the register of all articles lost or which have become unserviceable? Is the furniture adequate to the needs of the office or more than necessary? What is the condition of furniture kept?

Stationery and Forms.

16. In whose custody is the office stationery? Are the stock and issue registers regularly maintained? Are they submitted monthly for the inspection of the officer in charge? Is a verification by stock-taking done once a year?

Is a general indent book maintained for monthly issue of stationery?

Are old and unserviceable articles sold by public auction and the proceeds credited to Government? (*Vide* Rule 19 of the Stationery Rules.)

17. Who keeps the stock of forms? Where are they kept? Are they neatly arranged? Are all receipts and issues noted in a register?

18. Is a register of periodical issue of stationery maintained? (*Vide* Rule 36 of the Stationery Rules). Are stationery and form indents from the indenting officers received in due time and attended to promptly?

File of Standing Orders.

19. Is a complete set of the standing orders of Government relating to the work of each branch of the office maintained? Are these files complete and up-to-date?

Is each provided with a table of contents and, if bulky, also an index?

20. Is a similar file maintained of circulars issued from the office?

Library.

21. In whose charge is the office Library and where is it kept?

22. Is a register maintained for entering books and publications as they are received and is it written up-to-date?

23. Are all books received into the Library correctly labelled and deposited in their appropriate places?

24. Are all correction slips inserted in their proper places in the volumes of enactments, rules, etc.?

25. Are any books issued without a receipt or lent to strangers without the permission of the head of the office?

26. Is a monthly report of books removed and not returned submitted?

27. Are cases of loss or of damage to any books reported promptly and orders obtained for their replacement?

II CORRESPONDENCE REGISTERS.

28 Are the registers of inward and outward correspondence properly maintained with cross references regularly marked?

29 How many of such registers are maintained? Are a peon book and tappal book maintained?

30 Are the registers written up neatly? Are the entries concise and clear?

31 Are all receipts classified in the manner laid down in Rule 11 of the General Rules of Office Procedure?

32. Is there any delay in the fair-copying and despatching of letters? Are all papers despatched invariably on the day they are signed or the following day? A few issues may be examined with reference to the refer book, peon book and tappal book.

33 Is the issue register checked once a month by the ministerial head of the office?

34 Is an *amad* register maintained to enter all covers as they are received in the Branch?

35 Are all the registers periodically examined by the ministerial head of the office and signed by him in token of his inspection?

III. CASH AND CONTINGENCIES.

36 Are the following registers prescribed by Rule 25 of the General Rules of Office Procedure maintained?

(1) Cash Book.

(2) General ledger or classified abstract of the monthly totals of the Cash Book.

(3) Contingent Register.

(4) Order book for contingent charges.

37. What is the amount of permanent advance held by the office? Is an account of it correctly kept? What is the balance on hand? Is it forthcoming?

38 Is there any money on hand awaiting remittance to the Treasury or payment to parties? Details may be furnished.

39 Are there any long standing advances made out of the office imprest, awaiting adjustment? Details may be furnished.

40. Are all charges incurred on account of contingencies entered in the contingent register from day to day? *Vide* Article 81 of the Civil Account Code. Are totals struck at the end of the month?

The necessity for any unusual charges may be scrutinised.

41. Are all contingent charges incurred under due authority, sanction of higher authorities being obtained where necessary?

42. Is the abstract contingent bill drawn at the end of each month in the manner laid down in Article 83 of the Civil Account Code and are the initials of the head of the office obtained?

43 Is the expenditure kept within the budget grant?

14. Are the detailed contingent bills of each month submitted with vouchers regularly by the 1st week of the succeeding month as required by para 210 of the Mysore Treasury Manual? Are all disallowances promptly deducted from the succeeding contingent bills?

Is the account of service postage labels correctly written up? Who keeps them and where? Does the stock on hand agree with the book balance?

15 Are salary bills prepared with reference to the attendance register, leave register and office order book? Are drafts of the pay bills maintained?

16. Is an acquittance roll maintained? Are all salaries drawn duly disbursed and proper receipts taken therein? Is a stamped receipt obtained for payments of over Rs. 20? Is the register examined every month by the head of office?

17. Are the bills and payments posted in the cash book?

18. Is undisbursed pay shortdrawn invariably in the pay bill of the next month?

19. Is necessary sanction obtained for drawing the pay or allowances of incumbents of appointments requiring sanction of the higher authorities?

20. Are all sums drawn on travelling allowance bills disbursed and acquittance taken?

21. Are drafts of the office travelling allowance bills maintained in a register?

Is there any undisbursed travelling allowance kept? Is it disposed of in accordance with Government Order No. Fl 2187-235—S & A 63-15-4, dated 19th November 1915? Have personal claims of officers to pay, allowances and increments been discharged without delay? If any are delayed, what is the cause for the same?

22. Are pension applications prepared and submitted in time as required by Government Order No. Fl. 7215-55—S & A 484-08-1, dated 7th May 1909?

23. How many cases are pending and why The last pension quarterly may be reviewed.

IV. RECORDS.

24. The rules, if any, under which the records are arranged may be quoted If no such rules exist, the system of arrangement followed, subjectwar or chronological, etc., may be briefly explained.

25. Are all the records sorted according to the prevailing system? If not what is the quantity of papers remaining to be sorted? What time is necessary to complete their sorting?

26. In whose charge are the records kept? Are records permitted to be removed without a substitute slip signed by the requisitioning official?

A list of the records taken out of the record room and outstanding for long periods may be given.

27. Have rules been framed for regulating the periodical destruction of unserviceable records and have all time expired papers been eliminated according to such rules?

No. 50-4—E. A. G., DATED 9TH MAY 1916.

Miscellaneous.

58. Is an inspection minute book maintained and written up as laid down in para 4 of Government Order No. 10870-918—E. A. 43-14-1, dated 10th April 1915?

59. Extent to which points noted for action at previous inspections have been attended to?

60. Any irregularities or informalities observed in the course of inspection, whether connected with the printed questions or not and suggestions, if any, for improving the efficiency of the working of the office.

No. 5-2 -E. A. G., dated 22nd May 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. 1865, dated the 11th February 1916, from the Inspector-General of Registration in Mysore, submitting for approval a draft manual regulating work and procedure in his office.

Order No. 5-2—E. A. G., dated 22nd May 1916.

The manual requires revision on the following lines:—

(1) The nature of the closed files and the mode of their arrangement may be explained.

(2) How are open files numbered? Do the numbers run serially right through or are they begun afresh every year? This should be specified.

(3) The stage at which the papers are to be transferred to the record room should be mentioned.

(4) The maintenance of a separate "Remind Register" contemplated in Rule 24, in addition to the "clerk book" referred to in Rule 19 is superfluous, as all intermediate references can conveniently be noted in the "clerk book" itself by the disposal clerks.

(5) In the attendance register, two additional columns may be opened before the "remarks" column to show the number of days late and the number of days absent on causal leave during the month, in the case of each official.

(6) In the list of returns due in and from the office, the dates and authority prescribing may be given.

2. Subject to these alterations and corrections made in the body of the book, the manual is approved. The Inspector-General is requested to get the manual printed and forward one dozen copies for use in the Secretariat.

Disposal Number System

No. 77 –E. A. G. dated 17th May 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Order No. 77–E A. G. dated 17th May 1916.

The attention of the Government has, for some time past, been drawn to the necessity of improving the system of registering and disposing of official correspondence in several departments of the State. The filing of papers in chronological order which prevails in some offices, and the practice of arranging correspondence by subjects which prevails in others are neither satisfactory, and difficulties having been experienced owing to the growth of correspondence and the complexity in the nature of the work in several departments and offices in dealing adequately with all matters that come up for disposal, in checking arrears of work and in taking timely action according to the needs of each case it has been considered necessary to devise a method for the better arrangement of records as well as periodical destruction of papers. With these objects in view, the Government, after necessary investigation, circulated a set of draft rules based mainly on the Madras Disposal Number System for the opinion of the Heads of Departments and Deputy Commissioners of Districts, in their Memorandum No. 875-920—E. A., dated 22nd June 1915. The opinions expressed in the majority of instances are favorable to the introduction of the system, although there are some officers who have raised certain difficulties as regards its immediate introduction into their offices.

2. Government have given their most careful consideration to the matter and are pleased to order that the Disposal Number System as described in the rules now approved, a copy of which is appended to these Proceedings, should be introduced in the offices of the Revenue Commissioner and the Deputy Commissioners of Districts, with effect from the 1st July 1916. The Revenue Commissioner is requested to take immediate steps so that all the necessary arrangements to introduce the system from the above date, may be completed in time, and the introduction facilitated simultaneously in his office as well as in all the Deputy Commissioners' offices under his control.

3. It will be observed from the rules that the greatest importance is attached to the Current as well as the Disposal register. The former keeps automatically a record of all the business that comes up for disposal, helps the checking of arrears at any stage of correspondence, and locates the responsibilities on account of delay or neglect. The Disposal register, on the other hand, provides the means of recording and indexing all disposed of correspondence, affords information to the inspecting officers at a glance, as to the period taken for disposal, and gives a correct guide for the destruction of records according to the schedule laid down, after they are no longer required for reference.

4. In following the Disposal Number System, particular attention is necessary in regard to the general scheme of arrangement of records, the determination of the registers required to be maintained under Rule 21, the elimination of papers from the system, which do not require registration under Rule 30, the framing of a stock list of periodical returns and reports and a stock list of registers under Rules 25 and 63, and the classification of all disposals under R and D series to facilitate preservation and periodical destruction. Although the rules appear to be somewhat elaborate, there is no reason to suppose that their introduction will entail any additional labor or trouble to the existing establishment. Government therefore desire to impress on the Heads of all the offices to which the system will now apply, the necessity of directing the chief ministerial officers thereof to get themselves closely acquainted with the rules and to be personally responsible for strict

No. 77—E. A. G. DATED 17TH MAY 1916.

adherence to them in future. No proposal for the entertainment of any additional staff will, on this score, be viewed with favor until some experience has been gained of the working of the system in the chief Revenue offices of the State.

5. The Revenue Commissioner is requested to issue such instructions as will ensure registration of all pending papers on the 1st July 1916, in the new registers now prescribed. The introduction of the scheme need not, however, affect the arrangement of the old records for the present. Separate orders will issue for the sorting of these records and for steps to be taken in due course for the destruction of unnecessary records. The period of preservation of the different classes of registers prescribed under the system is given in Rule 74 which should be carefully followed. It is also necessary to make a careful discrimination between papers that are fit for retention permanently and those fit for destruction after a period of two and ten years respectively. The Revenue Commissioner is requested to prepare a schedule classifying all the records and correspondence relating to the Revenue Department arising in his own office and in the offices of the Deputy Commissioners noting against each the period of destruction and submit the same for the approval of Government.

6. All necessary registers and forms will be printed and may be obtained on indent from the Superintendent, Government Stationery.

7. The Revenue Commissioner is requested to make a special report on the working of the system at the end of one year.

8. The question of introducing the system in other departments and offices will be taken up in due course when the departmental manuals concerning those offices are finally approved of by Government.

D. M. NARASINGA RAO,
Secy. to Govt., Gen. Dept.

To—The Revenue Commissioner.
The other Heads of Departments.
The Deputy Commissioners of Districts.

Annexure.

RULES OF CORRESPONDENCE AND RECORD.

I. INTRODUCTION.

Brief explanation of the Disposal Number System.

The practice hitherto has been to register inward correspondence in one book or in one set of books and the outward correspondence in a different book or set of books. Under the Disposal Number System all papers whether they form inward or outward correspondence are registered in one register known as the "Current Register" and all entries relating to a particular correspondence are grouped together. This continues so long as the correspondence is pending. When disposal is reached, that is to say, when the file is closed, it is carried forward to what is called the disposal list and there serially numbered, this serial number being noted at the same time in the Current Register. The disposal number is put on he communication or order closing the correspondence and becomes the number of the entire file by which it is ever afterwards known.

2. The Disposal Number System thus employs two registers which at first sight might appear to resemble the "From" and "To" Registers now in use, but the resemblance is only superficial.

The Current Register is intended to keep track of all correspondence both inward and outward, till it is disposed of. It is a combined register of receipts and issues, and the entries relating to any particular correspondence are grouped together so as prominently to show the stage at which the correspondence stands and whether it is pending in the office or outside.

3. The disposal list is not the ordinary "To" Register. It takes no note of intermediate communications but only of disposals, that is, letters or orders which close a correspondence, and these orders need not necessarily be communicated to any one; papers which are recorded in the office are, for instance, entered in the list. The disposal list is a register of disposed of files entered in such a way that their recording, indexing, arrangement in the record room and destruction could be effectually regulated thereby. It controls the work of the record staff, while the Current Register controls that of the disposing staff.

4. The Current Register is maintained in divisions so as to separately register ordinary correspondence, petitions periodical returns, etc., but this arrangement is only one of convenience and is not an integral portion of the system.

5. Similarly, the disposal list is written in two series representing important and ordinary papers. The former have to be permanently preserved and the latter for specified periods prescribed in the schedules framed for the purpose.

6. It has been stated above that the initial number given to a paper is continued, while it remains current, but that on disposal it is given a fresh serial number in the disposal list. The object of this is that there should be no break or discontinuity in the numbering of the files sent to the record room, and that they might be arranged in the order of their numbers. This makes abstraction impossible.

Chronological filing system and its defects.

7. There are two systems of record arrangement in vogue at present. Under the one papers received and those issued are arranged chronologically in separate series. This is a simple arrangement and one which utilises the "From" and "To" numbering and registers. But it is antiquated and inconvenient for reference and has been given up in all modern business.

Subject bundle system and its defects.

8. The other arrangement consists in grouping together papers relating to the same subject. This has certain advantages namely that it facilitates referencing where it is carefully worked, but unfortunately it gives no guarantee that it is so worked. The "From" and "To" registers are of no use for the final record arrangement. The unit of registry is an individual paper, while the unit of record arrangement is a subject bundle and the two do not dovetail into one another. The merit of the system prescribed by these rules is that the unit of registry as well as of record arrangement is a file and the disposal list is an exact inventory of the records. And the fact that this inventory is prepared simultaneously with the issue of the order or communication closing a file ensures that every paper received in the office is transmitted to the record room as soon as it has ceased to be current. That which is not wanted is always in the way and one fruitful source of confusion and delay at present is the habit of clerks keeping with them disposed of papers along with those which have to be worked up.

9. But perhaps the greatest drawback of the subject arrangement is that it is puzzling and that the precise category under which a paper falls is often times difficult to determine. As the result of doubt in this regard, files received in the record room are indefinitely left over without being arranged on the shelves. The Disposal Number System dispenses with all record sorting and adopts a simple numerical arrangement. For proper referencing it is no doubt necessary that this should be supplemented by a subject index but such an index is comparatively easy to prepare when once the records are in order. Indexing possesses this advantage over sorting, that it admits of classification under any number of subjects. And just as the disposal list places a ready means of controlling delay in handing over disposed of papers into the record room, it also furnishes a check over delay in the indexing of papers.

10. One other disadvantage of the subject bundle system is that a file has no finality and can be added to as a fresh correspondence crops up. The earlier disposals are merged in and obscured by the later disposals and the accountability of the record establishment for disposed of papers is thereby weakened and referencing rendered difficult. If the later disposals strictly arose from or were vitally connected with the earlier papers, the harm would not be so great but frequently papers remotely connected with a subject are put up with and are absorbed in a later file. This leads to difficulty in tracing the papers and if recovered, they would be found mixed up with many unrelated papers.

Under the Disposal Number System, such inconvenience cannot arise. A file which is once closed with a disposal number is never re-opened and further correspondence, if any, must go into another file to which the former is chained.

Business Statistics.

11. The difference between issues which dispose and those which do not forms the main principle of the system and enables business statistics being prepared on a rational and comprehensive basis. At present the business statistics reveal very little that is worth knowing. There is no definition of disposal and the smallest reference sent out on a paper is held to conclude it. According to these rules no paper is to be treated as having been disposed of till an office has completed the work for which it is responsible and the list of papers not so disposed of can be accurately made out from the Current Register.

12. The disposal list on the other hand furnishes an equally accurate record of arrears in sending disposed of papers to the record room and in indexing them, operations which are at present susceptible of little control.

The periodical system.

13. Periodicals which differ from ordinary correspondence in having a fixed date are displayed with current numbers beforehand in a special register instead of being booked as they arise like ordinary correspondence.

II.—DEFINITIONS.

Current.

14. A "Current" is a paper which whether it arises in the office or is received therein from outside, initiates a correspondence.

File.

15. A "File" is a bundle of papers forming a connected correspondence. It begins with a current and ends with a disposal. Office notes, etc., are also included in a file.

Disposal.

16. A "Disposal" means a communication or order by which a correspondence is closed and the responsibility of an office (as regards such correspondence) discharged. The term 'disposal' is used also to indicate a disposed of file.

Reference.

17. A "Reference" is an intermediate communication calling for information, asking for orders and so forth.

"Recorded."

18. This is one of the forms of disposal. It means "keep in the office and do not communicate." Recorded papers should be carried forward to the appropriate disposal list (R or D) and there numbered and they should also be indexed, if necessary, like any other disposal.

"Lodged."

19. "Lodged" is one of the forms of disposal and means "keep in the office and do not communicate." It differs from "recorded" in that it is used of papers of ephemeral importance which may be destroyed after two years. Lodged papers need not be indexed.

"Filed."

20. This is similar to "Lodged." But the papers go into circular files and do not pass into the record room.

III.—REGISTRATION.

Registers required

21. The most important of the several registers required to be maintained in an office are the Current Registers and the Periodical Registers. They take up

all papers which are in a pending stage whether they have been received in the office or have arisen in the office and operate as useful checks on the work of the office generally to the stage at which papers are handed over to the Record-keeper.

In addition to these registers the following special registers must be maintained where necessary :—

(1) Register of papers received from higher offices.
(2) Petition register.
(3) Register of papers received in camp or tour register.

Whether all or any of these registers are to be maintained in particular offices will depend upon the volume and nature of their work. In the case of very small offices with little correspondence one Current Register and one Periodical Register will suffice and even the latter may in some cases be dispensed with. The Petition Register is unnecessary in an office in which the number of petitions received does not exceed 50 on an average, *vide G. O. No. 8721-70—E. A. 33-14-1*, dated 11th February 1915. The Tour Register is of course intended only for offices the Heads of which are required to tour.

The Current Register.

22. The Current Register will be in Form I (Appendix).

23. Each independent branch of an office may keep its own Current Register (running for the official year) or one register may be maintained for the whole office, according to convenience and practice.

In the case of papers arising in the office, columns 2, 3 and 4 should be left blank.

Differences of language should not be recognised in registering, which must always be in English, whatever the language of the correspondence may be.

The general principle of registering is that there is only one current entry and one current number for each file ; but if for any reason this principle is departed from, the different current entries must be cross-referenced back and forwards to the earliest entry.

From this principle it follows that the reply to a reference should not be entered as a new item but should appear under colum 8 (*b*). To this, however, an exception is admitted. Where it is desired to have a daily record of all communications received in an office a reply to a reference may be given a new current number, but it should be immediately

"transferred" to its appropriate current, a note to that effect being made on the currents and also in the Current Register. For example, if No. 1200 is a reply to a reference on current No. 1000, a note "transferred to C 1000" should be made against C 1200 in the disposal columns which should be closed at once; against C 1000 in the reply column, the entry 1200 with date will be made.

It should be borne in mind that the earliest current entry is the primary one, and that against it, the course of correspondence should be exhaustively displayed.

A reminder received on a current should not be shown as a new item but should be entered under column 2 in red ink.

Reminders sent to other offices should be entered in red ink under column 8 (*a*).

Ample space should be left under each entry for making subsequent entries.

Papers registered in one of the special current registers (*e. g.*, Periodical, Petition or Current Registers for higher offices) need not be registered in the General Current Register. The object is that the several registers should not overlap one another. Papers registered in the Tour Register should, however, be transferred to the Current Register as early as practicable.

The entries should be very brief, and particular care should be taken to underline the catchword in column 5.

Three months after the close of each official year, that is to say, on the 1st October all papers of the previous year remaining undisposed of should be carried forward under their old numbers to the new year's Current Register, a few pages being left blank for the purpose. When an entry in the Current Registers is thus carried forward, the fact should be noted against the entry under column 8 of the original register thus:— *Vide* No..... in the register of... .....

Periodical Register.

24. Periodicals are not registered in the Current Registers but in the special register kept for that purpose which will be maintained in Form II (Appendix).

Mode of writing up the Periodical Register.

25. The Periodical Register is written in the same way as the ordinary Current Register, but columns 2, 3, 4 and 5 are entered beforehand once a quarter. Like the Current Register, this is a combined register of periodicals coming into the office as well as of periodicals sent out of it.

A list of periodicals for the submission, scrutiny or review of which an office is responsible should be kept in every office and changes, if any, should from time to time be posted in it. This is a permanent list and should be kept in Form III (Appendix).

Each periodical is numbered in the stock list and to each issue of a periodical a subsidiary number is given. Thus if the return of fresh men entertained in service bears the number 50 and is a quarterly, the return for the first quarter will be periodical No. 50·1, for the second quarter 50·2, for the third quarter 50·3 and for the fourth quarter 50·4. Similarly in the case of a monthly return bearing No. 60, the return for the first month will be 60·1 for the second 60·2 and so on.

From this list the Periodical Register is prepared by entering in it at the commencement of each quarter the several returns and reports in the order of their falling due. A monthly return should be booked twelve times in the register and a quarterly four times and so on. If a return is obtained from ten offices say, for review or for sending up a consolidated return to a higher office, it should be booked only once in the register, the names of the ten offices furnishing information being noted in column 7.

Register for correspondence with higher offices.

26. The headings of the several columns of this register are exactly the same as those of the general Current Register.

Petition Register.

27. All petitions addressed to the office whether sent by post or presented in person should be entered in this register which will be maintained in Form IV (Appendix).

(1) Number in the register.
(2) From whom received.
(3) Taluk.
(4) Village.
(5) Value of Court-fee stamps attached and enclosures.
(6) Date of receipt.
(7) Purport of the current with catchword underlined.
(8) Reference sent out, date and to whom, with brief abstract. Copy of the reference, if sent in original.
(9) Outside number and date of reply.
(10) Number and date of disposal if disposed of by number. Copy of the order of disposal in other cases.

NOTE.—Endorsed petitions received from higher authorities for disposal should be entered as ordinary papers in the Current Register and should not be brought into the Petition Register.

The form of Petition Register prescribed by G. O. No. 8721-70—E. & A. 33-14-1, dated 11th February 1915, and the instructions given therein for writing it up will be regarded as superseded in offices in which the disposal number system is introduced.

Tour Register

28. Papers received in Camp by touring officers should be entered in this register and sent as early as practicable for being entered in the ordinary "Receive" Register of the office. The tour register is exactly similar in form to the Current Register.

Numbering Currents.

29. Every new current should be numbered consecutively and the number should be entered in red ink at the top of the first page of the paper. The name of the branch or of the special register should invariably be affixed as also the year thus:—Current No. 50 (Magisterial) 1915-16. In the case of petitions and periodicals, the word "periodical" or "petition" as the case may be should be substituted for "current." Papers entered in the Tour Register should be numbered in the same manner as those in the Current Register except that the word "tour" is substituted for the word "current."

Papers that need not be registered.

30. The general rule is that every paper received in an office should be registered in the appropriate "Receive" register. But where special and technical registers are maintained in respect of any classes of papers, *e.g.*, loan applications, darkhasts etc., they need not be entered in the Current Register. Papers of obviously transitory importance such as post cards of rain gauge readings, plague and cholera reports of other districts, if numerous or frequent, need not be entered in the registers. A list of papers which need not be registered should be prepared and maintained in each office under the sanction of the head of the department.

IV.—REFERENCING AND DRAFTING.

Transfer of papers to disposing clerk.

31. Every current as soon as it is registered should be handed over to the clerk who deals with the subject to which it relates, the name or designation of the clerk and the date on which it is so handed over being entered under column 6 of the Current Register. The initials of the clerk to whom the paper is given should be taken in the Current Register against the entry of the paper. Where this is

not found practicable, a small book may be kept, in which the numbers alone of the currents should be noted and the initials of the clerk to whom the papers have been handed over obtained. These precautions, however, are generally unnecessary in the case of small offices.

Duties of disposing clerk.

32. The duties of the disposing clerk are :—

(1) To register the papers in his personal register if one is kept under the rules below.

(2) To cause previous papers to be put up.

(3) To carry the current through all subsequent stages till he is relieved by disposal.

The maximum time allowed for referencing will be ordinarily seven days. In important or emergent cases the time must of course be less. If it proves impossible to draft on a paper within the maximum period, it must be put up for perusal with a remark to that effect.

Personal register of disposing clerk

33. In offices in which there are more than five clerks, disposing clerks may be required by the head of the office to maintain a personal register in Form V (Appendix).

The register will be maintained as follows :—

When a paper is given to a disposing clerk, he will enter in the column 1 the number which the paper bears in the Current Register and the date on which he received it ; and should the papers be disposed of without an intermediate reference, he will enter the disposal in column 4. Should an intermediate reference be sent out, he will enter in column 2 the date on which it is issued and the name of the officer to whom it is sent; when the reply is received, the number given to the reply by the outside office and the date of its receipt will be entered in column 3; if there are further intermediate references and replies, further entries will be made in the same way in columns 2 and 3 until the file is closed by the entry of the disposal number in column 4. The abstract of the original current may be entered briefly in column 1, but this is not essential. When a current is sent to be referenced, the fact should be noted in the column of "Remarks."

NOTE.—If the disposing clerk has to keep any special registers for the maintenance of which he is solely responsible, the papers entered in them need not be entered again in his Personal Register. The special registers will be sufficient check for all purposes.

Putting up previous papers.

34. When previous papers are required for reference, the disposing clerk should look up the indexes and disposal lists and requisition for the records needed on the prescribed slips. The Record-keeper is responsible for furnishing the records asked for without undue delay, but the disposal clerk should see the paper through this stage.

Modes of disposal.

35. When a paper cannot be disposed of without calling for further information, the communication for the purpose should issue as a reference. *Vide* Rule 17.

36. When it cannot be disposed of pending the disposal of another current or pending the receipt of a promised further communication, it should be put by with a remark to the effect "to lie over pending, etc." The remark should be copied in pencil in the disposal columns of the Current Register, and cancelled as soon it becomes possible to dispose of the case.

37. When all the information required for the disposal of a paper is ready and the final communication may issue, it would be a disposal and the series R or D into which it should go depends on whether it should be retained permanently or for a period. A disposal is such a final order as closes the file and renders it ready to receive a disposal number and to be indexed and put in the record. *Vide* Rule 6.

38. Disposal may be effected, however, without issuing any communication.

When for instance a paper requires no action but has to be retained, it should be put by with the order "recorded" or "lodged." In the former case it would be registered in the R series if it is to be permanently retained, and in the D series if its preservation is limited to a period and it would be numbered like any other disposal and indexed, if necessary. Where under similar circumstances a paper of a routine character has to be retained for a short period, it should be "lodged."

Whether a paper should go out as a reference or as a disposal and in the latter case the series in which it should be entered must be determined by the drafting clerk in consultation with the head of the branch.

39. Communications addressed to subordinate officers which do not call for a report or a reply of some kind and those addressed to superior authorities which do not call for orders or instructions on any point or to which no reply is

awaited from the superior office should be treated as finally disposed of.

Papers endorsed out in original.

40. Many disposals can go through the office endorsed in original on the current. For these office copies need not be kept nor need any entry be made in the disposal list, nor need a disposal number be given. But a copy or abstract of the disposal should be given in the last column of the Current Register.

It is to be observed that this rule is applicable only when all the papers without exception are sent out along with the disposal. If any papers are left behind, *e.g.*, office papers, the file must be treated as an ordinary disposal, for otherwise there will be no place in which under these rules the papers left behind can lie.

41. References can go through the office endorsed in original. A copy or an intelligent abstract of the endorsement should, in such cases, be entered in column 8 (*a*) of the Current Register.

Miscellaneous points to be attended to in drafting.

42. In quoting the letter under reply, the number as well as any symbols that may have been appended to it should be quoted.

Paragraphs in drafts must always be numbered.

Months quoted in drafts must always be by name and not by number.

In heading letters, the name and designation of the writer and of the addressee should be given.

Care should be taken to enter at the foot of every draft :—

(1) The address entries, *i.e.*, the designation of each officer to whom the communication is to be sent, with the enclosures to accompany it to each address.

(2) The despatch docket, *i.e.*, the abstract of the paper to be written on the outside docket.

Files of papers submitted with drafts.

43. When a draft prepared by a clerk is sent up for the approval of the superior officer, the draft with the current or currents should be placed at the top, and the papers put up for reference should be arranged below in chronological order.

44. Previous papers put up should not be filed together, nor placed either one inside the other or inside the current. They should simply be tied together by means of a tape, the oldest paper being at the bottom.

Procedure before drafts are given Disposal Numbers.

45. When a draft has been passed by the superior officer and returned to the office, the disposing clerk should—

(1) detach all enclosures which are to go in original,

(2) detach and destroy in the presence of the head of the branch all reminders and chits not intended for record,

(3) page the file in red ink and

(4) enclose the file if it is of the R or D series (*vide* Rule 37), in a despatch docket sheet and cause it to be stiched with a stout thread on the top of the left hand corner.

The despatch docket sheet of which a specimen is given in the appendix *vide* Form VI, is a cover of catridge paper with printed headings for entering the disposal number and date, the officer or officers to whom sent, the date of despatch, the abstract of the disposal, the back and forward numbers and number of pages in the file, the series R and D and the year of destruction. All the entries should be carefully made.

46. After this the disposing clerk should pass on the files with drafts to the disposal list clerk. He should at the same time return the put-up files to the record room and obtain back and cancel the requisition slips therefor. The Record-keeper should immediately place the returned files in their respective places and note the date of return in the Issue Register.

47. One of the most important duties of a disposing clerk is to note the chains of reference. He should enter on the docket sheet under the heading "back papers" the date and the number of the previous disposal numbers put up for the current or currents disposed of where such papers are not mere precedents but are absolutely necessary for a proper understanding of the previous history of the case. Similarly, he should enter under the heading "further papers" on the docket sheets of the disposal numbers put up the date and number of the present disposal. For example, if a disposal No. 200, dated 15th April 1915, has a disposal No. 100, dated 1st March 1915, put up for it, the disposing clerk should when enclosing the latter disposal in the docket sheet note on it as follows :—

Back papers No. 100, dated 1st March 1915.

and on the docket sheet of the earlier disposal (No. 100, dated 1st March 1915) as follows .—

Further papers No. 200, dated 15th April 1915.

It is essential that the chaining should be very carefully done, as otherwise there would be difficulty in getting together related papers.

V.—ENTERING DISPOSAL LIST AND DISPOSAL NUMBERS.

48. The disposal list should be written up concurrently with the fair copying of the drafts. There should be separate disposal lists for each branch in two series R and D. The first or R series comprises disposals of importance which are to be preserved permanently. The D series consist of disposals which may be destroyed after a time, generally ten years. The disposal lists should have the following columns *vide* Form VII (Appendix).

R Series (Important).

1. Serial number.
2. Date of disposal, if on a current or currents received; if not, date of issue.
3. Current or currents disposed of.
4. Officer to whom the disposal is addressed.
5. Number, year and branch of the previous disposals on the same subject.
6. Number, year and branch of the further papers on the subject.
7. Copy of record abstract.
8. Date of despatch.
9. Date of receipt of the disposal file by the Record-keeper with initials.
10. Date on which the file was indexed with initials of Indexer.

D Series (Ordinary).

Same as above, with the following additional column 11 "If not to be destroyed ten years hence, year of destruction."

49. The determination of the disposal series under which a paper should appear is a very responsible piece of work and one which requires to be done with extreme care. It should never be delegated to any official who is not of sufficient standing. As the series are noted on

the drafts when they come for approval, the superior officer would have an opportunity of correcting any mistakes that may be made in this respect.

50. Disposals should be numbered like currents and the name of the branch, if any, should be exhibited. The skeleton formula with the series to which a disposal belongs should be invariably furnished by the drafting clerk thus :—R. Dis. No..... ... .Revenue, dated.....:.....

Disposals sent out in original should be numbered thus :—

"N. Dis. on current Number (Revenue) dated ....." The date is the date of the disposal and not of the current.

The disposal list clerk merely fills in the number and date. The abstract of column 7 of the disposal list should be brief, but at the same time, give such information as is compatible with brevity. It should clearly indicate how the paper was disposed of and the important word or phrase should be underlined.

The entries of chaining are taken from the despatch docket sheets and care should be taken not only to chain the disposal in hand backward, but to chain previous disposals forwards.

The disposal list should invariably be posted before fair-copying or at any rate before despatch. After despatch the disposal list clerk should fill in column 8 of the disposal list and before sending the papers to the Record-keeper, should circulate the files to the clerks concerned for making entries in the current, periodical and personal registers.

The Record-keeper's initials should be obtained in the disposal list against each entry and the Record-keeper should see that the disposal files are in order and properly paged and stitched. Incomplete and undisposed of files should under no circumstances be sent to or received in the Records and the Record-keeper should decline to take any file, the closing order of which is not attested by a superior officer. Similarly disposed-of files should never be unnecessarily detained by the disposing clerks.

51. Disposals which have not been communicated, *e. g.*, recorded and lodged files should also be transferred to the record room from day to day like communicated disposals.

Lodged papers sent to Record should be accompanied by a brief descriptive list prepared in duplicate, one copy with

the Record-keeper's acknowledgment being retained in the disposing branch and the other in the Record room.

52. In the case of copy applications, rain reports and other papers of an unimportant and recurring nature, it is not necessary to give details in the list. It will be sufficient if their nature and number are given thus:—

"50 Rainfall reports of 1916"
or "200 copy applications of 1916"

53. References should bear the number of the current thus:—

Reference on current No. 100 Magisterial of 1915-16, dated the 15th April 1916, or shortly, reference 100-15-1, dated 15th April 1916. The date given to a reference is the date on which it is sent. It is not the date of the current.

References are registered only in the current register. But if they are numerous or if a separate account of them is desired as a ready help for issuing timely reminders, the maintenance of a separate Reference Register (in form VIII—Appendix) is suggested. References issued should be simultaneously noted in this register and in the Current Register and the receipt of replies should also be similarly entered.

VI.—INDEXING.

54. The maintenance of an index is an essential part of the disposal number system and no effort should be spared to ensure due performance of this important duty. In the absence of an index the laborious process of searching the disposal registers may have to be gone through if a person who remembers a particular correspondence on a subject cannot quote the number and date of such correspondence.

All disposals of the R series, and such of the D series as are important should be indexed. Drafting officers should indicate by some convention the 'L' papers which must be indexed. Thus [D] might serve to show that the paper will be indexed, while a plain D would mean that it will not be indexed. The head of the office should occasionally scrutinise the work and see that it is carefully performed. He should periodically examine the disposal lists in the R and D series and satisfy himself by reference to the entries in column 10 of these lists, that there has been no undue delay in indexing

disposal files. He should also see that no important papers are left unindexed by inadvertence or in order to avoid trouble.

Instructions for indexing.

55. Indexing should be done on loose forms which should be bound up at the end of the year. The system of indexing to be followed is the alphabetical. The abstract of the purport in the index, the docket on the despatch sheet and the abstract in the disposal list should be identical. The catch word in the docket should be the index word or one of such words. The index words should be such as to facilitate the tracing of precedents and for this purpose the words selected should be of a general nature but not too general. That is, they should be sufficiently restricted, if possible, to prevent so large a number of entries coming under one heading as to impair the usefulness of the index for ready reference. Special attention should be paid to cross-referencing and care should be taken to index a file under all the words under which it might possibly be looked up and especially under the names of the persons and of places, if any, concerned.

VII.—CHECKING ARREARS.

56. The secret of checking arrears consists in carefully closing the current and periodical registers. If a current register shows no entry in either of the two last columns it means that it is pending in the office. If it shows an entry in column 8 (*a*) and no entry corresponding to it in 8 (*b*), it is against some other office. If it shows an entry in the last column, it is out of the hands of the office as an arrear and is part of the record. The last columns of the Periodical Registers are also similarly arranged.

57. The following are the entries for closing the Current and Periodical Registers and no others are permitted :—

(a) in lodged papers, the word "Lodged" with date,

(*b*) in recorded papers, the word "Recorded" with number in R or D list and date.

(*c*) in filed papers, the word "Filed" and date,

(*d*) (where the disposal has been sent in original) the words "N. Dis." with date and initials of the head of the office,

(*e*) when carried forward to the next year's register an entry to that effect,

(*f*) when transferred to another current entry, a remark to that effect.

(*g*) in all other cases the number, year and branch of the disposal.

Check by chief ministerial officer

58. The ministerial head of the branch or office should examine the current and personal registers of his office or branch once a week at least to see that reminders are being promptly issued and that there is no undue delay in disposal, and should for the same purpose examine the bundles of papers pending with each clerk. At each examination he should initial the register. He should keep with him a daily calendar of periodicals posted for the whole year and score off the entries as each periodical is attended to.

He should also examine the disposal list to see if the disposals up to the 3rd day previous at any rate have been sent to the Record-room and the Record-keeper's initials obtained and that there is no undue delay in indexing disposed-of files.

Check by Head of Office

59. Once a month the current registers and disposal lists should be placed before the head of the office or officer in subordinate charge together with a suitable abstract somewhat in the following form :—

Abstract of arrears in the office of for 19 .

	Less than a week	Less than a month but more than a week	More than a month	Names of clerks with heaviest arrears, and number of papers pending with each under all heads
I Pending in the office				
Current Register for higher offices				
Ordinary Current Register				
Petition Register				
Periodical Register				
Special Registers				

	For more than a month	For more than three months	Names of officers responsible for references more than three months old with number of references pending with each
II. Pending receipt of information from other offices			
Current Register for higher offices ...			
Ordinary Current Register			
Petition Register ...			
Periodical Register ...			
Special Registers (if any)			

III. Number of disposals remaining to be sent to the Record-room.

IV. Number of disposals remaining to be indexed.

V. Number of times the office registers have been examined by the Chief Ministerial Officer.

To the above statement should be appended, if necessary, a list of papers pending for more than a month in the office and of references pending with other offices for more than three months. The former should have columns for showing the date and substance of each communication, the current number and the reason for pendency. The latter should show besides, name of officer addressed and the dates of reminders sent to him. These lists need not be renewed each time. Once prepared they may be corrected from time to time and kept in use till they become too full of corrections to be easily perused.

Note.—The statement of outstanding references would be unnecessary if a register of references is kept as laid down in Rule 53.

Subordinate officers should send the monthly abstracts with the appendicies to the officers to whom they are subordinate before the 15th of the month following that to which they relate. The officer to whom the papers are thus submitted should return them quickly after perusal with his remarks, if any (*vide* Rule 16 of the General Rules of Office Procedure).

VIII.—CIRCULAR FILES.

60. It has been stated above that filing is one of the forms of disposal. By this is meant that a paper is put into a circular file. Each disposing clerk should be required to maintain a file pertaining to his branch of work of rulings issued by Government and other superior authorities as well as by the head of the office. Matters embodied in Departmental Codes and Manuals should be excluded from the circular file. The files should be examined from time to time by heads of offices to see that they are up-to-date and properly indexed for ready reference.

IX.—PAPERS NOT COMING UNDER THE DISPOSAL NUMBER SYSTEM.

61. The disposal list in its two series R and D and the lodged papers take up all correspondence inward and outward. The only papers, whose disposal is not provided for above are Registers, Gazettes and other periodical publications and books.

Registers.

62. A label should be affixed to the outside cover of each register showing the number, name, authority prescribing, volume and period of retention.

Registers must be written in volumes continuously numbered The practice of opening fresh registers every year when the previous volume contains a large number of blank pages should be discouraged.

Stock List and Ledger of Registers.

63. In every office a stock list of registers should be maintained in a bound book in Form IX (Appendix).

All changes made as regards the form or maintenance of the registers should be immediately noted against the entry concerned quoting the authority in column 4.

For the stock list a few pages of the bound book should suffice. The rest of the book should be used as a ledger for each register, information being noted under the following headings :—

1. No. of vol
2. No of pages
3. Date of opening.
4. Date of closing
5. Due date of destruction.
6. Date of transmission to record room.
7. Shelf in which lodged
8. Initials of Record-keeper
9. Destruction remarks with initials.

The number and name of the register should be written in bold characters at the top of each page allotted to a register.

Gazettes.

64. Where separate rules exist as in the Revenue Department as to the mode of keeping Gazettes, they should be followed. In all other cases the following arrangement should be adopted.

As each Gazette is received, portions of special interest to the office should be detached and eventually bound for preservation. The rest of the Gazette should be put in an annual bundle and destroyed at the end of two years.

Newspapers.

65. Newspapers should be dealt with like Gazettes, that is to say, cuttings must be made of useful matter and the rest of the papers should be filed chronologically and disposed of as waste paper at the end of two years.

Other Periodical Publications.

66. Such publications as can go into the Library should be put therein, the library catalogue being entered up as additions are made.

Administration reports of the departments with which an office has any degree of concern and magazines required for reference should be periodically bound up, the volumes being numbered. The annual reports of all other departments should after perusal be filed and sold as waste paper at the end of two years.

Volumes of the Monthly Proceedings of Government should be unbound and portions of interest detached, two years after the period to which the proceedings relate. The detached portions should be conveniently bound and the rest destroyed.

67. Periodical reports and returns like other receipts will receive disposal numbers, but if this is found inconvenient in any case owing to the large numbers of returns, they may be filed in annual bundles arranged according to their number and sub-number in the stock list.

X. RECORD ROOM ARRANGEMENTS.

68. When papers are taken out of the Record-room for reference, an entry to that effect should be made in the Record Issue Register to be maintained by the Record-keeper and a slip containing the marginally noted particulars of the record should be substituted for every paper so removed. The person taking papers out of the Record-room should be held responsible for returning them as soon as possible. On the return of the papers the slip is to be returned and cancelled.

Record Requisition Slip.
1. Serial number of the Issue Register.
2. The date, number and description of the paper put up.
3. The officer for whom put up.
4. The date on which it is given.
5. The necessity for the reference.
6. Signature of clerk taking it.
7. Initials of the Record-keeper.

The Issue Register should be in Form X (Appendix).

The register should be periodically examined by the Record-keeper and all outstanding records should be called in by means of a circular note *vide* Form XI. The note should before being filed be submitted to the head of the office.

General mode of record arrangement.

69. A separate shelf or space must be set apart for each department of business.

On the front of the shelf the name of the department to which the papers therein lodged appertain should be printed or written legibly and in bold characters on a thick label to be attached to the shelf.

The front and sides of the shelf in which papers of permanent value are lodged should be fitted with wire work so as to admit of the free circulation of air.

Arrangement of papers dealt with under the Disposal Number System.

70. All numbered disposals whether indexed or not should be arranged in chronological order and put into the record racks or shelves. They should be tied up unfolded in bundles not inconveniently bulky between dealwood boards on the upper one of which should be pasted a printed slip (of which a specimen is given in the Appendix *vide* Form XII) showing the first and last number in the bundle.

The R and D series should be kept separate but the disposals of different years in the same series must be together.

Registers should be arranged according to their number in the stock list, different volumes of the same register being together.

Lodged papers should be arranged by their current numbers, if any.

The arrangement of Gazettes, periodicals, etc., has already been explained.

For the arrangement and disposal of library books, *vide* rules issued with G. O. No. G. 5203-51—E. A. 4-14, dated 23rd November 1914. It is not possible to prescribe any rules for the periodical destruction of books. The library should be examined by a responsible officer once in five years and all obsolete and unnecessary books removed, the Library catalogue being suitably amended at the same time.

Rules for the destruction of records under the Disposal Number System.

71. Drafting clerks and the ministerial heads of offices and branches should mark on the docket of each disposal file before it is sent to the Record-room whether the file should be permanently retained or destroyed after a term of years noting in the latter case the year of destruction. The entries should be checked, and, if necessary, altered by the officer signing the communication.

After disposal, papers should be entered in the disposal list in the R and D series according as they are to be permanently preserved or retained for a period, which usually is ten years.

72. Destruction of papers should take place once a year at an appointed time and the papers proposed for destruction should be carefully scrutinised by the head of the office. The papers to be destroyed will be:—

(1) Disposals of the D series of the 11th year preceding, with the exception of those marked for retention for a longer period.

(2) Lodged papers, Gazettes omitting portions taken for binding and administration reports not required for further reference of the 3rd year previous.

(3) Volumes of registers ripe for destruction—to be found out by consulting the ledger of registers.

(4) Old records that have become time-barred according to the rules regulating their preservation.

(5) Time-expired periodical reports and returns.

At the time of destruction the fact that a paper has been destroyed and the year in which it was destroyed should be noted in the disposal lists and in the ledger of registers under the initials of the chief ministerial officer. This might be done by a rubber stamp bearing the inscription "Destroyed 19 ."

If at the time fixed for destruction it is considered advisable for some special reason to retain certain files either permanently or for a longer period than ten years, such files should be picked out and carried forward as indicated below either to the R list or to the appropriate D list. Thus the "destroyed" papers listed in 1898 will be taken up for destruction in 1909 and the bulk of the papers will be destroyed in that year. But suppose the following papers are then left over, *viz*:—

(*a*) Papers of 1898 to be destroyed after twelve years, *i.e.*, in 1911.

(*b*) Papers of 1898—to be destroyed after fifteen years, *i.e.*, in 1914.

(*c*) Papers of 1898—to be destroyed after twenty years, *i.e.*, in 1919.

(*d*) Papers to be permanently retained, *i.e.*, those which have been wrongly entered in the list or which the officer in charge

considers it inadvisable to destroy.

Now the papers in (*a*) will be attached as a supplemental list to the D list of the year 1900 which will be ripe for destruction in 1911; the papers in (*b*) will be attached as supplemental list to the D list of 1903 which will ripen for destruction in 1914.

Similarly, the papers in (*c*) will form a supplemental list to the D list of 1908. Lastly, the papers in (*d*) will be attached as a supplemental list to the R series.

Mode of destruction.

73. All manuscript papers and all printed papers which have not been published should be burnt in the presence of the chief ministerial officer.

Gazettes, newspapers and other printed papers which have been published may be sold as waste paper.

74. The registers and forms required by these rules are the following. Against the former the periods of preservation are noted.

1.	Ordinary Current Register...	Permanent
2.	(*a*) Periodical Register ...	10 years.
	(*b*) Stock list of periodicals	Permanent.
3.	Current Register of papers received from higher offices.	Permanent.
4.	Petition Register .	Do
5.	Register of papers received in Camp or Tour Register...	2 years.
6.	Personal Register of disposing clerk	Do
7.	Despatch docket sheet	
8.	Disposal list R and D series.	Permanent.
9.	Register of references ...	2 years.
10.	Index Register	Permanent.
11.	Monthly statement of arrears together with list of papers pending for over a month in the office and of references pending with other offices for more than three months ...	2 ears.
12.	Stock list and ledger of registers ...	Permanent.
13.	Requistion slip,	
14.	Record Issue Register ...	2 years, provided there are no outstanding records.
15.	Printed slip to be pasted on the bundle of disposed records.

Programme of Railway Operations in Mysore during the year 1916-17.

No. 3183-7—Ry. F. 42-15-16, dated 20th May 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

RAILWAY DEPARTMENT.

Read—

Note No 413, dated 25—26th January 1916, from the Secretary for Railways, submitting for approval a programme of railway operations for the triennium commencing with 1916-17.

Order No. 3183-7—Ry. F. 42-15-16, dated 20th May 1916.

The programme has been considered by Government and they are of opinion that during the year 1916-17 only investigations and survey work in respect of new lines may be undertaken, that no new construction should be taken up and that out of the lines investigated and surveyed the most suitable ones may be selected for construction from 1917-18 onwards, if funds permit.

2. They are therefore pleased to approve of the accompanying modified programme for one year.

3. As no new construction will be taken up during the year 1916-17, Government direct that the year should be utilized for consolidating the work already done and for training the staff in the work of administering the open lines. The Agent and Engineer-in-Chief, State Railway Department, is requested to submit for sanction programmes concerning such training.

K. KRISHNAIENGAR,
Offg. Secretary for Railways,
Government of Mysore.

To—The Secretary to Government, General Department.
The Secretary to Government, Financial Department.
The Agent and Engineer-in-Chief, State Railway Department.
The Comptroller to the Government of Mysore.
The Comptroller, Public Works and Railway Branch (through the Financial Department).

Statement showing the programme of Railway operations in Mysore during 1916-17, as approved in Council.

No.	Heads	Names of lines
I.	Construction	Lines already under construction will be completed.
II.	Surveys	1. Mysore-Coorg connection. 2. Thadasa-Hebbe Tramway. 3. Mysore-Kakankote. 4. Extension of the Tarikere-Narasimharajapura Tramway to Sringeri.
III.	Preliminary investigation including traffic prospects.	1. Shimoga-Bhatkal. 2. Shimoga-Tirthahalli-Sagar.

No. 3194-5—Ry. F. 113-15-16, dated 22nd May 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

RAILWAY DEPARTMENT.

Read—

Correspondence ending with letter No. 544, dated 17—18th January 1916, from the Engineer-in-Chief, State Railway Construction Department, submitting copies of reports received from the Executive Engineers' Nos. I and II Divisions, Mysore-Arsikere Railway, explaining the reasons that have led to the heavy excess of Rs. 8,86,938 over the estimates originally sanctioned, and soliciting sanction to the revised detailed estimates submitted for the construction of the Mysore-Arsikere Railway.

2. Note No. 416, dated 27th January 1916, from the Secretary for Railways, submitting for orders the explanations of the Executive Engineers and the Engineer-in-Chief with his own views thereon.

Order No. 3194-5—Ry. F. 113-15-16, dated 22nd May 1916.

The revised detailed estimates submitted by the Engineer-in-Chief, State Railway Construction Department, show a net increase of Rs. 8,86,938 over the estimates originally sanctioned for the construction of the Mysore-Arsikere Railway. The differences by major heads stand as below :—

	Original estimate	Revised estimate	Difference + or —
1	2	3	4
	Rs	Rs.	Rs
Preliminary expenses	83,068	81,846	— 1,222
Land	1,96,191	1,24,054	— 72,137
Formation	9,28,547	16,81,739	7,53,192
Bridgework	12,27,314	13,35,240	1,07,926
Fencing	77,879	69,592	— 8,287
Electric telegraph	...	...	...
Ballast and permanent way	24,19,894	23,70,938	— 48,956
Stations and buildings	6,50,670	4,97,706	—1,52,964
Plant	1,29,930	1,24,745	— 5,185
Rolling stock	6,39,000	7,15,750	76,750
General charges	3,74,400	6,12,221	2,37,821
Total	67,26,893	76,13,831	8,86,938

2. It will be seen that there are excesses under the following four heads, *viz.*:—

	Rs.
(*a*) Formation	7,53,192
(*b*) Bridgework	1,07,926
(*c*) Rolling stock	76,750
(*d*) General charges	2,37,821
Total ...	11,75,689

The anticipated savings under the remaining heads amount to Rs. 2,88,751, resulting in a net excess of Rs. 8,86,938.

3. The excess under (*d*) "General charges" is attributed to the project occupying a longer time in completion than the period of two years contemplated and allowed for in the original project.

The extra charges under (*c*) "Rolling stock" are accounted for by the fluctuations in the prices of foreign stores on account of the war. The excess cost

under (*b*) "Bridges" is traceable to the difficulties incidental to foundation works in big rivers like the Lakshmanatirtha, the Cauvery and the Hemavati and to the increased waterways required for several minor tunnels all along in flat valleys and below tanks. Some of the excess is also due to the raising of formation level over the Lakshmanatirtha bridge owing to the expected increase of four feet in height to the Kannambadi dam.

The explanations offered in the above respects appear to be satisfactory and are accepted.

4. As regards the large excess of Rs. 7,53,192 under (*a*) "Formation" it is observed that the bulk of it, namely, Rs. 5,99,330 occurs in No. I Division, and Rs. 1,53,562 in No. II Division. The chief causes of this excess are explained to be—

(1) The improvement of alignment during execution to avoid excessive curvature and steep grades. This resulted in deeper cuttings and heavier blasting.

(2) An enhancement of rates for works owing to the simultaneous progress of large irrigation works in the neighbourhood and the consequent difficulty of obtaining and keeping labour.

(3) An insufficient appreciation (resulting in defective classification) of the nature of the rock to be met within deep cuttings and leading to underestimating.

(4) The entire omission, in the project, of charges for blasting rock in miles 7 to 12 in the expectation that all rock so blasted would be transferred to the Cauvery Reservoir Works at full value, only a small provision of Rs. 2,500 having been made for blasting in the sanctioned estimate as against Rs. 2,00,990 in the revised estimate, but the Cauvery Reservoir Works have not taken all that is available nor has the quantity of good stones come up to expectations. The excess under blasting on this account has been very heavy.

5. From a careful perusal of the papers, the Government are convinced that most of the factors affecting the question of cost could have been foreseen and taken into account in preparing the original estimate, but that this was not done owing chiefly to the inexperience of the Engineer Officers concerned, which stood in the way of a correct appreciation of the nature of the conditions to be provided for. It was not till the 8th September 1915 that Mr. Dove Wilson, the then Engineer-in-Chief, insisted on the submission of revised estimates as he found that the excess was going to be very heavy. It is also clear that the original estimates were themselves underestimated as is apparent from the fact that the estimates for the Mysore-Hassan line prepared by the Madras and Southern Mahratta Railway Engineers showed the cost of formation at Rs. 12,74,733 from Mysore to Hassan. Adding 25 per cent for the 28 miles from Hassan to Arsikere, the aggregate cost would stand at Rs. 12,74,733 plus Rs. 3,18,683 or Rs. 15,93,416 against Rs. 16,81,739 of the revised project which includes special provision for a very high bridge and deep banks across the Lakshmanatirtha and other necks of spread of the Cauvery Reservoir Lake.

6. Government further observe that sufficient care has not been exercised in framing the estimates and that timely action in accordance with the codal rules was not taken by the Executive Engineers to regularise the excess. They accept the Engineer-in-Chief's explanation that the excess was not due to any culpable negligence on the part of the Executive Engineers, but at the same time they desire that the Engineer-in-Chief will do what is necessary to prevent a recurrence of the undesirable state of things under advertance.

7. Separate orders will be passed on the revised estimates submitted for sanction.

K. KRISHNAIENGAR,
Offg. Secy. to Govt. for Railways.

To—The Engineer-in-Chief, State Railway Construction Department.

Enc. 1

MYSORE STATE RAILWAYS,
CENTRAL OFFICE,
Bangalore, 19th May 1916.

From

RAO BAHADUR K. KRISHNAIENGAR, ESQ., B.A., L.C.E.,
Officiating Secretary to the Government of Mysore for Railways,
Bangalore.

To

The Engineer-in-Chief, State Railway Construction Department.

Sir,

With reference to correspondence ending with your letter No. 3092—316 (*a*), dated the 21st—22nd March 1916, I am directed to communicate the sanction of Government to the accompanying schedule of powers to be exercised by the Loco and Carriage Superintendent, Mysore State Railways.

I have the honour to be,
Sir,
Your most obedient servant,

T. LAKSHMINARASIMHA RAO,
For *Offg. Secy. for Rys.*,
Government of Mysore.

NO. 3171—ENC. 1, DATED 19TH MAY 1916.

THROUGH THE FINANCIAL DEPARTMENT.

A copy of the above together with a copy of the schedule of powers is forwarded, with compliments, to the Comptroller, Public Works and Railway Branch, for information.

T. LAKSHMINARASIMHA RAO,
For *Offg. Secy. for Rys.*,
Government of Mysore.

No. 3171—Enc. 1, dated 19th May 1916.

MYSORE STATE RAILWAY SECRETARIAT.

Schedule of powers to be exercised by the Loco and Carriage Superintendent, Mysore State Railways.

No.	Heads	Details of powers
1	General Control ...	May exercise general control over the operations of his Department and suggest improvements for its development.
2	Establishment ...	The whole establishment will be considered temporary Appointments, dismissals, promotions and reductions of the members of his Department, whose pay or maximum pay is below Rs. 25 per mensem may be made up to the limit of the sanctioned scale subject to the condition that non-Mysoreans are not employed without the express sanction of Government. The Accounts staff of the Loco Department will be appointed by the Comptroller. In regard to the hands of the Public Works Department including the Accounts staff drafted to the Railway Department, the concurrence of the Chief Engineer or the Comptroller, Public Works and Railway Branch, as the case may be, is necessary in regard to dismissals, promotions and reductions. (*a*) *Transfers*—May transfer subordinates from one place to another at his discretion. (*b*) *Leave.*—Can grant leave under the Rules in force to all members of the staff on pay of Rs. 50 and under excepting the members of the Accounts Department Casual leave may, however, be given by the Superintendent himself to the Accounts staff. (*c*) May sanction temporary arrangements when officials go on leave without extra cost to Government. Such arrangements in the case of Accounts staff require the approval of the Comptroller. (*d*) *Contingencies*—May sanction purchase of such articles of Stationery as the Government Depot cannot supply within a limit of Rs. 5 in the case of Europe made articles and Rs. 10 in the case of country made articles.
3	Works and Work Orders	Can exercise the powers of an Executive Engineer in regard to sanction of estimates and work orders.
4	Works for other Departments and Public.	Can carry out works for other Departments and public up to a limit not exceeding Rs. 50 in accordance with paragraphs 151 to 154, State Railway Construction Code.
5	Purchase of Stores ...	Up to a limit of Rs. 250 at a time if the Stores in question require technical knowledge for their purchase.
6	Imprests ...	He will have an imprest of Rs. 1,000 and be the disburser for all Workshop labour and for his Department. Bills relating to Open Lines will be preaudited and paid by the Audit Department.
7	General	(*a*) *Establishment. Fixing head-quarters.*—May fix head-quarters of all subordinates in consultation with the Engineer-in-Chief. (*b*) Generally, the work has to be carried on in the spirit of the Regulations in force on the Railway Establishment of the Government of India and the Service Regulations of the Mysore State. (*c*) In all cases of doubt, difficulty or delicacy, the special orders of the Agent should be obtained.

19th May 1916.

K. KRISHNAIENGAR,
Offg. Secy. for Rys., Govt. of Mysore.

Exd.—R. K.

No. 3188-90—Ry. F. 113-15-16, dated 20th May 1916.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

RAILWAY DEPARTMENT.

Read—

Government Order No. 9-11—Ry. F. 113-14-15, dated 2nd July 1914, sanctioning detailed estimates amounting to Rs. 67,26,893 for the construction of the Mysore-Arsikere Railway.

2. Correspondence ending with letter No. 544 dated 17th—18th January 1916, from the Engineer-in-Chief, State Railway Construction Department, explaining that the original estimates have been exceeded by Rs. 8,86,938 and submitting for sanction revised detailed estimates amounting to Rs. 76,13,831 for the above Railway.

3. Note No. 416, dated 27th January 1916, from the Secretary for Railways, recommending sanction to the above estimates.

Order No. 3188-90—Ry. F. 113-15-16, dated 20th May 1916.

It is explained by the officers in charge that a variety of causes as noted below contributed to the unusually large excess that is embodied in the revised estimates:—

1. Necessities of proper alignment for final location of the Railway
2. Imperfect appreciation of nature of rock in many of the cuttings';
3. Necessity for enhancement of rates to keep the labour on works with the large Cauvery Reservoir and allied works in progress close by;
4. The approximate nature of preliminary estimates for foundations and waterway of bridges;
5. The necessity for raising the abutments and piers of Lakshmanthirtha Bridge by 4 ft. to allow for the contemplated increase of capacity of the Cauvery Reservoir, and lastly.
6. The non-fulfilment of the expected credit to the works by the utilisation of blasted stones in the neighbourhood of the Lake.

2. Government, while conceding the reasonableness of some of the points urged, are constrained to observe that they ought to have been apprised in time of the actual state of matters and that this would have been possible if the officers concerned had set about the proper examination of the nature of soil and collected data for the rates that would be needed finally on the works and worked out other details. The failure in this respect is noted with dissatisfaction.

3. With the above remarks, the Government of His Highness the Maharaja are pleased to accord their sanction to the revised detailed estimates aggregating Rs. 76,13,831 involving an excess of Rs. 8,86,938 for the construction of the Mysore-Arsikere Railway.

4. Government trust that the officers concerned will keep careful watch over the expenditure and complete the project within the estimate now sanctioned, and they hope that the line will be ready for opening for traffic by the end of the current year.

K. KRISHNAIENGAR,
Offg. Secretary for Railways,
Government of Mysore.

To—The Secretary to Government, Financial Department.
The Comptroller, Public Works and Railway Branch (Through the Financial Department).
The Engineer-in-Chief, State Railway Construction Department.

REVENUE

SECTION 1—LAND REVENUE

TABULAR STATEMENT OF MATTERS OF ROUTINE FOR MAY 1916.

Serial No.	Proceedings			Subject and Order
	Number	Date	To whom sent	
1	R 10072-3—L R 14-15-27	1	Rev Comr and Comptr	Sanctions the acquisition of 4 acres of land out of Survey No 146 of Belagere village, Challakere Taluk, for the extension of Narnapur, a hamlet attached to the Belagere village
2	R 10074—L R 14-15-28 ...	1	Compiler, *Mysore Gazette*	Notifies the acquisition of the land referred to in the above
3	R 10075-6—L R 22-15-71	1	Rev Comr and Comptr	Sanctions the purchase of a copy of "Village Government in British India" at a cost of Rs 3-8-0
4	R 10077—L R 12-15-151	1	Rev. Commissioner ...	Records his letter reporting the occurrence of an accidental fire at the Kittankere village, Arsikere Taluk, on 13th March 1916, resulting in the destruction of thatched sheds and the village accounts of the Kittankere and Madihalli circles for three years and observes that the inconvenience likely to be caused by the loss of accounts may be minimized by getting duplicates prepared of the important ones with the aid of taluk accounts.
5	R 10092-3—L R 370 15-9	1	Rev. Comr. and Comptr	Sanctions a bill for Rs. 8-12-4, being the rent payable to one Adaviappa for his building in which the records of the Magadi Taluk office had been kept while the Taluk Cutcherry building was under repairs.
6	R 10099-100—L R 37-15-221	1	Do ...	Authorises investigation of the claim for Rs 20, being horse allowance due to Mustafa Alikhan, Shekdar, Nandagudi Hobli, Hoskote Taluk.
7	R 10101-2—L R 36-15-75	1	Do ...	Authorises investigation of the claim of the patel of Kachoonahalli village, Hunsur Taluk for arrears of potgi due for 1912-13.
8	R 10106-7—L R 37-15-216	1	Do ...	Authorises investigation of the claim preferred in a bill for Rs. 4-8-3, being the arrears of pay due to late Mutchi Bhyrappa of the Tumkur Deputy Commissioner's office for the month of October 1914.
9	R 10110-12—L R 489-15-2	1	Rev. Comr., Comptr. and Supt., Rev. Survey	Sanctions the payment of revised remuneration to the village officers of certain villages of the Nelamangala Taluk.
10	R 10123-4—L R 22 15-68	2	Rev. Comr. and Comptr.	Accords sanction to an expenditure of Rs 19-11-0 incurred by the Revenue Commissioner in the purchase of certain books and publications for the use of his office.
11	R 10133-4—L R 37-15-207	2	Do ...	Directs that Mr. K. R. Srinivasiengar, Deputy Commissioner of Tumkur, be allowed the travelling allowance admissible under the rules for his return journey from Mysore to Tumkur in July 1915.

Serial No.	Proceedings			Subject and Order
	Number	Date	To whom sent	
12	R 10139-40—L R 22-15-69	2	Rev. Comr. and Comptr	Sanctions the purchase of a copy of Dar wagh's Indian Stamp Law at a cost of Rs. 9 for the use of the Hassan Deputy Commissioner's Office
13	R 10186-7—L R 135-14-13	3	Do ..	Confirms Mr G. G. Narasimhachar, as Head Clerk of the Kadur Deputy Commissioner's Office.
14	R 10210—L R 680-14-7...	4	Rev. Commissioner ..	Confirming the Revenue Commissioner's order dismissing the appeal of Gavi Gowda, Patel of Singanahalli, Tiptur Taluk, regarding the can cellation of darkhast sale of vacant site No. 1 o Mayagondanahalli, Tiptur Taluk, and directing its reservation for communal purposes.
15	R 10211 ...	4	Gavi Gowda, Patel of Singanahalli, Tiptur Taluk	Informing him that his appeal is dismissed as no question of law is involved in the orde appealed against
16	R 10212 ...	4	Chikkarevanna Gowda, Patel of Mayagondana-halli, Tiptur Taluk	Forwarding copy of the above endorsement
17	R 10267—L R 1-15-206	8	Dy. Comr, Bangalore...	Records his report in the matter of the unauthorized cultivation of certain land included in the tank bed of Neelasandra village, Channa patna Taluk by Ghante Dasaiya and the fin inflicted on him on that account
18	10278-88—L R 368-15-3	8	Rev. Comr., Chief Engr., Comptr, P. W and Accounts, and Dy. Comrs of Dts.	Directs that in the case of estimates for th restoration of minor tanks which require th sanction of the Revenue Commissioner or th Government and in which the estimated cos exceeds ten times the assessment, the previou approval of the Revenue Commissioner shoul be obtained before submission of proposals fo sanction.

Serial No.	Proceedings			Subject and Order
	Number	Date	To whom sent	
19	R 10307-9—L R 228-14-6	9	Rev. Comr, Sany Comr. and Dy. Comr., Mysore	Records correspondence relating to the prayer for prohibition of wet cultivation round about the villages in the Yedatore Taluk (Representative Assembly Subject No 713 of 1913) with the remark that the prayer is impracticable and that besides there is no conclusive proof that wet cultivation is solely responsible for the unhealthiness of the place, and calls for proposals to adopt suitable sanitary measures and to shift the village sites to more healthy localities.
20	R 10338—L R 12-15-168	10	Revenue Commissioner	Records his letter reporting the occurrence of an accidental fire in the godown attached to the Press room of the Tadapatri Cotton Press Company, Limited, at Davangere on 25th March 1916, resulting in the destruction of cotton worth Rs. 5,000
21	R 10339—L R 12-15-166	10	Do ...	Records his letter reporting the occurrence of an accidental fire at Bomlapur, Koppa Taluk, on 6th March 1916, resulting in the destruction of all the houses (6) in the village, the total loss of property being estimated at Rs. 2,365.
22	R 10341-3—L R 465-15-2	10	Rev. Comr., Supt., Rev. Survey, and Comptr.	Sanctions the payment of revised remuneration to the shanbhog patel of the Patnagere village, Seringapatam Taluk, amounting to Rs 89-4-0.
23	R 10344-5—L R 504-15-2	10	Do ...	Sanctions payment of remuneration amounting to Rs. 66-8-0 to the village officers of Sarva Inam Halasur village, Manjarabad Taluk, with effect from 1915-16.
24	R 10346-7—L R 505-15-2	10	Do ...	Sanctions the payment of remuneration payable to the village officers of Inam Kodigenahalli village, Devanhalli Taluk, amounting to Rs. 36-8-0 with effect from 1901-02.
25	R 10348-9—L R 506-15-2	10	Do ...	Sanctions with observations, payment of revised remuneration to the village officers of Jodi Narayanahalli in the Devanhalli Taluk, amounting to Rs. 39-4-0.
26	R 10350-1—L R 507-15-2	10	Do ...	Sanctions the payment of remuneration amounting to Rs. 63 payable to the village officers of Sarva Inam Heggere village in the Manjarabad Taluk, from 1914-15.
27	R 10353-4 —L R 502-15-2	10	Do ...	Sanctions the payment of final remuneration (amounting to Rs. 38-4-0), payable to the village officers of Jodi Navaratna Agrahara village, Devanhalli Taluk, from 1904-05.

119	R 11074-5—L R 22-15-73	27	Rev. Comr. and Comptr.	Sanctions an expenditure of Rs. 40 for providing the Dodballapur Sub-Division office with a panka.

Serial No.	Proceedings: Number	Proceedings: Date	Proceedings: To whom sent	Subject and Order
120	R 11092-3—L R 26-15-132	27	Rev. Comr. and Comptr.	Authorizes the Comptroller to investigate the claim of Mr P Subba Rao, Amildar of Holalkere, for travelling allowance during December 1914.
121	R 11114—L R 312-15-7 ...	29	Compiler, *Mysore Gazette*	Grants leave on Medical certificate for three months to Mr H. V. Ramaswami, Sub-Division Officer of Gubbi, in continuation of the privilege leave already granted to him.
122	R 11116—L R 555-15-2 ...	29	Do . .	Grants eleven days' privilege leave from 15th June 1916 to Mr. C. Devaraj Urs, Sub Division Officer of Malur, the Treasury Assistant Commissioner of the Kolar District being in charge in addition to his duties.
123	R 11128-9—L R 22-15-82	29	Rev. Comr and Comptr.	Accords sanction to an estimate for Rs 718, being the cost of certain articles of furniture required for the use of the several offices in the Chitaldrug District.
124	R 11137—L R 596-14-4 ...	30	Rev. Commissioner ...	In the matter of the revision petition of Kullegauda and two others of Dondemadanahalli, Nagamangala Taluk, in regard to remission of assessment on certain lands in the Kotebetta village, Nagamangala Taluk, sets aside the Revenue Commissioner's order on the ground that there is nothing to show that the order of the Deputy Commissioner sought to be appealed against was ever communicated to the appellants and remands the appeal to him for disposal according to law.
125	R 11138—L R 596-14-5 ...	30	Kullegauda and others of Dondemadanahalli, Nagamangala Taluk	Informs them of the above.
126	R 11139—L R 206-15-4 ...	30	Rev. Commissioner ...	Reverses his order cancelling the sale for arrears of revenue of Survey No 58 of Oommadevarahalli, Hassan Taluk, as there is nothing irregular about the sale except the forfeiture by the Amildar which is not a sufficiently serious irregularity to vitiate the sale and as there is no reason why the auction purchaser, whatever his other interests may be, should suffer, on this account.
127	R 11140—L R 206-15-5 ...	30	Dasa Raju Kanagal, Kunigal Taluk	Informs him of the above order.
128	R 11141 ...	30	Dase Gowda ...	Forwards copy of the above endorsement.
129	R 11142—L R 12-15-167	30	Rev. Commissioner ...	Records his letter reporting the occurrence of an accidental fire at Jodi Dombarpalli village, Srinivaspur Taluk, on 6th April 1916, resulting in the destruction of a thatched house and in the death of a boy.
130	R 11143—L R 685-14-7 ...	30	Do ...	In regard to the appeal of K. V. Suryanarayana Sastri, Agent, Avani Matt, in the matter of the revenue sale of Survey No. 85 in Gollahalli, Bowringpet Taluk, directs the sale being set aside for want of notice and observes that the Matha was entitled to a notice as its name appears in the quit-rent register and ought to have been entered in the village accounts.
131	R 11144—L R 685-14-8	30	K. V. Suryanarayanasastri, Agent, Avani Matt	Informs him of the above.
132	R 11145 ...	30	Ooragallappa of Gollahalli, Bowringpet Tk.	Forwards a copy of the endorsement.
133	R 11146—L R 677-14-4 ...	30	Rev. Commissioner ...	Dismisses the appeal of Venkataramiah and Muddappa of Dodda Indlavadi, Anekal Taluk, in regard to their claim to the shanbhogi of Dodda Indlavadi Firka and states that the suit having been filed only in September 1906, it was clearly barred by time.

Serial No.	Proceedings: Number	Date	To whom sent	Subject and Order
34	R 11147—L R 677-14-5	30	Venkataramaniah and Muddappa of Dodda Indlavadi, Anekal Taluk	Informs them of the above decision.
35	R 11148 ...	30	Seshagiriappa of the same village	Forwards a copy of the endorsement.
36	R 11150-1—L R 61-15-30	30	Rev. Comr. and Comptr.	Reviews sanction to the refund of Rs. 7-11-6 debitable to local cess and included in the refund bill sanctioned in Government Order No. R. 3440-2—Ft. 60-13-2, dated 11th November 1913.
37	R 11152—L R 74-15-4 ...	31	Rev. Commissioner ...	Rejects the appeal of Thimmegauda and Javaregauda of Karle village, Hassan Taluk, against the Revenue Commissioner's order rejecting their claim to the pateli of the newly formed Karle Amrut Mahal kaval village on the ground that the first petitioner has no right to succeed as he is already patel of another village and the 2nd petitioner also has no preferential claim as against the respondent.
38	R 11153—L R 74-15-5 ...	31	Thimmegauda and Javaregauda of Karle village, Hassan Taluk	Informs them of the above decision.
39	R 11154 ...	31	Thammarayagauda of the said Karle village	Forwards a copy of the endorsement.
40	R 11155—L R 212-15-4	31	Compiler, *Mysore Gazette*	Notifies the postings of— (i) Mr. K. Mallaraj Urs as acting Amildar of Honnali and (ii) S. Soundararajiengar, as Deputy Amildar of French Rocks.
41	R 11183—L R 175-15-4 ...	31	Rev. Commissioner ...	Dismisses the appeal of Sanjivappa of Adanur, Holalkere Taluk, in the matter of his claim to the shanbhogi of Chikkajajoor firka, Holalkere Taluk, and observes that the arrangement to which exception is taken was ordered so far back as 1880 with the consent of the baravardar and the appellant's father and that the appellant cannot question it after the lapse of thirty years.
42	R 11184—L R 175-15-5 ...	31	Sanjivappa of Adanur, Holalkere Taluk	Informs him of the above.
43	R 11185 ...	31	Rangappa, Govindappa and Hanumantappa of Chikkajajoor, Holalkere Taluk	Forwards a copy of the endorsement.
44	R 11186—L R 640-14-4	31	Rev. Commissioner ...	Dismisses the appeal of Dondegauda, Doddi Patel of Boovanahalli, Hassan Taluk, in regard to his claim to the Revenue pateli of the village and observes that the permanent Deputy Commissioner was quite competent to alter the appointment made by the Assistant Commissioner in charge of the Deputy Commissioner's Office and that there is no reason to question the order of 1903 including the appellant as a hakdar to the pateli office.
45	R 11187—L R 640-14-5	31	Dondegauda, Doddi Patel, Boovanahalli, Hassan Taluk	Informs him of the above.
46	R 11188 ...	31	Earegauda, Patel, Boovanahalli, Hassan Tk.	Forwards a copy of the above.
47	R 11189—L R 80-15-4 ...	31	Rev. Commissioner ...	Dismisses the appeal of Nagiah of Reddihalli, Challakere Taluk, against the Revenue Commissioner's order declining to set aside the sale for arrears of revenue of certain lands in Reddihalli there being no grounds for interference with the decision of the Revenue Commissioner.
48	R 11190—L R 80-15-5 ...	31	Nagiah of Reddihalli, Challakere Taluk	Informs him of the above decision.

Serial No.	Proceedings			Subject and Order
	Number	Date	To whom sent	
149	R 11191-3 ...	31	Imam Sabi, Channaveerappa and Sonnappa of Reddihalli	Forwards to each a copy of the above endorsement.
150	R 11194—L R 589-14-7...	31	Rev. Commissioner ...	Dismisses the appeal of Ramappa of Manchineellukote, Srinivaspur Taluk, in the matter of his claim to the shanbhogi of Nalavanki, Sonnapalli and Jalagondlahalli villages in the Nalavanki hobli of the Srinivaspur Taluk.
151	R 11195—L R 589-14-8...	31	Ramappa of Manchineellukote, Srinivaspur Taluk	Informs him of the above decision.
152	R 11196 ...	31	Subbarayappa of Upparahalli, Srinivaspur Taluk	Forwards a copy of the above.

SECTION 2—COURTS

TABULAR STATEMENT OF MATTERS OF ROUTINE FOR MAY 1916.

Serial No.	Proceedings			Subject and Order
	Number	Date	To whom sent	
1	J 4228-9—Cts 30-15-16 ...	1	The Regtr., Chief Court of Mysore and the Comptr. to Govt.	Sanctions the purchase of a copy of Court Fees Act by Sanjiva Rao, at Rs. 3-4-0, and one of Indian Stamp Act by Donough with latest amendments at Rs. 7-8-0, for the use of the Munsiff's Court at Narsimharajapura, the cost being met from the contingent grant to that Court for the current official year.
2	J 4230-31—Cts 30-15-15	1	Do ...	Sanctions the purchase of a copy of each of Gour's Transfer of Property, 3 Volumes, Rs. 35, Land Acquisition Act with commentaries, Lawyer's Companion Series, Rs. 8 and Guardian and Wards Act with commentaries, Rs. 5 for the use of the Court of the District Judge of Mysore, the cost being met from the contingent allotment to that Court for the current official year.
3	Pol 1097—Cts 245-15-6	1	The First Assistant to the Hon'ble the Resident in Mysore.	Requests the issue of an extradition warrant to the District Magistrate of Anantapur for the surrender of one Syed Hussain charged with offences punishable under Sections 407, 411, 414 and 424 of the Indian Penal Code and Section 52 of the Post Office Act.
4	J 4251-2—Cts 223-15-7...	2	The Dt. Magtes. of Shimoga and Kadur Dts.	Observes that the explanations of the Sub-Division Magistrate, Sagar and the Treasury Assistant Commissioner and 1st Class Magistrate, Chikmagalur regarding the delay in the disposal of the cases against certain extradited persons are not altogether satisfactory and that much of the delay could have been obviated by a proper adjustment of work and the exercise of some self restrain against inducements to adjourn.
5	J 4302—Cts 273-15-4 ...	3	The I.-G. of Prisons in Mysore.	Intimates the issue of an extradition warrant for the resurrender of Ramji *alias* Pommaiya, prisoner No. 809 of the Bangalore Central Jail to the Superintendent, Central Jail, Bangalore.
6	J 4368—Cts 287-15-2 ...	5	The Dt. Magte., Shimoga Dt.	States that Government do not consider it expedient to prefer an appeal against the order of acquittal in Criminal Case No. 81 of 1914-15, on the file of the Amildar Magistrate of Honnali, as recommended by him and observes that there has been considerable delay in making the present reference.
7	J 4373—Cts 245-15-8 ...	5	The Dt. Magte., Kolar Dt.	Intimates the issue of an extradition warrant for the resurrender of Syed Hussain accused of having committed the offences punishable under Sections 407, 411, 414 and 424 of the Indian Penal Code, to the Police Inspector of the Chikballapur Taluk at Chikballapur.
8	J 4389—Cts 281-15-6 ...	8	The Dt. Magte., Kadur Dt.	Intimates the issue of an extradition warrant for the surrender of Raja, accused of having committed the offence of theft to the Amildar Magistrate of the Koppa Taluk at Koppa.

Serial No.	Proceedings: Number	Proceedings: Date	Proceedings: To whom sent	Subject and Order
9	J 4390-93—Cts 293-15 ...	9	The Compiler, *Mysore Gazette*, the Regtr., Ch. Court, the Comptr to Govt. and Mr. S. Hiriyannaiya.	Notifies the appointment of Mr. S. Hiriyannaiya, M.A., B.L., as Subordinate Judge with effect from the 31st March 1916, and orders that he will continue to do duty as Private Secretary to Dewan until further orders and that Mr. K. Lakshminarnaiya, B.A., will continue to act as Subordinate Judge *vice* Mr. Hiriyannaiya, seconded.
10	J 4398—Cts 201-15-2 ...	10	The Regtr., Chief Court of Mysore.	Forwards copy of order passed by His Highness the Maharaja of Mysore on the Memorial of Ramiah, accused in Mysore Sessions Case No. 33 of 1914-15, directing that the sentence of transportation for life passed on the memorialist be reduced to one of rigorous imprisonment for ten years.

18	J 4611—Cts 268-15-6 ...	24	The I.-G. of Prisons in Mysore.	Intimates the issue of an extradition warrant for the surrender of convict Yellagadu of the Bangalore Central Jail, who is undergoing sentence of imprisonment in the Central Jail, Bellary, under the name of Ramadoss, after the expiration of his sentence in British India.
19	Pol 1183—Cts 307-15-3 ...	25	The First Asst. to the Hon'ble the Resdt. in Mysore.	Requests the issue of an extradition warrant for the surrender of one Khader Sab charged with the offence of criminal breach of trust.
20	Pol 1184—Cts 46-15-15 ...	25	Do ...	States that the case against accused Chikvenkataramana has been disposed of by the City Magistrate, Bangalore, and that the Superintendent of the Central Jail, Bangalore, has been requested to re-surrender him to the Superintendent of the Bellary Jail.
21	J 4637-8—Cts 305-15-2 ...	26	The Govt. Advocate and the Dist. Magte., Tumkur Dt.	Directs the Government Advocate to prefer an appeal to the Chief Court against the order of acquittal in Criminal Case No. 64 of 1914-15, on the file of the Assistant Commissioner and 1st Class Magistrate, Gubbi Sub-Division.
22	Pol 1202—Cts 306-15-5 ...	29	The First Asst. to the Hon'ble the Resident in Mysore.	States that Joseph *alias* Chinnathambi was convicted of the offence of housebreaking with intent to commit theft and sentenced to rigorous imprisonment for two years and that the Durbar will issue order for his surrender if the Hon'ble the Resident considers that the immediate trial of the prisoner in British India is necessary and that it cannot be postponed till the expiry of his sentence in this State.
23	J 4684 —Cts 339-14-3 ...	31	The Regtr., Chief Court.	Records his letter reporting the results of the enquiry into the causes that contributed to the steady decline in the percentage of convictions to that of persons accused and stating that the Judges would not venture on a plausible guess at the cause of the decline as the Magistrates do not offer any explanation and statistics afford none, and that a more detailed examination is not likely to yield any profitable results.
